AB
Will you ask the SM if they give publicity
to these figures?

33/4

45

C.S.
17/8

The only publication is to the Hyalids
committee - which is told at each meeting of
the latest percentage figures for the colony as a
whole. It has been felt by the committee that
it would not be advisable to publish the figures
in respect of each individual farm at all generally.

15.8.75

PROPOSED BROADCAST BY AG. S.M.O. ON HYDATID DISEASE

This is a further little talk on the subject of Hydatid disease. I have no doubt that by now many of you will have heard of the talks I had with the managers of the farms and the union delegates on the subject of Hydatid disease in these Islands.

The first thing many of you will want to know about is the test being carried out to find people who may have the disease. Let me first of all stress that this is a test and is not a vaccination against the hydatid. It is a simple test, two small injections in your arm, the result showing in ten minutes for most people. A few people, if they have the disease, give a result six hours later, but this is not common. This test will be available to all who want it in the next few weeks as your doctors get around the Camp.

Let me at this stage make it very clear to you that we do not expect to find many cases. The chances are that you do not have hydatid. In one area of the Camp where there had been a case recently we did not find any other people with the disease, and we tested everyone there. So you can see there is no need for great alarm, the chances are slight that anyone will have the illness. If, however, you are one of the few with the disease it is obviously better to find out now before there are any complications.

Some of you may feel that not enough has been done about this problem, but I can assure you that a great deal is being done and that advice and help is being sought from experts all over the world. We were very lucky that the agricultural team who were here recently alerted us to the extent of the problem and helped to get things moving so that a start could be made to clear the Islands of this thing once and for all. But you know any programme will not work without the help of everyone in the Islands, we are all involved, every man, woman and child, whether in Stanley or the Camp. WE must all obey the rules which will make the programme a success.

Shortly you will be receiving from the Hydatid Committee some leaflets telling you about the disease and what you must do about it. I hope you will read these and take heed of their message. In the near future there should be no new cases of human hydatid disease in the colony. It is up to you.

HYDATID STATISTICS

O. J. Agre. P. ep. w.r.t. yr. minute p. 18 A, which has reached me very late & my therefore have been overtaken by events. In any case I am 100% entirely certain of what it means.

J. H. K. / -

(3)
A.C.S. I am having difficulty in discovering when & by whom the decision referred to in O. J. Agre's minute p. 18 A (which has only just reached me) was arrived at. Can you elucidate?

J. H. K. / -

O/c Agri

I have discussed with C.S. it was previously agreed between us that the information shd. be regarded as confidential in so far as issuing the source figures to all farms, but C.S. is of the opinion that full facts shd. be made available to the Committee. Can you now arrange for that to be done?

J. 16-4-71

C.S. There are still one or two certificates to come in from the bank for the April Daring period. I will then be in a position to get circulation of the date figures to Hygiene Committee.

J. 16-4-71.

Rec. 8. 5. 71

23

Dr. Payne.

One again, if it is feasible it might be
useful for the statistics at b.o.f. to be set out in the form
of a running schedule (using the paper's length instead of width)
so that one can see at times a week or fortnight.

J
17+

C.S.

we discussed. Quarterly statistics now
at b.o.f. There are still a few certificates
to come in from camp relating to the
April doing. Doing from these forms has
been confirmed by telegram but the actual
certificates contain the figures for the examination
of April.
