The Hon. Col. Secy.,

The hot-water system at the gaol never has been satisfactory. The boiler and pipes are worn out, also the radiators are not suitable for the work required.

2. I have prepared plans for a new system - tracing herewith. This apparatus, if installed, would adequately heat the gaol throughout and keep it aired and dry.

The estimated cost is:-

Boiler, pipes, radiators, etc. c. i. f. Stanley. £101.
(From Messrs Jeffery & Co, London)

Boiler house and trench, inc. labourer's wages. £84

Unforeseen..... £15.

£200.

Labour of mason, carpenter and blacksmith has not been included as they are on the Establishment - estimated cost £27

The Hon. Col. Secy.,

Noted.

2. The new Police Station and the Exchange have now been included in the heating system and a new drawing has been made. The tracing of heating system, dated 25/8/27, has been withdrawn and replaced with tracings of drawings No. 90 and No. 90A.

No. 90 is a plan of the heating system.

No. 90A is a general plan of the gaol, etc.

In the event of an indent being forwarded to the Crown Agents for a heating appliance, both tracings will, I think, require to accompany the indent.

3. The estimated cost, excluding walls and roof of the boiler house (this is included in the new Police Station, M.P.455/27), also wages of mason, carpenter and blacksmith, who are on the permanent establishment, is as follows:-

To boiler, pipes, radiators and grating, etc., c.i.f. Stanley £137.

To excavating and soil and building concrete walls for stoke-hold and the trench in the gaol, and all work below ground level..... 63.

To unforeseen..... 10.

Sir,
I wish to bring to your notice the bad condition of the heating apparatus of the Prison. It is very old and in constant repair.

This system was discarded from Government House as unserviceable in 1902, and was installed in the Prison in April 1904.

The Col Engineer is aware of the condition of the system.
