"With reference to my telegram of the 3rd of November last, I have the honour to inform you that it was my privilege to take part in the Ceremony at the Cenotaph in connection with the celebration of Armistice Day, and to lay a wreath at the foot of the Cenotaph on behalf of the Governments and Peoples of the Colonies and Protectorates.

2. A marked feature of the celebration on this occasion was the sale of Flanders poppies in aid of Earl Haig's Fund for distressed ex-service men. I felt that those whom I had the honour to represent would desire to be associated with this effort. The Crown Agents were accordingly authorised to obtain a supply of these emblems for inclusion in the wreath and to make a contribution of £5. 5. 0., to the Fund; the entire expenses involved being apportioned as on the occasion of the Unveiling of the Cenotaph.

3. The wreath was photographed by the London Stereoscopic Company, Limited, from whom copies can be obtained if desired at a cost of 7s. 6d. each."

IMPERIAL INSTITUTE.

of the

UNITED KINGDOM, AND THE COLONIES AND INDIA,

Report on "Guano" from the Falkland Islands.

The Guano from Kidney Island which is the subject of this report was forwarded by the Government Geologist, and was received at the Imperial Institute in November, 1921.

DESCRIPTION.

The samples were labeled as follows :-

- No. 1. "From sampling site A, 3—4 ft. down in the deposit." Weight 14 lbs.
- No. 2. "From sampling site B, 2—3 ft. down in the deposit." Weight 23 lbs.
- No. 3. "From sampling site C, 1st foot down in the deposit." Weight 22 lbs.
- No. 4. "From sampling site D, 1st foot down in the deposit." Weight 16 lbs.
- No. 5. "From sampling site E, 1—3 ft. down in the deposit." Weight 34 lbs.

These five products all consisted of dark brown guano in a very moist condition.

- No. 6. "Liquid percolating through deposit at sampling site B, 2—3 ft. down. Weight 14 lbs. This was a brown aqueous liquid.

RESULTS OF EXAMINATION.

The five guanos were examined with the following results :-

	No. 1. per cent	No. 2. per cent	No. 3. per cent	No. 4. per cent	No. 5. per cent
Moisture on drying at 105°C	78.25	49.38	80.09	77.87	56.66
Additional loss on ignition	19.56	7.25	16.16	20.43	41.64
Ash	2.19	43.37	3.75	1.70	1.70

Chemical analysis of the materials gave the following results, which are expressed in each case on the guano as received.

		No. 1. per cent	No. 2. per cent	No. 3. per cent	No. 4. per cent	No. 5. per cent
Lime	CaO	0.52	0.25	1.21	0.25	0.13
Magnesia	MgO	0.16	0.13	0.55	0.13	0.11
Phosphoric Acid	P ₂ O ₅	0.16	0.19	1.74	0.18	0.09
consisting of :-						
Portion soluble in 2 per cent citric acid solution *		0.16	0.07	1.60	0.18	0.071
Portion insoluble in 2 per cent citric acid solution		nil	0.02	0.02	nil	0.019
Nitrogen	N	0.808	0.488	0.62	1.03	0.434
consisting of :-						
Portion present in organic form		0.696	0.429	0.51	0.82	0.428
Portion present as ammonium salts		0.104	0.055	0.04	0.19	nil
Portion present as nitrates		0.008	0.004	0.07	0.02	0.006
* Including phosphoric acid (P ₂ O ₅) soluble in water		0.09	0.02	0.92	0.17	0.064

The liquid (No. 6) from sampling site B was found to consist of water containing 0.66 per cent of total solids which consisted largely of soluble phosphates.

REMARKS.

These guanos are very similar in composition to the two previous samples from Kidney Island which were dealt with in Imperial Institute report of the 10th March, 1914. If the guanos were dried until only 20 per cent of moisture remained, they would contain the amounts of manurial constituents shown in the following table, to which corresponding figures for typical Peruvian guanos are added for purposes of comparison :-

Falkland Islands.	Phosphoric Acid. P ₂ O ₅ per cent	Nitrogen N per cent	Moisture per cent
Present sample No. 1.	0.59	2.97	20
" " " 2.	0.14	1.09	20
" " " 3.	6.99	2.49	20
" " " 4.	0.65	3.73	20
" " " 5.	0.16	0.80	20
Peruvian guanos :-			
Labos de afuera Is.	16.70	3.70	19.60
Guanape Is.	12.25	11.00	25.88
Ballestas Is.	12.23	12.50	14.87

From these figures it will be seen that the present samples from Kidney Island are very inferior to good Peruvian guanos in respect of the amounts of nitrogen and phosphoric acid which they contain. The water (sample No. 6) percolating through the guano deposit at site B was found to contain soluble phosphates and it seems likely that the inferior quality of the guano may be due to prolonged leaching by rain water.

The present materials, if shipped in the condition in which they were received at the Imperial Institute would in no case be worth as much as £1 per ton delivered in the United Kingdom. If however facilities could be arranged for drying the guano in the Falkland Islands it would be possible to prepare a partially dried material from guanos Nos. 1, 3, 4 and 5, which could be used as an organic filling material in the manufacture of compound manures, and would be of somewhat higher value. Guano No. 2 would not be suitable for use in this way as it contains little organic matter.

UNITED KINGDOM, AND THE COLONIES AND INDIA.

Report on "Sand" from the Falkland Islands.

The sand from Kidney Island which is the subject of this report was forwarded by the Government Geologist and was received at the Imperial Institute in November, 1921.

DESCRIPTION.

The sample weighed 1 lb. and consisted of rounded grains of quartz of uniform size, together with very small quantities of garnet, felspar and hornblende. Some of the quartz grains showed inclusions of rutile.

RESULTS OF EXAMINATION.

The sand was chemically examined with the following results :-

		Per cent
Silica	SiO ₂	97.43
Ferric oxide	Fe ₂ O ₃	0.12
Alumina	Al ₂ O ₃	1.08
Titanium dioxide	TiO ₂	0.11
Lime	CaO	0.15
Magnesia	MgO	0.05
Potash	K ₂ O	0.14
Soda	Na ₂ O	0.22
* Potassium chloride	KCl	0.017
* Sodium chloride	NaCl	0.08
Zirconia	ZrO ₂	0.005
Loss on ignition		0.45

* Soluble in water.

The sand was subjected to mechanical analysis and found to consist of the following portions:-

	Per cent
Portion retained on a 30-mesh sieve *	0.02
" passing a 30-mesh sieve and retained on a 60-mesh sieve	13.68
" " " 60 " " " " " " " 90 " "	85.36
" " " 90 " " " " " " " 120 " "	0.90
" " " 120 " "	0.04

* i.e. a sieve having 30 meshes to the linear inch.

REMARKS.

This sand contains rather too much iron to be used for the manufacture of the best quality of glass. It could however be employed for the production of glass-ware of medium quality, for which purpose it would be quite satisfactory, in view of its general characters and the large proportion of grains of suitable size.

Annual Medical Report on the Falkland Islands and its Dependencies for the year, 1921.

A. FALKLAND ISLANDS.

(1) General.

Prevalence of Sickness. The place continues to maintain a very high position from a health point of view, there having been no epidemic of any infectious or contagious disease during the year ending 1921. The high winds that prevail are undoubtedly the purifying agent at work, which coupled with rapid atmospheric changes does not appear to be favourable to bacterial development, as virulent sepsis is practically never met with.

(2) Sanitation.

The sanitary state of Stanley is not good; repeated reports have been made on the absence of any proper drainage system, water supply, and the condition of roads, etc., etc. The primitive sanitary conditions that exist in the camp were reported on as being in a satisfactory state but the absence of up-to-date sanitation in these isolated places does not menace the general Public health. The Assistant Colonial Surgeon paid visits of inspection to the different stations in the East Falkland Camp during the year.

(3) Schoolchildren.

Only one of the schoolchildren attending the Government school has been operated upon for tonsils and adenoids; this boy's parents have remarked upon the great improvement which has followed the operation. Parents are not as a rule aware of the bad effect of tonsils and adenoids upon the general health, and intellectual development of their children; and this would be more apparent here if a higher standard of education was available.

THE GOVERNMENT SAVINGS BANK.

(Ordinance No. 1 of 1888).

23. A copy of the annual report on the Government Savings Bank for the year of account ended 30th September, 1921, is furnished in the attached returns. On the 31st December, the amount standing to the credit of the various depositors in the bank amounted to £128,402 : 11 : 1, of which £115,766 : 4 : 2, was invested, leaving an uninvested balance at the end of the year of £12,636 : 6 : 11. The Savings Bank Depreciation Fund amounted to £5,551 : 8 : 9 on the 31st December, of which £2,399 : 7 : 5 was uninvested.

THE CURRENCY NOTE FUNDS.

(Note Order 1899).

24. A copy of the annual report on the transactions of the Commissioners of Currency for the year ended 31st December, 1921, is also included in the returns furnished herewith. At the end of the year the Face Value of the notes in circulation amounted to £20,000. The Investment Portion of the Fund amounted to £12,000, and was fully invested, as well as the Note Depreciation Fund which amounted to £1,000. At the end of the year the Coin Portion of the Fund held by the Commissioners amounted to £8,000.

THE FINANCIAL POSITION OF THE COLONY.

(Colonial Regulation 344).

25. Most of the moneys forming the capital funds of the Colony have from time to time been invested in stocks and other securities which have greatly depreciated in value since the War. In order to arrive more or less at the real value of such funds ample deduction should be made from their previous value, or the cost price of the securities held, on account of such depreciation; the depreciation in the market value of such securities is more or less a direct charge against the revenue of the Colony.

26. In accordance with the provisions of Colonial Regulation 344, the Surplus Balances of the Colony amounted to £312,996 : 17 : 11, at the end of the year, viz :-

Land Sales Fund	- -	£167,277 : 15 : 7.
Research Fund	- -	72,952 : 4 : 5.
General Account :-		
Falklands	- -	59,719 : 10 : 5.
Dependencies	- -	13,047 : 7 : 6.
		£312,996 : 17 : 11.

27. At the end of the year, the depreciation in the market value of the "Investment Portion" of the Savings Bank was £27,570, which less the estimated value of the Savings Bank Depreciation Fund of £5,643, leaves an estimated net depreciation in Savings Bank capital of £21,927.

28. The Land Sales has no Depreciation Fund, but the estimated depreciation in the market value of the Securities held on behalf of the Land Sales Fund at the end of the year was £34,821.

29. At the end of the year, the depreciation in the market value of the Currency Commissioners' "Investment Fund" was estimated at £1,719, which less the estimated value of the "Depreciation Fund" of £869, leaves an estimated net depreciation of £850.

30. As the only investments made on behalf of the Research Fund were in the purchase of Treasury Bills, no depreciation in value was incurred. The sum total of the above mentioned estimated depreciation in capital amounts to £57,598, viz :-

Land Sales Fund	- -	£34,821 : 0 : 0.	
Savings Bank	- -	21,927 : 0 : 0.	
Currency Commissioners	- -	850 : 0 : 0.	
			£57,598 : 0 : 0.

31. If therefore this sum of £57,598, is deducted from the Surplus of accumulated revenue shewn in paragraph 26 above as amounting to £59,719 : 10 : 5, and standing to the credit of the Falkland Islands, in General Account of the Colony, the Surplus of the Colony's Assets over Liabilities at the end of the year would amount to £255,398 : 17 : 11, viz:-

Land Sales Fund	- -	£167,277 : 15 : 7.
Research Fund	- -	72,952 : 4 : 5.
General Account :-		
Falklands	- -	2,121 : 10 : 5.
Dependencies	- -	13,047 : 7 : 6.
		£255,398 : 17 : 11.

32. Included with the returns submitted herewith is a Comparative Statement of the estimated and actual revenue and expenditure under the various heads, and a Statement of the Assets and Liabilities of the Colony on the 31st December, 1921, prepared in accordance with paragraphs 25—31 of this report.

I have the honour to be

Sir,

Your obedient servant,

(Sgd) W. A. THOMPSON,
Colonial Treasurer.

FALKLAND ISLANDS.

Ordinance No. 3 of 1922.

I ASSENT,

J. MIDDLETON,
Governor.

25th August, 1922.

An Ordinance

To secure the Reciprocal Enforcement of judgments obtained in superior courts in this Colony, the United Kingdom and other parts of His Majesty's Dominions or territories under His Majesty's protection.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands, with the advice and consent of the Legislative Council thereof, as follows:—

Short Title.

1. This Ordinance may be cited as the "Reciprocal Enforcement of Judgments Ordinance, 1922."

Enforcement in Colony of Judgments obtained in the United Kingdom.

2. (1) Where a judgment has been obtained in a superior court in the United Kingdom, the judgment creditor may apply to the Supreme Court of the Colony at any time within twelve months after the date of the judgment, or such longer period as may be allowed by the court, to have the judgment registered in the court,

and on any such application the court may, if in all the circumstances of the case they think it is just and convenient that the judgment should be enforced in the Colony, and subject to the provisions of this section, order the judgment to be registered accordingly.

(2) No judgment shall be ordered to be registered under this section if—

- (a) the original court acted without jurisdiction, or
- (b) the judgment debtor, being a person who was neither carrying on business nor ordinarily resident within the jurisdiction of the original court, did not voluntarily appear or otherwise submit or agree to submit to the jurisdiction of that court; or
- (c) the judgment debtor, being the defendant in the proceedings, was not duly served with the process of the original court and did not appear, notwithstanding that he was ordinarily resident or was carrying on business within the jurisdiction of that court or agreed to submit to the jurisdiction of that court; or
- (d) the judgment was obtained by fraud; or
- (e) the judgment debtor satisfies the registering court either that an appeal is pending, or that he is entitled and intends to appeal, against the judgment; or
- (f) the judgment was in respect of a cause of action which for reasons of public policy or for some other similar reason could not have been entertained by the registering court.

(3) Where a judgment is registered under this section:—

- (a) the judgment shall, as from the date of registration be of the same force and effect, and proceedings may be taken thereon, as if it had been a judgment originally obtained or entered up on the date of registration in the registering court;
- (b) the registering court shall have the same control and jurisdiction over the judgment as it has over similar judgments given by itself, but in so far only as relates to execution under this section;
- (c) the reasonable costs of and incidental to the registration of the judgment (including the costs of obtaining a certified copy thereof from the original court and of the application for registration) shall be recoverable in like manner as if they were sums payable under the judgment.

(4) Rules of court shall provide:—

- (a) for service on the judgment debtor of notice of the registration of a judgment under this section; and
- (b) for enabling the registering court on an application by the judgment debtor to set aside the registration of a judgment under this section on such terms as the court thinks fit; and
- (c) for suspending the execution of a judgment registered under this section until the expiration of the period during which the judgment debtor may apply to have the registration set aside.

(5) In any action brought in any court in the Colony on any judgment which might be ordered to be registered under this section, the plaintiff shall not be entitled to recover any costs of the action unless an application to register the judgment under this section has previously been refused, or unless the court otherwise orders.

Issue of certificates of judgments obtained in the Colony.

3. Where a judgment has been obtained in the Supreme Court of the Colony against any person, the court shall, on an application made by the judgment creditor and on proof that the judgment debtor is resident in the United Kingdom, issue to the judgment creditor a certified copy of the judgment.

Power to make rules.

4. Provision may be made by rules of court for regulating the practice and procedure, (including scales of fees and evidence), in respect of proceedings of any kind under this Ordinance.

Interpretation.

5. (1) In this Ordinance, unless the context otherwise requires:—

The expression "judgment" means any judgment or order given or made by a court in any civil proceedings, whether before or after the passing of this Ordinance, whereby any sum of money is made payable, and includes an award in proceedings on an arbitration if the award has, in pursuance of the law in force in the place where it was made, become enforceable in the same manner as a judgment given by a court in that place.

The expression "original court" in relation to any judgment means the court by which the judgment was given.

The expression "registering court" in relation to any judgment means the court by which the judgment was registered.

The expression "judgment creditor" means the person by whom the judgment was obtained, and includes the successors and assigns of that person.

The expression "judgment debtor" means the person against whom the judgment was given, and includes any person against whom the judgment is enforceable in the place where it was given.

(2) Subject to rules of court, any of the powers conferred by this Ordinance on any court may be exercised by a judge of the court.

Extent of Ordinance.

6. (1) Where the Governor is satisfied that reciprocal provisions have been made by the legislature of any part of His Majesty's dominions outside the United Kingdom for the enforcement within that part of His dominions of judgments obtained in the Supreme Court of this Colony, the Governor may by Proclamation under his hand declare that this Ordinance shall extend to judgments obtained in a superior court in that part of His Majesty's dominions in like manner as it extends to judgments obtained in a superior court in the United Kingdom and on any such Proclamation being made this Ordinance shall extend accordingly.

(2) For the purposes of this section the expression "part of His Majesty's Dominions outside the United Kingdom" shall be deemed to include any territory which is under His Majesty's protection or in respect of which a mandate is being exercised by the Government of any part of His Majesty's dominions.

(3) A Proclamation made by the Governor under this section may be varied or revoked by a subsequent Proclamation.

Passed by the Legislative Council this 11th day of August, 1922.

W. BARLAS,
Acting Clerk of the Legislative Council.

Assented to by the Governor and given under the Public Seal of the Colony this 25th day of August, 1922.

APPENDIX.

Darwin Harbour,
6th February, 1922.

Sir,

I have the honour to furnish the attendance statistics of the children taught in the Falkland Islands Company's Camp for the years 1920, 1921.

The Company have maintained a small school at Darwin their chief station, for over fifty years, which has always had as teacher a certificated master.

For the year 1921 there is nothing outstanding to report, elementary subjects only having been taught, but it is hoped to form a Junior class in Algebra and Latin for the present session.

For the outlying shepherds' houses they provide two camp teachers, one of whom has been a pupil teacher in Scotland.

The camp teacher mentioned, Thomas Goodwin, takes the Darwin section, while the other, James H. Watson, takes the North Arm, while they divide Walker Creek between them giving instruction to some eighteen families.

With this staff, small as it is, much might be done if there were some goal to press forward to, some avenues opened by which there might come advancement.

Occasionally a boy has gone forth equipped with such a grounding in Mathematics and Latin, as has enabled him to take his place creditably alongside his compeers in the educational arenas of home, but for the majority there is only the occupation of the shepherd or the labourer to look forward to—and so Cui bono ?

Boys are withdrawn from school as soon as they reach a wage-earning age, and the teacher cannot detain them by holding before their vision better prospects in life.

Yet the material is similar to that in the north-eastern counties of Scotland, where the goal of the boy of parts is the University—a great lamp illuminating these far off hills and valleys. The village schoolmasters are all university graduates, and from their schools lies a straight road to college. Poverty is no barrier. Father, mother, brothers and sisters make heavy sacrifices to help forward the student of their family, and these sacrifices are made with the utmost cheerfulness.

In any sphere of life however, even an elementary education is a valuable asset, and if parents could be got to realise this, they would do their utmost to co-operate with each other, and their teachers, so that children might get as much time and attention devoted to them, as is possible under the present system. Where houses are within easy reach grown up children could ride or even walk to and fro. In Scotland children think nothing of walking three or four miles to school. The harder the path, the more difficult the attainment of knowledge, the more prized will it be in after life. "There is no royal road."

I am, etc.,

(Sgd.) ALEX MOIR, M.A.

Schoolmaster.

The Colonial Secretary,
Stanley.

Power of Companies incorporated outside the Colony.

II. GENERAL PRINCIPLES OF PARTNERSHIP.

7. (1) Partnership is the relation which subsists between persons carrying on a business in common with a view of profit.

Nature of Partnership.

(2) But the relation between members of any company or association which is;

- (a) Registered as a Company under this Ordinance or any other Ordinance for the time being in force relating to the registration of joint stock companies; or
- (b) Formed or incorporated by or in pursuance of any other Ordinance of the Colony or letters patent, or Royal Charter;

is not a partnership within the meaning of this Ordinance.

- New partners. 8. A new partner cannot be introduced to the partnership without the consent of all the partners. The consent of the majority will not suffice.
- Sub-partners. 9. One partner may take a sub-partner to participate in his share of the partnership but such sub-partner is not a partner in the partnership.
- In case of fraud. 10. The contract is essentially one of good faith among the partners both in its beginning and its progress and it can be set aside at any time on fraud being established.
- Maximum number of partners. 11. The number of partners in a private partnership shall not exceed twenty.
- Infant may become partner. 12. An infant may be a partner but under the law with regard to infants he is not responsible for the debts of the partnership if he repudiates his liability on coming of age.
- In case of lunacy. 13. (1) If a partner was a lunatic at the time of entering into the contract and the fact was concealed from any of the partners the fraud will be a sufficient ground for setting aside the contract.
- (2) If the lunacy was known to the other partners they cannot afterwards set aside the contract on that ground but it may at any time be set aside by those acting for the lunatic.
- (3) If the contract has been entered into by the lunatic in a lucid moment and is a transaction in good faith as regards the other partners any supervening lunacy will not invalidate the right of the lunatic to his share of the profits and his property will be subject to the debts of the partnership.
- (4) If a partner sane at the time of entering into the contract shall become insane during the partnership it shall be at the option of the remaining partners to continue the partnership according to the terms of the contract or to dissolve the partnership.
- Married woman may become partner. 14. A married woman may with the consent of her husband enter into a contract of partnership and when such consent has been given by the husband signing the articles of partnership the wife shall be entitled to act as a *feme sole* with regard to the partnership.
- Undertaking must be lawful but may be of a general nature. 15. The undertaking into which the partners enter must be a lawful one but need not be any particular business as a valid partnership may be constituted for purposes of a general nature to speculate in any way which may appear to offer profit.
- Partner to share in profits. 16. The partnership must be for the purpose of making profit in which each of the partners shall have a share.
- Participation in profits. 17. It is not necessary that each partner actually participate in the profits whatever amount of profit may be made because a partner may validly stipulate on account of the greater share of the fund which he advances that one or more of the partners shall not receive anything unless a certain amount of profit has been made. It is enough that each partner shall have a fair chance of making profit and that the conditions of the contract are not manifestly unjust.
- Losses to be borne mutually. 18. The partners in the contract of partnership bear the loss mutually if they fail to make profit and incur loss but it shall not be unlawful for a partner to stipulate as between himself and the other partners that he shall not be liable to contribute to the loss.

19. The shares in the profit and the proportion of responsibility for loss may be equal or unequal according to the agreement of the partners or *pro rata* according to the amount each has contributed to the common fund but where no stipulation has been made and there is no guide to the intention of parties the shares in the profit and loss shall be taken to be equal.

Shares in profit and loss.

20. While partners share in profit and are liable for loss a mere participation in profits does not necessarily make the participator a partner. A manager or servant of a partnership may have a share in the profits as his wages and yet not be a partner.

Share in profits without being a partner.

21. The mere fact that the participator in the profits is the manager or servant of the partnership does not necessarily exclude him from a being a partner. The fact whether he is a partner or not depends upon the intention of parties when he was admitted to share profits and must be judged of according to the facts and circumstances of each case.

Proof of partnership.

22. The advance of money by way of loan upon a contract in writing to receive a rate of interest varying with the profits or even a share of the profits will not of itself make the lender a partner. A widow or child of a partner may receive a portion of profits by way of annuity without incurring liability for the debts of the partnership. The vendor of the goodwill of a business may receive a portion of the profits in consideration of the sale without being subject to the liabilities of a partner.

Persons may participate in profits without being liable as partners.

III.—PRIVATE PARTNERSHIP WHERE THE LIABILITY OF THE MEMBERS IS UNLIMITED.

(i) *The partnership property.*

23. The fund which the partners contribute or as it is commonly called the capital of the partnership need not necessarily consist of money. One may contribute his skill or his labour or goods or real estate or the goodwill of a business and generally it may be said that anything which the partners themselves consider to have value may be contributed to the common fund.

What may constitute capital.

24. Where the contribution of the partner is labour or skill or something which bears no ratable proportion to the money supplied by others it is the more necessary that the share of the profits to which each partner is entitled should be fixed at the time of making the contract. If no proportion is fixed the contributor of the skill or labour shall be entitled to receive profits in proportion to the smallest sum of money advanced by the other partners.

Where labour or skill is contributed.

25. No partnership in which the common fund or capital exceeds the value of one hundred pounds sterling and the duration of the contract exceeds or by the nature of the engagement must exceed twelve months can be pleaded or proved in actions between the partners themselves unless the contract has been embodied in articles of partnership. If a partner has been admitted subsequent to the articles his admission may be proved by letters writings or facts and circumstances.

Where capital exceeds one hundred pounds or duration of contract exceeds twelve months.

26. Existing partnerships shall until their termination be subject to the rules of the law anterior to this Ordinance as regards the necessity of articles but all future contracts of partnerships shall with the exception aforesaid be embodied in articles of partnership.

As to existing partnerships.

Limited partners may be responsible as Ordinary partners in certain cases.

27. If those who are not partners at all or who may be limited partners only hold themselves out to others as ordinary partners and in this manner cause them to enter into contracts or make advances or sell goods on credit or in any other way to become creditors the individuals who so represent themselves shall be held bound by their representations.

Liability of dormant partners.

28. A person who enters into a partnership without notification and continues in it for the purpose of sharing in the profit as a dormant partner shall be liable to creditors during the time he remained a partner in the same manner as an ordinary partner.

Partnership property.

29. The whole property real and personal original and acquired of the partners as a whole in connection with the partnership shall be held as belonging to the partnership under the firm name style title or designation and the partnership to that effect shall be regarded as a juridical person and it shall be capable of sustaining the relation of creditor and have the right to sue and of sustaining the relation of debtor and the liability to be sued each partner having a contingent right to his share of the property when the debts shall be paid and the property divided but having no right while the partnership lasts to dispose of the property except for partnership purposes and on the other hand each partner remaining liable for the debts of the partnership.

Partnership may be sued in name of firm.

30. The partnership itself may be lawfully sued by entering as the name of the defendant the firm name style title or designation under which the partnership conducts its ordinary business and a writ left at the ordinary place of business of such partnership or with a manager clerk shopman operative or servant therein or delivered personally to any one partner shall be a sufficient service upon the said partnership and upon the individual partners thereof and judgment may be given thereon which shall be a good judgment against the partnership as in the case of any ordinary defendant to an action.

Partnership may sue in name of firm.

31. The partnership may sue under the firm name style title or designation by which it conducts its ordinary business without requiring to insert as a plaintiff the name of any individual partner and a judgment obtained in any action in which the writ shall be so sued out shall be a good judgment and may be enforced by all the remedies competent to an ordinary plaintiff.

Real estate may form capital.

32. Real estate may form part of the capital of a partnership.

Liabilities thereof.

33. The real property may form part of the partnership property although the title may be in name of one or more of the partners and be liable for the debts of the company or be treated as personalty on the death of a partner.

Real property not necessarily partnership property.

34. On the other hand land may be contributed to the partnership fund not as a portion of the capital but simply for the purpose of cultivation or pasturage the property remaining in the individual partner and the use solely belonging to the partnership.

Titles to land may be taken and transferred in name of partnership.

35. Titles to land may be taken in the name of the partnership under its ordinary name style title or designation and a transfer of the same may be validly made under the firm name style title or designation when subscribed to the transfer by one of the partners. Mortgages and encumbrances may be granted and created in the same manner and the transfers mortgages or encumbrances shall when so subscribed be held to have been done with consent of all the partners.

36. The partnership property must first be applied to the payment of partnership debts and each partner has a right to have the same so applied before any individual partner or his creditors or representatives can claim any right therein.

Property to be applied to the payment of debts.

37. Each partner has a claim on the partnership property for all funds advanced by him and the partnership has also a claim for the repayment to the partnership of whatever has been taken by one partner beyond his share.

Where partners may claim individually &c.

38. No creditor of an individual partner can acquire any right title or interest in the partnership property even as the consequence of a judgment except for so much as belongs to the partner after all claims on the partnership as a whole are deducted and satisfied and the mode of putting any such judgment in force shall be by attachment of the partner's share of profit and property and not by seizure and sale.

Claims against individual partners.

(ii) *Powers and authorities of partners.*

39. Each partner is *præpositus negotiis societatis* and while the stipulations in the articles of partnership bind the partners *inter sese* in regard to the extent of their powers as regard the public each partner can bind the partnership by his acts in relation to the partnership business. This however is subject to the limitation that it must be in relation to the partnership business as ordinarily conducted because one partner has no authority to bind his co-partners to obligations which both he and the persons with whom he dealt must have known to be beyond the ordinary scope of the business and of the powers ordinarily exercised by partners.

Partner may bind partnership in relation to its ordinary business.

40. In ordinary trading partnerships the buying and selling of goods the drawing accepting and indorsing of bills the granting of cheques upon the partnership bank account the borrowing of money within ordinary limits for trade purposes the granting of receipts the ordering of insurances the payment of debts the granting of Custom House bonds and the pledging of partnership property for partnership purposes are all within the scope of the agency entrusted to each partner.

Ordinary trading transactions may be entered into by any partner.

41. In partnerships where it is part of the ordinary business to grant warranties or guarantees the guarantee of one partner shall bind the whole but where that is not the ordinary course of the business of the partnership the holder of the guarantee will require to prove that it was done with the consent of the firm.

With regard to the granting of warranties &c.

42. One partner has no authority to refer a matter in dispute to arbitration in name of the partnership without their consent.

Reference of dispute.

43. Contracts will not bind the partnership which have been made by one partner with a party who has knowledge or notice that the partner is acting beyond his powers or in fraud of the firm.

Contracts not binding in certain cases.

44. Where a partner gives a bill or acceptance or indorsement of the firm in payment of his private debt the firm will not be bound to the person accepting such a payment unless he can prove that the partner was authorised or otherwise establishes the *bona fides* of the transaction. If the bill is in the hands of third holders the partnership shall be liable unless the circumstances show that the holder was aware of the nature of the transaction.

Acceptance of the firm given for a private debt.

45. Where money has been raised by one partner upon the faith of the partnership signature and such partner applies the money to his own private debt the firm will be bound when the party advancing the money had no knowledge of the object to which it was to be applied.

Application of partnership money to private use.

- Application of partnership securities. 46. The same rules will apply to the application of the securities or property real or personal of the firm in payment of the private debt of a partner.
- Where money has been advanced to individual partner. 47. Where money has been advanced to a partner upon his individual credit and responsibility although the money be paid into the firm account and employed for partnership purposes the person making the advance must go against the individual partner who obtained it upon his own credit.
- Responsibilities of new partner. 48. A new partner by joining an old firm shall make himself liable like the other partners for the debts of the firm.
- Where a partner is accepted as debtor in place of firm. 49. Where a partnership has been originally liable for a debt and the creditor by arrangement accepts one of the partners as his debtor in place of the partnership such acceptance will extinguish the debt against the firm.
- Where retiring partner ceases to be responsible. 50. If a creditor in like manner continues to accept of the partnership as the debtor after the retirement of a partner has been duly notified to him the responsibility of the retiring partner ceases.
- Notice of discharge of partner from responsibility to be given to creditor. 51. But as the principal of the discharge which is here assumed is that the creditor had notice of the partnership in its altered condition and accepted it as his debtor there must be no doubt of the notice which ought to be both personal and public in the manner set forth in a subsequent section the latter form being sufficient intimation to those who have subsequent dealings with the firm that the partner has retired and the former being necessary in the case of the actual creditors of the firm at the date of retirement.
- Liability for torts. 52. (1) The partnership is liable for torts committed by the partners or the servants of the partnership in the course of carrying on partnership business.
- For frauds. (2) The partnership is liable if one of the partners fraudulently disposes of property consigned to the custody and care of the partnership.
- For injuries to persons or goods. (3) The partnership is liable for injuries to persons or goods caused by the want of care or want of skill of the partners or servants of the firm in the carrying on of the ordinary business of the firm.
- For slander. (4) A partnership of publishers shall be liable for the printing and publishing of a slander by the firm on the authority of one of the partners in the course of the business of the firm.
- For frauds on the revenue. (5) The partnership will be liable for frauds committed on the revenue by one of the partners in conducting the business of the firm.

For false representations.

56. If a partner makes any private stipulations with third persons for bonuses or premiums for himself in connection with the business of the partnership he must account therefor to the partnership.

Rule as to bonuses etc.

57. (1) A partner cannot enter into any other business or engagement which will interfere with the proper performance of his partnership duties.

Inability of partner in certain cases.

(2) Nor can he make purchase or sales on his private account which would interfere with the bargains of the firm or lessen their profit.

(3) A partner cannot enter upon any other undertaking which would give him a direct interest contrary to that of the partnership but the position must be one not merely of temptation to act in such a manner but an obvious antagonistic interest.

58. As one of the chief duties of the partners is to account faithfully to the partnership for all transactions it is absolutely necessary to keep business books in which everything done by each shall appear and be accounted for.

Books must be kept.

59. The withholding of accounts by one partner from the firm shall be of itself a presumption that fraud has been perpetrated or was intended.

Withholding of accounts presumption of fraud.

60. All the partners are entitled to know the full extent of the partnership affairs and to have free access to the books on all occasions unless they have intentionally limited their powers by the articles.

Access to books.

61. The articles shall state what sum each partner will be entitled to draw for his private expenditure and there may also be a stipulation that one or more shall receive a sum by way of salary before profits are estimated but unless this stipulation be clearly set forth the presumption will be against any salary being payable.

Salaries and private expenditure of partners.

(iv) *Articles of partnership.*

62. In this Ordinance (section twenty-five) it has been made necessary for all partnerships where the capital exceeds one hundred pounds sterling and the duration exceeds twelve months to be constituted by articles of partnership.

Articles of partnership.

63. It is not necessary to insert in articles of partnership the general principles applicable to all contracts of partnership but only such stipulations as without being stipulated would not be implied by law.

Stipulations to be inserted.

64. Agreements may be entered into to form a partnership which are not the partnership articles and should any of the partners fail to carry out the agreement it is hereby enacted that such preliminary agreements cannot be enforced so as to compel persons who are unwilling to enter into partnership but an action will lie for damages for breach of agreement wherever any of the parties had proceeded in fulfilment of it to contract engagements to realise funds or do any other act which involved pecuniary obligations or loss in virtue of the agreement.

Agreements to form partnership.

- Construction of articles. 65. The articles of partnership are construed like other contracts according to the intention of parties and they shall always be construed so as to defeat fraud and the taking by any partner of an unfair advantage over his co-partners.
- Variation of articles. 66. If partners do not faithfully observe the articles of partnership among themselves and a practice spring up on any points at variance with the articles it will not be competent for one partner thereafter suddenly to attempt to enforce the articles but the practice will be taken as a virtual alteration or repeal of the articles by consent of all. The articles may be varied during the partnership with consent of all the partners.
- Where a specific business is carried on. 67. When the partnership is entered into for the carrying on of a specific business the Supreme Court in the event of dispute shall construe strictly the description of the business set forth in the articles so that the partnership be not turned from its legitimate ends.
- Date of commencement. 68. The time for commencement of the partnership shall be carefully set forth. If no date is specified it will be held to commence from the date of the articles.
- Name of firm to be defined. 69. The name or style by which the firm is to be known shall be defined by the articles as it is under the common name that the partnership will not only carry on its transactions but also that under which it will sue or be sued. The name need not include any of the existing partners.
- Duration of partnership. 70. The articles shall set forth the duration of the partnership but whatever time be stated the death of a partner brings the partnership to an end unless there are stipulations to the contrary.
- Death of partner need not terminate partnership. 71. If the articles stipulate that the death of a partner shall not necessarily put an end to the partnership a clause may empower the representative of the deceased partner to carry on the business with the survivors for the benefit of the widow and children of the deceased partner and for the admission of one or more of the children as partners on their arrival at majority.
- Where interest is given to the widow. 72. If the interest in the partnership be given to the widow during her life and to the children after her death it is only the children who survive the mother who are entitled to a share.
- Disposition of share by will or otherwise. 73. The articles may empower the partners to provide by will or otherwise for the disposal of their share in the event of death. If the will leaves the executors the freedom of declining should they not consider it wise or expedient to continue the partnership the death of the party then puts an end to the partnership.
- Share of deceased partner. 74. The articles shall contain provisions for the manner in which the share of a deceased partner shall be estimated and paid should there be no intention to admit the representatives into business.
- One or more partners may conduct business. 75. It may be stipulated that one or more of the partners shall have the direction of the business of the company and these provisions will be enforced by the Supreme Court.
- As to secret manufactures. 76. There may be special cases where a partnership is formed for working some manufacture which is a secret and in such cases it will be competent for the partner who is in possession of the secret to make such stipulations as shall protect him in the working thereof.

77. The clauses in connection with the contribution of the capital shall bring to a money valuation such items as lands buildings book debts and other property which may be contributed in order that the capital account may be clearly set forth.

Computation of capital.

78. Provision shall be made for balances and division of profits.

Profits.

79. It may be provided to prevent future disputes that the accounts as agreed to at any particular time shall be conclusive but no such provision will bar an enquiry into fraud.

Accounts when agreed to be conclusive.

80. The mode of hiring and dismissing employees of the firm shall be provided for.

Employees.

81. The mode of permitting a partner to retire from the firm either with or without liberty to carry on the same trade and the purchase of his share by the firm or otherwise may be stipulated.

Retirement of partner.

82. The steps necessary to be taken upon dissolution the mode of winding-up and the settlement of controversies shall be provided for and it shall be competent for the partners to provide that any of their number may be expelled from the partnership should his conduct or pecuniary entanglements be such as to compromise the credit of the firm.

Dissolution and winding up.

(v) *Remedies against partners and third parties.*

83. (1) A partner may sue the partnership under the firm style name title or designation and the partnership may in like manner sue a partner for any matter or thing in relation to which a cause of action has arisen. Two firms may sue each other although some of the partners may be partners in both or any member of either firm may sue either or both.

Firms may sue and be sued.

(2) Third parties may sue the partnership and the partnership may sue third parties in the same way as ordinary plaintiffs may sue but when judgment has been given against the partnership the execution will not lie against the separate partners unless the firm has no effects. Where the judgment has to be enforced by imprisonment it will be competent to proceed against one or other of the partners at the choice of the holder of the judgment.

84. Where judgment has been given against a partner for a private debt the share of profit and share of partnership property belonging to such partner may be attached in the hands of the firm but it shall not be competent to proceed to seizure and sale of the property of the firm for the separate debt of a partner.

Private debts of partner.

85. The juridical person of the firm will be taken to be in existence after the active operations of the partnership have ceased or after the partners have entered into a new contract for all purposes connected with the receiving and paying the debts of the firm and generally for the purpose of winding up but for that only.

Existence of firm.

86. One partner may sue another for all matters or things unconnected with the partnership and even for matters arising out of the partnership if the interests of the firm are not necessarily involved.

One partner may sue another.

87. Any partner who has been denied access to the books or papers of the firm or who has reason to believe that one or more of the partners have made profit from the partnership without disclosing it may sue the firm for an account and this right extends to the

Denial of access to books.

executor administrators or representatives of a deceased partner. Such action may be sued without its being necessary to ask for a dissolution of the partnership but the Supreme Court may decree the dissolution should circumstances emerge during the enquiry which induce the belief that mutual concert and agreement between the parties is thenceforth impossible.

(vi) *Dissolution of partnership.*

Partnership may be dissolved.

88. A partnership may be dissolved by the act or consent of the partners or of some of them or by the judgment of a competent court or by the mere operation of law or by the extinction or completion of the thing in regard to which the partnership was formed or by the lapse of time for which it was originally contracted or by the death or bankruptcy of a partner.

Dissolution by consent.

89. All partnerships whether a period has been fixed for the termination of the contract or the duration is merely dependent on the will of the partners can be brought to an end by mutual consent the whole existence of the contract depending upon the consent of the parties who made it. A partnership which has no fixed term may be dissolved at the desire of either of the partners and even by acts which are inconsistent with the continuance of the partnership.

Must be publicly announced.

90. Although the original contract has been made by deed under seal it is not necessary that the dissolution be effected in the same way. The resolution to dissolve publicly announced as afterwards provided for will be sufficient.

Or decreed by the Court.

91. A partnership which is to endure for a stated period cannot be brought to an end by the mere will of one of the partners but any partner may apply to the Supreme Court for a dissolution on sufficient cause shown.

Partnerships at will.

92. When the term for which the partnership was originally formed has elapsed and no notice of dissolution has been given and no new articles of partnership entered into but the partners have continued the business without any change the association between them will be treated as a partnership at will under the same terms and conditions so far as applicable which are set forth in the original articles these for the purposes required by section twenty-six hereof being taken to be the articles of the continued partnership.

Court may end partnership on cause being shown.

93. (1) The causes for which a partnership may be brought to an end by the Court on the application of a partner although the fixed term has not elapsed are generally those which arise subsequently to the formation of the contract from the misconduct fraud or violation of duty of one or more of the partners.

(2) The misconduct or violation of duty must not be trivial or in regard to other relations of life unless they have a tendency to injure the credit or interfere with the business of the partnership.

(3) The Supreme Court may be applied to for a dissolution because of the impracticability of carrying out the partnership from a change of circumstances or a failure of expectations.

Insanity a cause.

94. It has already been provided in section thirteen sub-section four that supervening insanity of any partner may be a cause for dissolution at the choice of the partners. The insanity must be such as is likely to continue and not a merely temporary malady.

Also absence of partner.

95. The prolonged absence of a partner his residence out of the colony his change of domicile or engaging in pursuits incompatible with his duty to the partnership may all be good grounds for the dissolution of the partnership by a Court of law even where the term has not expired.

96. The partners may refer to arbitration the question of dissolution before the agreed on term and an award decreeing dissolution shall be a competent award and even where the question of dissolution has not been expressly referred if the differences between the partners have been referred and the arbitrators have awarded a dissolution that shall be a competent award. Question of dissolution may be referred.
97. The outlawry of a partner or his attainder for treason or felony operates as a dissolution of the partnership. Effect of outlawry &c.
98. A female partner marrying may continue as a partner but the husband shall have no right arising from his *jus mariti* or otherwise to interfere with the affairs of the firm but she shall act in the affairs of the partnership as a *feme sole*; but the marriage of a female partner during the tenure of the partnership may be a good ground for applying to the Supreme Court to decree a dissolution under the particular circumstances of the case. Effect of female partner marrying.
99. The voluntary assignment by one or more of the partners of all their right title and interest in the partnership property dissolves the partnership. Voluntary assignment.
100. The attachment of the profit and share of the property in the firm of one partner by a creditor may be a ground for a dissolution of the partnership but only by appealing to the Supreme Court to decree the dissolution. Attachment of profit and share of partner by creditor.
101. The bankruptcy of one or more of the partners acts as a dissolution of the contract as the whole property of the partner passes to the trustee in the bankruptcy and the bankrupt ceases to have the power of free action necessary to the discharge of his duties as partner. Bankruptcy of partner.
102. The death of a partner dissolves the partnership among all the survivors from the date of the death unless the contrary has been provided in the articles of partnership. Death of partner.
103. In all such cases of dissolution as the affairs of the firm must be wound up the partnership subsists for that purpose and that alone and the debts may be collected and paid in the name of the firm by the whole or some or one of the partners nominated for that purpose and the accounts adjusted. Winding-up.
104. The dissolution of the partnership does not change the rights of third parties in regard to liabilities due by the firm and they are entitled to be paid out of the partnership assets and where these are insufficient by the partners or the estate of a deceased partner. Where the partnership assets are insufficient it is not necessary for the creditors to sue each partner but the action will continue to lie against the firm under its ordinary name style title or designation until the winding-up is finished and judgment having been obtained and the partnership having no assets the judgment may be put in force against the individual partners. Rights of third parties in regard to liabilities.
105. In order that there may be no confusion between a partnership which is subsisting solely for the purpose of winding-up and one which is in actual operation the words "in liquidation" shall be added to the name of the firm in course of winding-up on its ordinary place of business and as the heading of all bills and demands made upon debtors and in all documents relating to the winding-up and in any legal proceedings instituted by or against the firm the like words shall be added to the ordinary name style title or designation according as the firm are plaintiffs or defendants. Partnership in liquidation.

Notice in cases of liquidation,

106. On the dissolution of a partnership it is necessary to give public notice to prevent partners being held liable as such for the acts of their co-partners after dissolution and it is hereby enacted that in addition to the words "in liquidation" being added to the name of the firm an advertisement in the Gazette and a notice of the dissolution published in the newspapers of the Colony shall be sufficient public notice within the Colony but creditors of the partnership are entitled to separate private notice by writing.

(vii) *Special provisions relating to dissolution by bankruptcy.*

Bankruptcy.

107. The partnership as a trader may apply to the adjudicated bankrupt on the same grounds as a sole trader or the partnership may be made bankrupt compulsorily by creditors in the same manner as a sole trader.

Firm adjudicated bankrupt.

108. The firm may apply to be adjudicated bankrupt without an adjudication being asked for against the individual partners and the creditors may apply for adjudication against the firm alone without seeking an adjudication against the individual partners.

Effect as against individual partners.

109. Where the firm applies to be adjudicated bankrupt without an adjudication against the individual partners any creditors of the requisite amount may apply for adjudication against the individual partners.

Partners may apply for adjudication.

110. Where creditors have applied for adjudication of bankruptcy against the firm and not against the individual partners it will be competent for the partners to make an application to have themselves adjudicated bankrupt.

Special adjudication against partners.

111. The creditors applying for adjudication of bankruptcy against the firm may apply for adjudication against one or more of the individual partners without applying for adjudication against the whole and one or more of the partners may apply for adjudication against themselves when that is competent without the whole having so applied.

Power of trustee in certain cases.

112. When adjudication of bankruptcy has been granted against the firm only either on the voluntary application of the firm or compulsorily at the instance of creditors without the individual partners being adjudged bankrupt and the trustee shall find either in the course of his investigations or at the conclusion thereof that the contributions required from any of the individual partners to pay the debts of the firm are greater than they can pay or provide for or if he has reason to believe that any individual partner is disposing of his separate property without awaiting the result of the investigation or is preparing to leave the Colony or in any way acting so as to prejudice the right of the creditors under the bankruptcy it shall be competent for the trustee to apply for an adjudication of bankruptcy against such partner or partners.

Bankruptcy of partner,—effect of.

113. Creditors cannot apply for an adjudication of bankruptcy against the firm for debts due by an individual partner but they may apply for the bankruptcy of the separate partner and if granted his bankruptcy operates as a dissolution of the partnership which may then be wound up either by the firm in liquidation or by an adjudication of bankruptcy against the firm should that be applied for in a competent manner.

Court may appoint same trustee.

114. Where adjudication of bankruptcy against the firm is accompanied or followed by adjudication against the individual partners the Court may appoint the same trustee to wind up the different estates where such a course shall appear best for all concerned.

115. Where there is a concurrent winding-up of the estate of the partnership and the separate estates of the partners it is not necessary for the trustee to await the completion of the winding-up of the partnership estate before he declares any dividend on the estate of the individual partners or *vice versa* should he be satisfied that there are sufficient funds in either estate to pay the deficiency on the other or should he make sufficient allowance for the probable claims against either before striking the amount of the dividend. The share of the surplus of the individual partner from the partnership estate will become an asset of his individual estate and where there is no surplus but a deficiency the deficiency in whole or in part according to the solvency of the other partners will rank as a debt upon the separate estate.

Concurrent winding-up: duty of trustee.

116. Partners subject to their liability for any deficiency in the partnership assets may prove against the partnership estate for any debts due to themselves personally and especially where the claim of the partner proving is founded upon a fraudulent appropriation of his separate property to the purposes of the partnership.

Partners may prove against partnership.

117. If one or more of the partners should be members of another partnership or carrying on another trade such partnership or partner as trader may prove for such partnership or trade debts in the same manner as ordinary creditors against the partnership or the estates of individual partners.

Where partners are members of another firm.

118. The partnership may prove as a creditor against the estate of a bankrupt partner for any sums owing by him and especially the partnership may also prove for sums fraudulently abstracted by the individual partner to swell his own estate.

Partnership may prove against bankrupt partner.

IV.—PARTNERSHIP WITH LIMITED LIABILITY OF CERTAIN PARTNERS.

119. A partnership may consist of two classes of partners one class consisting of one or more partners being responsible for the debts of the partnership as ordinary partners and another class which may also consist of one or more partners who are contributors to the capital solely and not active members of the partnership and whose liability for the debts of the concern shall be limited to the amount of capital contributed by them.

New form of partnership.

120. The name of the partnership shall include one or more of the partners whose liability is unlimited together with the addition "and company" to cover the partners not named and it shall not be necessary to add anything to such a designation to show that any of the partners are mere contributors to the capital and not active members of the partnership but the insertion of the name of any contributory in the name style title or designation of the firm shall of itself make him an ordinary partner.

Designation.

121. The terms and conditions of such partnerships must be set forth in articles of partnership whatever the amount of the capital or period of duration of the partnership and these articles must disclose the partners whose liability is unlimited and the names and the amount of contribution to the capital of those partners who are not to interfere in the active management of the partnership and not to be responsible beyond the amount contributed and their respective rights and interests in the partnership.

Terms and conditions to be stated in articles.

122. It shall not be necessary to register such articles (except under any general provisions for the registration of deeds and documents now in force or to be hereafter enacted) but an abstract of the

Abstract of articles.

same shall be registered in the office of the Registrar-General in a book properly indexed to be kept by him for the purpose in which an abstract or vidimus prepared by the parties thereto and certified as correct by one of the partners whose liability is unlimited or by an attorney of the Supreme Court shall be recorded and preserved.

Abstract of articles must be registered.

123. Colonial Secretary's Office,
Stanley, Falkland Islands,
13th October, 1922.

His Excellency the Governor directs the publication, for general information, of the following extract from the Board of Trade Journal of the 13th of July, 1922, on the subject of crossbred wool.

By Command,

H. HENNIKER HEATON,
Colonial Secretary.

TEXTILES.

B.A.W.R.A. WOOL.

The position of crossbred wool.

The Directors of the British-Australian Wool Realisation Association have once more reviewed very carefully the position of crossbred wool. The statistical memorandum given below shows that the stock of crossbred wool in the hands of B.A.W.R.A. has diminished in the last two years by about 239 million lb., while the stock of wool in Argentina and Uruguay has diminished in the same period by approximately 131 million lb. When all deductions have been made there remains the absolute certainty that the supply of crossbred wool in the world has diminished in two years by a minimum of 220 million lb., while there is a high degree of probability that the actual diminution is between 240 million and 260 million lb.

It will be seen that in the above figures allowance is made for an increase of the stock of crossbred wool in the hands of dealers and manufacturers since 30th June, 1920, of from 30 million to 50 million lb., on balance, the diminution in the United States compensating to some extent for the increase in Europe. The absence of authoritative statistics of dealers' and users' stocks prevents any closer approximation to the actual figures. The surplus of crossbred wool in the Southern Hemisphere has now been almost entirely wiped out. From the River Plate Republics shipments have been made in the last twelve months equal to 633,000 bales, which is considerably more than twice the estimated amount of the clip in those countries which will begin to be shorn in October. During the same period New Zealand wool equal to one clip and a half has been absorbed by dealers and users. Practically the whole of the purchases of Australasian and South American crossbreds have been made for Europe as the United States have taken less than one quarter of their usual share.

In view of the above facts, the Directors of B.A.W.R.A. have not been surprised to learn from many of the leading buyers that some time is required for digesting the very heavy purchases of crossbred wool lately made, especially the wool below 50's, of which the greater part of the New Zealand, Argentina and Uruguay clips is composed. A short breathing space is specially desirable at a time when the trade has to deal with the English clip.

In view of this situation and in conformity with the policy fully set forth in the Directors' report of 13th January, 1922, the Board have decided to withdraw as far as possible all the medium and coarse crossbred wool intended to be shown in the July to September sales. It may be necessary for warehouse reasons to include a few small parcels of these wools at the Hull and London sales in July and September, but limits will be placed on such parcels not lower than the full equivalent of the June auction values. Current prices are already far below the cost of production, and a further fall to be followed inevitably by a much greater rise later on, would be harmful and disturbing to all the interests concerned, especially in so far as such a fall would bring about a further reduction of the production, which has already fallen to such a point as to cause some anxiety as to future supplies. It is notorious that land once diverted from sheep farming very seldom returns to it.

						lb.
Exportable surplus	749,000,000
Reduction of River Plate Stocks	131,000,000

NOTE.—The next River Plate clips are estimated to yield 250,000 bales for export, equal to about 21,000 bales per month. The trade for the past eight months has imported about 56,000 bales per month.

III.

The holdings of crossbred wool from Australasia, Argentina and Uruguay in the hands of growers and B.A.W.R.A. have diminished approximately as follows :-

Australasian as per I.	239,000,000	
Less Growers' Wool unsold 30th June, 1922, estimated					66,000,000	
						173,000,000
River Plate Wool as per II.	131,000,000	
Less maximum increase in European Stocks of unsold Growers' Wool	10,000,000	
						121,000,000
Total diminution in first hands						294,000,000

IV.

The increase in holdings of Australasian and South American crossbred wool in the hands of dealers and manufacturers cannot be estimated so closely as the other figures, but on the possible calculation can it be put higher for the world as a whole than 70 million lb., there being a high degree of likelihood that the actual net increase is between 40 million and 50 million lb. In England and the Continent of Europe taken together there may be reckoned to be an increase of 80 million to 120 million lb., of which rather less than half is held in England. In the United States, on the other hand, there is a very considerable diminution, which cannot possibly be less than 40 million lb., and is probably 50 million to 60 million lb. The shipments from the River Plate to the United States from October, 1921, to May, 1922, were 64 million lb., less than a year before.

V.

The total diminution, therefore, of the baled stocks of crossbreds from Australasia and the River Plate is about 294 million lb. less a quantity which may be reckoned at between 40 million and 50 million lb. The net diminution, therefore, approximates to 250 million lb., which is equal to the whole exportable surplus of the Argentine Republic and Uruguay for next season.

FALKLAND ISLANDS.

Ordinance No. 7 of 1922.

I ASSENT,

J. MIDDLETON,

Governor.

20th November, 1922.

An Ordinance To provide for Trading Companies and other Associations.

BE IT ENACTED by the Governor of the Colony of the Falkland Islands with the advice and consent of the Legislative Council thereof, as follows:—

1. This Ordinance may be cited as "The Companies and Private Partnership Ordinance 1922". Short Title.

I. COMPANIES.

2. Subject to the provisions of this Ordinance the following Acts of the Imperial Parliament are declared to be in force in the Colony in so far as they are applicable:— Imperial Companies Acts extended to the Colony.

The Companies (Consolidation) Act, 1908 (8 Edw. VII, ch. 69), and

The Companies Act, 1913 (3 and 4, Geo. V., ch. 25).

3. The Registrar-General shall be the Registrar of Companies and the memorandum of associations and the articles of association (if any) of any trading company formed in the Colony under the provisions of this Ordinance shall be registered in a deed book kept for that purpose. Registrar.

4. (1) The Governor in Executive Council may make rules for the more effectual working of the said Imperial Acts in the Colony. Such rules shall be published in the Gazette and shall come into operation as from the date of publication. Rules and Fees.

(2) There shall be paid to the Registrar in respect of the several matters mentioned in Schedule A to this Ordinance the several fees therein specified or such smaller fees as the Governor may from time to time direct.

(3) All fees paid to the Registrar in pursuance of this Ordinance shall be paid into the Treasury.

Requirements as to Companies established outside the Colony.

5. (1) A company incorporated outside the Colony may carry on business in the Colony or its Dependencies by filing with the Registrar General:—

- (a) a certified copy of the charter, statutes, or memorandum and articles of the company, or other instrument constituting or defining the constitution of the Company and, if the instrument is not written in the English language a certified translation in the English language thereof;
- (b) list of the directors of the company;
- (c) the name of some one or more persons resident or stationed for the time being in the Colony or its Dependencies authorised to accept on behalf of the company service of process and any notices required to be served on the company;

and in the event of any alteration being made in any such instrument, or in the directors, or in the names of any such person as aforesaid, the company shall file with the Registrar General within six months a notice of the alteration.

(2) Any process or notice required to be served on the company shall be sufficiently served if addressed to any person whose name has been so filed as aforesaid and left at or sent to the address which has been so filed.

(3) If any company to which this section applies fails to comply with any of the requirements of this section the company, and every officer or agent of the company, shall be liable to a fine not exceeding fifty pounds, or in the case of a continuing offence five pounds for every day during which the failure continues.

(4) There shall be paid to the Registrar for registering any document required by this section to be filed with him a fee of five shillings or such smaller fee as may be prescribed by the Governor.

Provided always that paragraphs (a) and (b) of sub-section (1) of this section shall not apply to any company incorporated outside the Colony which shall carry on business within the Colony solely through the medium of a *bona fide* agent.

Power of Companies incorporated outside the Colony.

6. A company incorporated outside the Colony and duly registered in accordance with the provisions of the last foregoing section may sue and be sued in its incorporated name and enjoy all the privileges of a company projected formed and incorporated in the Colony.

II. GENERAL PRINCIPLES OF PARTNEESHIP.

Nature of Partnership.

7. (1) Partnership is the relation which subsists between persons carrying on a business in common with a view of profit.

(2) But the relation between members of any company or association which is;

- (a) Registered as a Company under this Ordinance or any other Ordinance for the time being in force relating to the registration of joint stock companies; or
- (b) Formed or incorporated by or in pursuance of any other Ordinance of the Colony or letters patent, or Royal Charter;

is not a partnership within the meaning of this Ordinance.

8. A new partner cannot be introduced to the partnership without the consent of all the partners. The consent of the majority will not suffice. New partners.
9. One partner may take a sub-partner to participate in his share of the partnership but such sub-partner is not a partner in the partnership. Sub-partners.
10. The contract is essentially one of good faith among the partners both in its beginning and its progress and it can be set aside at any time on fraud being established. In case of fraud.
11. The number of partners in a private partnership shall not exceed twenty. Maximum number of partners.
12. An infant may be a partner but under the law with regard to infants he is not responsible for the debts of the partnership if he repudiates his liability on coming of age. Infant may become partner
13. (1) If a partner was a lunatic at the time of entering into the contract and the fact was concealed from any of the partners the fraud will be a sufficient ground for setting aside the contract. In case of lunacy.
- (2) If the lunacy was known to the other partners they cannot afterwards set aside the contract on that ground but it may at any time be set aside by those acting for the lunatic.
- (3) If the contract has been entered into by the lunatic in a lucid moment and is a transaction in good faith as regards the other partners any supervening lunacy will not invalidate the right of the lunatic to his share of the profits and his property will be subject to the debts of the partnership.
- (4) If a partner sane at the time of entering into the contract shall become insane during the partnership it shall be at the option of the remaining partners to continue the partnership according to the terms of the contract or to dissolve the partnership.
14. A married woman may with the consent of her husband enter into a contract of partnership and when such consent has been given by the husband signing the articles of partnership the wife shall be entitled to act as a *feme sole* with regard to the partnership. Married woman may become partner.
15. The undertaking into which the partners enter must be a lawful one but need not be any particular business as a valid partnership may be constituted for purposes of a general nature to speculate in any way which may appear to offer profit. Undertaking must be lawful but may be of a general nature.
16. The partnership must be for the purpose of making profit in which each of the partners shall have a share. Partner to share in profits.
17. It is not necessary that each partner actually participate in the profits whatever amount of profit may be made because a partner may validly stipulate on account of the greater share of the fund which he advances that one or more of the partners shall not receive anything unless a certain amount of profit has been made. It is enough that each partner shall have a fair chance of making profit and that the conditions of the contract are not manifestly unjust. Participation in profits.
18. The partners in the contract of partnership bear the loss mutually if they fail to make profit and incur loss but it shall not be unlawful for a partner to stipulate as between himself and the other partners that he shall not be liable to contribute to the loss. Losses to be borne mutually.

Shares in profit and loss.

19. The shares in the profit and the proportion of responsibility for loss may be equal or unequal according to the agreement of the partners or *pro rata* according to the amount each has contributed to the common fund but where no stipulation has been made and there is no guide to the intention of parties the shares in the profit and loss shall be taken to be equal.

Share in profits without being a partner.

20. While partners share in profit and are liable for loss a mere participation in profits does not necessarily make the participator a partner. A manager or servant of a partnership may have a share in the profits as his wages and yet not be a partner.

Proof of partnership.

21. The mere fact that the participator in the profits is the manager or servant of the partnership does not necessarily exclude him from being a partner. The fact whether he is a partner or not depends upon the intention of parties when he was admitted to share profits and must be judged of according to the facts and circumstances of each case.

Persons may participate in profits without being liable as partners.

22. The advance of money by way of loan upon a contract in writing to receive a rate of interest varying with the profits or even a share of the profits will not of itself make the lender a partner. A widow or child of a partner may receive a portion of profits by way of annuity without incurring liability for the debts of the partnership. The vendor of the goodwill of a business may receive a portion of the profits in consideration of the sale without being subject to the liabilities of a partner.

What may constitute capital.

23. The fund which the partners contribute or as it is commonly called the capital of the partnership need not necessarily consist of money. One may contribute his skill or his labour or goods or real estate or the goodwill of a business and generally it may be said that anything which the partners themselves consider to have value may be contributed to the common fund.

Where labour or skill is contributed.

24. Where the contribution of the partner is labour or skill or something which bears no ratable proportion to the money supplied by others it is the more necessary that the share of the profits to which each partner is entitled should be fixed at the time of making the contract. If no proportion is fixed the contributor of the skill or labour shall be entitled to receive profits in proportion to the smallest sum of money advanced by the other partners.

Where capital exceeds one hundred pounds or duration of contract exceeds twelve months.

25. No partnership in which the common fund or capital exceeds the value of one hundred pounds sterling and the duration of the contract exceeds or by the nature of the engagement must exceed twelve months can be pleaded or proved in actions between the partners themselves unless the contract has been embodied in articles of partnership. If a partner has been admitted subsequent to the articles his admission may be proved by letters writings or facts and circumstances.

As to existing partnerships.

26. Existing partnerships shall until their termination be subject to the rules of the law anterior to this Ordinance as regards the necessity of articles but all future contracts of partnerships shall with the exception aforesaid be embodied in articles of partnership.

Limited partners may be responsible as Ordinary partners in certain cases.

27. If those who are not partners at all or who may be limited partners only hold themselves out to others as ordinary partners and in this manner cause them to enter into contracts or make advances or sell goods on credit or in any other way to become creditors the individuals who so represent themselves shall be held bound by their representations.

28. A person who enters into a partnership without notification and continues in it for the purpose of sharing in the profit as a dormant partner shall be liable to creditors during the time he remained a partner in the same manner as an ordinary partner.

Liability of dormant partners.

III.—PRIVATE PARTNERSHIP WHERE THE LIABILITY OF

THE MEMBERS IS UNLIMITED.

(i) *The partnership property.*

29. The whole property real and personal original and acquired of the partners as a whole in connection with the partnership shall be held as belonging to the partnership under the firm name style title or designation and the partnership to that effect shall be regarded as a juridical person and it shall be capable of sustaining the relation of creditor and have the right to sue and of sustaining the relation of debtor and the liability to be sued each partner having a contingent right to his share of the property when the debts shall be paid and the property divided but having no right while the partnership lasts to dispose of the property except for partnership purposes and on the other hand each partner remaining liable for the debts of the partnership.

Partnership property.

30. The partnership itself may be lawfully sued by entering as the name of the defendant the firm name style title or designation under which the partnership conducts its ordinary business and a writ left at the ordinary place of business of such partnership or with a manager clerk shopman operative or servant therein or delivered personally to any one partner shall be a sufficient service upon the said partnership and upon the individual partners thereof and judgment may be given thereon which shall be a good judgment against the partnership as in the case of any ordinary defendant to an action.

Partnership may be sued in name of firm.

31. The partnership may sue under the firm name style title or designation by which it conducts its ordinary business without requiring to insert as a plaintiff the name of any individual partner and a judgment obtained in any action in which the writ shall be so sued out shall be a good judgment and may be enforced by all the remedies competent to an ordinary plaintiff.

Partnership may sue in name of firm.

32. Real estate may form part of the capital of a partnership.

Real estate may form capital.

33. The real property may form part of the partnership property although the title may be in name of one or more of the partners and be liable for the debts of the partnership or be treated as personalty on the death of a partner.

Liabilities thereof.

34. On the other hand land may be contributed to the partnership fund not as a portion of the capital but simply for the purpose of cultivation or pasturage the property remaining in the individual partner and the use solely belonging to the partnership.

Real property not necessarily partnership property.

35. Titles to land may be taken in the name of the partnership under its ordinary name style title or designation and a transfer of the same may be validly made under the firm name style title or designation when subscribed to the transfer by one of the partners. Mortgages and encumbrances may be granted and created in the same manner and the transfers mortgages or encumbrances shall when so subscribed be held to have been done with consent of all the partners.

Titles to land may be taken and transferred in name of partnership.

Property to be applied to the payment of debts.

36. The partnership property must first be applied to the payment of partnership debts and each partner has a right to have the same so applied before any individual partner or his creditors or representatives can claim any right therein.

Where partners may claim individually &c.

37. Each partner has a claim on the partnership property for all funds advanced by him and the partnership has also a claim for the repayment to the partnership of whatever has been taken by one partner beyond his share.

Claims against individual partners.

38. No creditor of an individual partner can acquire any right title or interest in the partnership property even as the consequence of a judgment except for so much as belongs to the partner after all claims on the partnership as a whole are deducted and satisfied and the mode of putting any such judgment in force shall be by attachment of the partner's share of profit and property and not by seizure and sale.

(ii) *Powers and authorities of partners.*

Partner may bind partnership in relation to its ordinary business.

39. Each partner is *proæpositus negotiis societatis* and while the stipulations in the articles of partnership bind the partners *inter sese* in regard to the extent of their powers as regard the public each partner can bind the partnership by his acts in relation to the partnership business. This however is subject to the limitation that it must be in relation to the partnership business as ordinarily conducted because one partner has no authority to bind his co-partners to obligations which both he and the persons with whom he dealt must have known to be beyond the ordinary scope of the business and of the powers ordinarily exercised by partners.

Ordinary trading transactions may be entered into by any partner.

40. In ordinary trading partnerships the buying and selling of goods the drawing accepting and indorsing of bills the granting of cheques upon the partnership bank account the borrowing of money within ordinary limits for trade purposes the granting of receipts the ordering of insurances the payment of debts the granting of Custom House bonds and the pledging of partnership property for partnership purposes are all within the scope of the agency entrusted to each partner.

With regard to the granting of warranties &c.

41. In partnerships where it is part of the ordinary business to grant warranties or guarantees the guarantee of one partner shall bind the whole but where that is not the ordinary course of the business of the partnership the holder of the guarantee will require to prove that it was done with the consent of the firm.

Reference of dispute.

42. One partner has no authority to refer a matter in dispute to arbitration in name of the partnership without their consent.

Contracts not binding in certain cases.

43. Contracts will not bind the partnership which have been made by one partner with a party who has knowledge or notice that the partner is acting beyond his powers or in fraud of the firm.

Acceptance of the firm given for a private debt.

44. Where a partner gives a bill or acceptance or indorsement of the firm in payment of his private debt the firm will not be bound to the person accepting such a payment unless he can prove that the partner was authorised or otherwise establishes the *bona fides* of the transaction. If the bill is in the hands of third holders the partnership shall be liable unless the circumstances show that the holder was aware of the nature of the transaction.

Application of partnership money to private use.

45. Where money has been raised by one partner upon the faith of the partnership signature and such partner applies the money to his own private debt the firm will be bound when the party advancing the money had no knowledge of the object to which it was to be applied.

46. The same rules will apply to the application of the securities or property real or personal of the firm in payment of the private debt of a partner. Application of partnership securities.

47. Where money has been advanced to a partner upon his individual credit and responsibility although the money be paid into the firm account and employed for partnership purposes the person making the advance must go against the individual partner who obtained it upon his own credit. Where money has been advanced to individual partner.

48. A new partner by joining an old firm shall make himself liable like the other partners for the debts of the firm. Responsibilities of new partner.

49. Where a partnership has been originally liable for a debt and the creditor by arrangement accepts one of the partners as his debtor in place of the partnership such acceptance will extinguish the debt against the firm. Where a partner is accepted as debtor in place of firm.

50. If a creditor in like manner continues to accept of the partnership as the debtor after the retirement of a partner has been duly notified to him the responsibility of the retiring partner ceases. Where retiring partner ceases to be responsible.

51. But as the principal of the discharge which is here assumed is that the creditor had notice of the partnership in its altered condition and accepted it as his debtor there must be no doubt of the notice which ought to be both personal and public in the manner set forth in a subsequent section the latter form being sufficient intimation to those who have subsequent dealings with the firm that the partner has retired and the former being necessary in the case of the actual creditors of the firm at the date of retirement. Notice of discharge of partner from responsibility to be given to creditor.

52. (1) The partnership is liable for torts committed by the partners or the servants of the partnership in the course of carrying on partnership business, Liability for torts.

(2) The partnership is liable if one of the partners fraudulently disposes of property consigned to the custody and care of the partnership. For frauds.

(3) The partnership is liable for injuries to persons or goods caused by the want of care or want of skill of the partners or servants of the firm in the carrying on of the ordinary business of the firm. For injuries to persons or goods.

(4) A partnership of publishers shall be liable for the printing and publishing of a slander by the firm on the authority of one of the partners in the course of the business of the firm. For slander.

(5) The partnership will be liable for frauds committed on the revenue by one of the partners in conducting the business of the firm. For frauds on the revenue.

(6) The tort to render the firm liable must be committed in carrying out the business of the firm within the ordinary scope thereof or the act must be endorsed and accepted by the firm. Liability in certain cases only.

(iii) *Rights and duties of partners.*

53. If any loss be sustained to the partnership from the gross negligence unskilfulness fraud or misconduct of a partner the partner is responsible to the partnership. Responsibility for loss.

54. A partner is responsible to the partnership for intentional breaches of the articles of partnership. For breach of articles.

For false representations.

55. If a partner makes any false representations to his partners or conceals from them facts in connection with the business and thereby makes profit to himself he must make good to the partnership the profit so obtained.

Rule as to bonuses etc.

56. If a partner makes any private stipulations with third persons for bonuses or premiums for himself in connection with the business of the partnership he must account therefor to the partnership.

Inability of partner in certain cases.

57. (1) A partner cannot enter into any other business or engagement which will interfere with the proper performance of his partnership duties.

(2) Nor can he make purchase or sales on his private account which would interfere with the bargains of the firm or lessen their profit.

(3) A partner cannot enter upon any other undertaking which would give him a direct interest contrary to that of the partnership but the position must be one not merely of temptation to act in such a manner but an obvious antagonistic interest.

Books must be kept.

58. As one of the chief duties of the partners is to account faithfully to the partnership for all transactions it is absolutely necessary to keep business books in which everything done by each shall appear and be accounted for.

Withholding of accounts presumption of fraud.

59. The withholding of accounts by one partner from the firm shall be of itself a presumption that fraud has been perpetrated or was intended.

Access to books.

60. All the partners are entitled to know the full extent of the partnership affairs and to have free access to the books on all occasions unless they have intentionally limited their powers by the articles.

Salaries and private expenditure of partners.

61. The articles shall state what sum each partner will be entitled to draw for his private expenditure and there may also be a stipulation that one or more shall receive a sum by way of salary before profits are estimated but unless this stipulation be clearly set forth the presumption will be against any salary being payable.

(iv) *Articles of partnership.*

Articles of partnership.

62. In this Ordinance (section twenty-five) it has been made necessary for all partnerships where the capital exceeds one hundred pounds sterling and the duration exceeds twelve months to be constituted by articles of partnership.

Stipulations to be inserted.

63. It is not necessary to insert in articles of partnership the general principles applicable to all contracts of partnership but only such stipulations as without being stipulated would not be implied by law.

Agreements to form partnership.

64. Agreements may be entered into to form a partnership which are not the partnership articles and should any of the partners fail to carry out the agreement it is hereby enacted that such preliminary agreements cannot be enforced so as to compel persons who are unwilling to enter into partnership but an action will lie for damages for breach of agreement wherever any of the parties had proceeded in fulfilment of it to contract engagements to realise funds or do any other act which involved pecuniary obligations or loss in virtue of the agreement.

65. The articles of partnership are construed like other contracts according to the intention of parties and they shall always be construed so as to defeat fraud and the taking by any partner of an unfair advantage over his co-partners. Construction of articles.
66. If partners do not faithfully observe the articles of partnership among themselves and a practice spring up on any points at variance with the articles it will not be competent for one partner thereafter suddenly to attempt to enforce the articles but the practice will be taken as a virtual alteration or repeal of the articles by consent of all. The articles may be varied during the partnership with consent of all the partners. Variation of articles.
67. When the partnership is entered into for the carrying on of a specific business the Supreme Court in the event of dispute shall construe strictly the description of the business set forth in the articles so that the partnership be not turned from its legitimate ends. Where a specific business is carried on.
68. The time for commencement of the partnership shall be carefully set forth. If no date is specified it will be held to commence from the date of the articles. Date of commencement.
69. The name or style by which the firm is to be known shall be defined by the articles as it is under the common name that the partnership will not only carry on its transactions but also that under which it will sue or be sued. The name need not include any of the existing partners. Name of firm to be defined.
70. The articles shall set forth the duration of the partnership but whatever time be stated the death of a partner brings the partnership to an end unless there are stipulations to the contrary. Duration of partnership.
71. If the articles stipulate that the death of a partner shall not necessarily put an end to the partnership a clause may empower the representative of the deceased partner to carry on the business with the survivors for the benefit of the widow and children of the deceased partner and for the admission of one or more of the children as partners on their arrival at majority. Death of partner need not terminate partnership.
72. If the interest in the partnership be given to the widow during her life and to the children after her death it is only the children who survive the mother who are entitled to a share. Where interest is given to the widow.
73. The articles may empower the partners to provide by will or otherwise for the disposal of their share in the event of death. If the will leaves the executors the freedom of declining should they not consider it wise or expedient to continue the partnership the death of the party then puts an end to the partnership. Disposition of share by will or otherwise.
74. The articles shall contain provisions for the manner in which the share of a deceased partner shall be estimated and paid should there be no intention to admit the representatives into business. Share of deceased partner.
75. It may be stipulated that one or more of the partners shall have the direction of the business of the company and these provisions will be enforced by a competent Court. One or more partners may conduct business.
76. There may be special cases where a partnership is formed for working some manufacture which is a secret and in such cases it will be competent for the partner who is in possession of the secret to make such stipulations as shall protect him in the working thereof. As to secret manufactures.

- Computation of capital. 77. The clauses in connection with the contribution of the capital shall bring to a money valuation such items as lands buildings book debts and other property which may be contributed in order that the capital account may be clearly set forth.
- Profits. 78. Provision shall be made for balances and division of profits.
- Accounts when agreed to be conclusive. 79. It may be provided to prevent future disputes that the accounts as agreed to at any particular time shall be conclusive but no such provision will bar an enquiry into fraud.
- Employees. 80. The mode of hiring and dismissing employees of the firm shall be provided for.
- Retirement of partner. 81. The mode of permitting a partner to retire from the firm either with or without liberty to carry on the same trade and the purchase of his share by the firm or otherwise may be stipulated.
- Dissolution and winding up. 82. The steps necessary to be taken upon dissolution the mode of winding-up and the settlement of controversies shall be provided for and it shall be competent for the partners to provide that any of their number may be expelled from the partnership should his conduct or pecuniary entanglements be such as to compromise the credit of the firm.
- (v) *Remedies against partners and third parties.*
- Firms may sue and be sued. 83. (1) A partner may sue the partnership under the firm style name title or designation and the partnership may in like manner sue a partner for any matter or thing in relation to which a cause of action has arisen. Two firms may sue each other although some of the partners may be partners in both or any member of either firm may sue either or both.
- (2) Third parties may sue the partnership and the partnership may sue third parties in the same way as ordinary plaintiffs may sue but when judgment has been given against the partnership the execution will not lie against the separate partners unless the firm has no effects. Where the judgment has to be enforced by imprisonment it will be competent to proceed against one or other of the partners at the choice of the holder of the judgment.
- Private debts of partner. 84. Where judgment has been given against a partner for a private debt the share of profit and share of partnership property belonging to such partner may be attached in the hands of the firm but it shall not be competent to proceed to seizure and sale of the property of the firm for the separate debt of a partner.
- Existence of firm. 85. The juridical person of the firm will be taken to be in existence after the active operations of the partnership have ceased or after the partners have entered into a new contract for all purposes connected with the receiving and paying the debts of the firm and generally for the purpose of winding up but for that only.
- One partner may sue another. 86. One partner may sue another for all matters or things unconnected with the partnership and even for matters arising out of the partnership if the interests of the firm are not necessarily involved.
- Denial of access to books. 87. Any partner who has been denied access to the books or papers of the firm or who has reason to believe that one or more of the partners have made profit from the partnership without disclosing it may sue the firm for an account and this right extends to the

executor administrators or representatives of a deceased partner. Such action may be sued without its being necessary to ask for a dissolution of the partnership but the Supreme Court may decree the dissolution should circumstances emerge during the enquiry which induce the belief that mutual concert and agreement between the parties is thenceforth impossible.

(vi) *Dissolution of partnership.*

88. A partnership may be dissolved by the act or consent of the partners or of some of them or by the judgment of a competent court or by the mere operation of law or by the extinction or completion of the thing in regard to which the partnership was formed or by the lapse of time for which it was originally contracted or by the death or bankruptcy of a partner.

Partnership may be dissolved.

89. All partnerships whether a period has been fixed for the termination of the contract or the duration is merely dependent on the will of the partners can be brought to an end by mutual consent the whole existence of the contract depending upon the consent of the parties who made it. A partnership which has no fixed term may be dissolved at the desire of either of the partners and even by acts which are inconsistent with the continuance of the partnership.

Dissolution by consent.

90. Although the original contract has been made by deed under seal it is not necessary that the dissolution be effected in the same way. The resolution to dissolve publicly announced as afterwards provided for will be sufficient.

Must be publicly announced.

91. A partnership which is to endure for a stated period cannot be brought to an end by the mere will of one of the partners but any partner may apply to the Supreme Court for a dissolution on sufficient cause shown.

Or decreed by the Court.

92. When the term for which the partnership was originally formed has elapsed and no notice of dissolution has been given and no new articles of partnership entered into but the partners have continued the business without any change the association between them will be treated as a partnership at will under the same terms and conditions so far as applicable which are set forth in the original articles these for the purposes required by section twenty-five hereof being taken to be the articles of the continued partnership.

Partnerships at will.

93. (1) The causes for which a partnership may be brought to an end by the Court on the application of a partner although the fixed term has not elapsed are generally those which arise subsequently to the formation of the contract from the misconduct fraud or violation of duty of one or more of the partners.

Court may end partnership on cause being shown.

(2) The misconduct or violation of duty must not be trivial or in regard to other relations of life unless they have a tendency to injure the credit or interfere with the business of the partnership.

(3) The Supreme Court may be applied to for a dissolution because of the impracticability of carrying out the partnership from a change of circumstances or a failure of expectations.

94. It has already been provided in section thirteen sub-section four that supervening insanity of any partner may be a cause for dissolution at the choice of the partners. The insanity must be such as is likely to continue and not a merely temporary malady.

Insanity a cause.

95. The prolonged absence of a partner his residence out of the colony his change of domicile or engaging in pursuits incompatible with his duty to the partnership may all be good grounds for the dissolution of the partnership by a Court of law even where the term has not expired.

Also absence of partner.

- Question of dissolution may be referred. 96. The partners may refer to arbitration the question of dissolution before the agreed on term and an award decreeing dissolution shall be a competent award and even where the question of dissolution has not been expressly referred if the differences between the partners have been referred and the arbitrators have awarded a dissolution that shall be a competent award.
- Effect of outlawry &c. 97. The outlawry of a partner or his attainder for treason or felony operates as a dissolution of the partnership.
- Effect of female partner marrying. 98. A female partner marrying may continue as a partner but the husband shall have no right arising from his *jus mariti* or otherwise to interfere with the affairs of the firm but she shall act in the affairs of the partnership as a *feme sole* ; but the marriage of a female partner during the tenure of the partnership may be a good ground for applying to the Supreme Court to decree a dissolution under the particular circumstances of the case.
- Voluntary assignment. 99. The voluntary assignment by one or more of the partners of all their right title and interest in the partnership property dissolves the partnership.
- Attachment of profit and share of partner by creditor. 100. The attachment of the profit and share of the property in the firm of one partner by a creditor may be a ground for a dissolution of the partnership but only by appealing to the Supreme Court to decree the dissolution.
- Bankruptcy of partner. 101. The bankruptcy of one or more of the partners acts as a dissolution of the contract as the whole property of the partner passes to the trustee in the bankruptcy and the bankrupt ceases to have the power of free action necessary to the discharge of his duties as partner.
- Death of partner. 102. The death of a partner dissolves the partnership among all the survivors from the date of the death unless the contrary has been provided in the articles of partnership.
- Winding-up. 103. In all such cases of dissolution as the affairs of the firm must be wound up the partnership subsists for that purpose and that alone and the debts may be collected and paid in the name of the firm by the whole or some or one of the partners nominated for that purpose and the accounts adjusted.
- Rights of third parties in regard to liabilities. 104. The dissolution of the partnership does not change the rights of third parties in regard to liabilities due by the firm and they are entitled to be paid out of the partnership assets and where these are insufficient by the partners or the estate of a deceased partner. Where the partnership assets are insufficient it is not necessary for the creditors to sue each partner but the action will continue to lie against the firm under its ordinary name style title or designation until the winding-up is finished and judgment having been obtained and the partnership having no assets the judgment may be put in force against the individual partners.
- Partnership in liquidation. 105. In order that there may be no confusion between a partnership which is subsisting solely for the purpose of winding-up and one which is in actual operation the words "in liquidation" shall be added to the name of the firm in course of winding-up on its ordinary place of business and as the heading of all bills and demands made upon debtors and in all documents relating to the winding-up and in any legal proceedings instituted by or against the firm the like words shall be added to the ordinary name style title or designation according as the firm are plaintiffs or defendants.

106. On the dissolution of a partnership it is necessary to give public notice to prevent partners being held liable as such for the acts of their co-partners after dissolution and it is hereby enacted that in addition to the words "in liquidation" being added to the name of the firm an advertisement in the Gazette and a notice of the dissolution published in the newspapers of the Colony shall be sufficient public notice within the Colony but creditors of the partnership are entitled to separate private notice by writing.

Notice in cases of liquidation,

(vii) *Special provisions relating to dissolution by bankruptcy.*

107. The partnership as a trader may apply to be adjudicated bankrupt on the same grounds as a sole trader or the partnership may be made bankrupt compulsorily by creditors in the same manner as a sole trader.

Bankruptcy.

108. The firm may apply to be adjudicated bankrupt without an adjudication being asked for against the individual partners and the creditors may apply for adjudication against the firm alone without seeking an adjudication against the individual partners.

Firm adjudicated bankrupt.

109. Where the firm applies to be adjudicated bankrupt without an adjudication against the individual partners any creditors of the requisite amount may apply for adjudication against the individual partners.

Effect as against individual partners.

110. Where creditors have applied for adjudication of bankruptcy against the firm and not against the individual partners it will be competent for the partners to make an application to have themselves adjudicated bankrupt.

Partners may apply for adjudication.

111. The creditors applying for adjudication of bankruptcy against the firm may apply for adjudication against one or more of the individual partners without applying for adjudication against the whole and one or more of the partners may apply for adjudication against themselves when that is competent without the whole having so applied.

Special adjudication against partners.

112. When adjudication of bankruptcy has been granted against the firm only either on the voluntary application of the firm or compulsorily at the instance of creditors without the individual partners being adjudged bankrupt and the trustee shall find either in the course of his investigations or at the conclusion thereof that the contributions required from any of the individual partners to pay the debts of the firm are greater than they can pay or provide for or if he has reason to believe that any individual partner is disposing of his separate property without awaiting the result of the investigation or is preparing to leave the Colony or in any way acting so as to prejudice the right of the creditors under the bankruptcy it shall be competent for the trustee to apply for an adjudication of bankruptcy against such partner or partners.

Power of trustee in certain cases.

113. Creditors cannot apply for an adjudication of bankruptcy against the firm for debts due by an individual partner but they may apply for the bankruptcy of the separate partner and if granted his bankruptcy operates as a dissolution of the partnership which may then be wound up either by the firm in liquidation or by an adjudication of bankruptcy against the firm should that be applied for in a competent manner.

Bankruptcy of partner,—effect of.

114. Where adjudication of bankruptcy against the firm is accompanied or followed by adjudication against the individual partners the Court may appoint the same trustee to wind up the different estates where such a course shall appear best for all concerned.

Court may appoint same trustee.

Concurrent winding-up: duty of trustee.

115. Where there is a concurrent winding-up of the estate of the partnership and the separate estates of the partners it is not necessary for the trustee to await the completion of the winding-up of the partnership estate before he declares any dividend on the estate of the individual partners or *vice versa* should he be satisfied that there are sufficient funds in either estate to pay the deficiency on the other or should he make sufficient allowance for the probable claims against either before striking the amount of the dividend. The share of the surplus of the individual partner from the partnership estate will become an asset of his individual estate and where there is no surplus but a deficiency the deficiency in whole or in part according to the solvency of the other partners will rank as a debt upon the separate estate.

Partners may prove against partnership.

116. Partners subject to their liability for any deficiency in the partnership assets may prove against the partnership estate for any debts due to themselves personally and especially where the claim of the partner proving is founded upon a fraudulent appropriation of his separate property to the purposes of the partnership.

Where partners are members of another firm.

117. If one or more of the partners should be members of another partnership or carrying on another trade such partnership or partner as trader may prove for such partnership or trade debts in the same manner as ordinary creditors against the partnership or the estates of individual partners.

Partnership may prove against bankrupt partner.

118. The partnership may prove as a creditor against the estate of a bankrupt partner for any sums owing by him and especially the partnership may also prove for sums fraudulently abstracted by the individual partner to swell his own estate.

IV.—PARTNERSHIP WITH LIMITED LIABILITY OF CERTAIN PARTNERS.

Form of partnership with limited liability of certain partners.

119. A partnership may consist of two classes of partners one class consisting of one or more partners being responsible for the debts of the partnership as ordinary partners and another class which may also consist of one or more partners who are contributors to the capital solely and not active members of the partnership and whose liability for the debts of the concern shall be limited to the amount of capital contributed by them.

Designation.

120. The name of the partnership shall include one or more of the partners whose liability is unlimited together with the addition "and company" to cover the partners not named and it shall not be necessary to add anything to such a designation to show that any of the partners are mere contributors to the capital and not active members of the partnership but the insertion of the name of any contributory in the name style title or designation of the firm shall of itself make him an ordinary partner.

Terms and conditions to be stated in articles.

121. The terms and conditions of such partnerships must be set forth in articles of partnership whatever the amount of the capital or period of duration of the partnership and these articles must disclose the partners whose liability is unlimited and the names and the amount of contribution to the capital of those partners who are not to interfere in the active management of the partnership and not to be responsible beyond the amount contributed and their respective rights and interests in the partnership.

Abstract of articles.

122. It shall not be necessary to register such articles (except under any general provisions for the registration of deeds and documents now in force or to be hereafter enacted) but an abstract of the

same shall be registered in the office of the Registrar-General in a book properly indexed to be kept by him for the purpose in which an abstract or vidimus prepared by the parties thereto and certified as correct by one of the partners whose liability is unlimited or by an attorney of the Supreme Court shall be recorded and preserved.

123. Such abstract shall set forth as nearly as may be in the form contained in Schedule B hereto annexed the date when the articles of partnership were entered into the name of the company the nature of the business the date of the commencement of the partnership and its duration the names of the partners whose liability is unlimited the amount of capital of the company and the sums contributed by partners whose liability is limited. It shall not be necessary to disclose in such abstract the names of the partners who merely contribute to the capital.

Certificate to false abstract: penalty.

127. If the partners who are set forth in the articles as contributing to the capital and not to be liable beyond the amounts of their contribution afterwards take an active part in the administration of the partnership they shall be liable as ordinary partners.

Liability of dormant partner.

128. The visiting occasionally of the place of business for the purpose of inspecting the books and advising with the other partners upon business matters shall not be regarded as taking part in the administration in the sense of the preceding article but any buying and selling or dealing with the cash or presence in the place of business during business hours which would lead the public to believe that the partner so acting was an active partner in the concern shall make him subject to the liabilities of the firm as an ordinary partner and the consideration of the weight to be attached to any particular facts must be left to the appreciation of the legal tribunals.

Proof of active partnership defined.

129. The same consequences will follow although the partner contributing to the capital may allege that he acted in the business of the partnership per procurator of the firm or as mandator of the other partners.

130. In the event of any question arising as to the true position of a partner the burden of proof will lie upon the partner who claims to be relieved from the ordinary obligations to show that he was only a contributor to the capital and not an ordinary partner.

As to true position of partner.

131. If any partner shall receive a portion of the profit of a partnership and is unable to prove that he has paid the sum stipulated in the articles of partnership to be payable by him as a partner contributing to the capital he will be taken to be an ordinary partner and liable for the debts of the partnership as such.

Where partner shall be deemed an ordinary partner.

Restriction as to capital.

132. It shall not be lawful to divide or constitute the capital of a partnership of this description by shares.

All partners may inspect accounts.

133. The partners who do not take part in the administration of the business may at any time demand an inspection of the accounts of the partnership and it shall be the duty of the partners who administer to keep the books of the partnership with correctness and up to date.

Effect of refusal.

134. If accounts should not be delivered or shown on demand the partner may apply to the Court for an account with or without praying for a dissolution of the partnership and under such an application the Court may not only order an account but decree a dissolution.

Penalty on partner exhibiting false accounts.

135. If the partners who administer the affairs of the partnership or any of them knowingly give or exhibit to the partner or partners whose liability is limited a false account representing the administration as having resulted in profit whereas there had in reality been a loss he or they shall be held to have committed a fraud upon such partners which shall be an offence punishable on conviction according to law by imprisonment for any term not exceeding two years.

Liability of partner accepting dividend when no profit was made.

136. If any partner whose liability is limited shall knowingly accept of any sum purporting to be a dividend upon the amount of capital contributed by him or in name of profit made by the partnership when no such profit was made he shall be held liable for the debts of the partnership as an ordinary partner.

The Colonial Treasurer's report on the transactions of the Government Savings Bank for the year ended 30th September 1922.

Colonial Treasury,
Stanley, Falkland Islands.
19th December, 1922.

The Honourable
The Colonial Secretary,
Sir,

In accordance with the provisions of section 13 of the Savings Bank Ordinance 1888, I have the honour to submit the following report on the transactions of the Government Savings Bank for the period 1st October, 1921, to the 30th September, 1922.

Summary of Transactions.

2. During and in respect of the year ended 30th September 1922, the interest which had accrued to the various depositors amounted to £2,948 : 12 : 5. During the same period the withdrawals from the bank £26335 : 11 : 2, exceeded the sums deposited therein £17,956 : 1 : 10, by a sum of £8,379 : 9 : 4, and the balance standing to the credit of the depositors on the 30th September, 1922, amounted to £123,891 : 4 : 0, as compared with the sum of £129,322 : 0 : 11, standing to their credit on the 1st October, 1921.

3. During the year, there were 666 deposits, as against 344 withdrawals; the deposits averaged a sum of £1,496 : 6 : 8 monthly, as against an average monthly withdrawal of £2,194 : 12 : 7. There were 74 new accounts opened during the year, as against 64 accounts closed, leaving 805 deposit accounts in the bank at the end of the year. The average amount standing to the credit of each depositor was £153 : 18 : 0, or about £51 : 18 : 11 per head of the population of the Falkland Islands. A Monthly Summary of the transactions of the Bank is appended hereto. (Enclosure 1).

(Section 10 of the Ordinance).

4. On the 1st October 1921, the amount standing to the credit of the depositors amounted to.....	£129,322 : 0 : 11.

	£ 1,878 : 7 : 3.

7. The Government Savings Bank was first started in April 1888. Since then and up to the 31st December, 1921, the income derived from the securities held in trust under section 10 of the Ordinance, has been shewn in the Accounts and the Estimates of the Colony, as forming part of the Ordinary Revenue of the Falkland Islands, under Head "V. Interest". This was changed in the Accounts and Estimates of the Colony for the year ending 31st December, 1922, and the interest to be derived from Savings Bank Investments was deleted; provision being made in the Estimates for a sum of £160, being transferred annually from Savings Bank Income to the Ordinary Revenue of the Colony, to meet the cost of management &c., under Head "VIII Miscellaneous" on the Estimates for the year 1922. The accounts of the Colony being changed accordingly.

8. In accordance with the provisions of the Ordinance, the Savings Bank year of account begins on the 1st October and ends on the following 30th September, whereas the Colony's financial year of accounts begins on the 1st January and ends on the 31st December.

9. During the period 1st October to the 31st December, 1921, the income derived from Savings Bank Securities amounted to £1,909 : 3 : 8, and this amount was credited in the accounts of the Colony to Ordinary Revenue under Head V Interest, and the income derived from Savings Bank Securities during the period 1st January to the 30th September, amounting to £2,917 : 16 : 0, was not so credited in the accounts of the Colony, but instead, it was credited under the line, to "Deposits, Savings Bank Dividends". The difference between the first named amount £1909 : 3 : 8 and the balance £1,878 : 7 : 3, mentioned in paragraph 6 above, amounts to £30 : 16 : 5; the amount by which the Savings Bank Income, as shewn by the accounts of the Colony, (not the Savings Bank Accounts), was short of the amount due to depositors in respect of accrued interest, for the period 1st October, 1921, to the 30th September, 1922,

Profit and Loss Account.

11. The Savings Bank Depreciation Fund, which was fully invested, on the 1st October, 1921, amounted to.....	£3,110 : 5 : 4.

Transferred thereto and invested, during the year.....	2,199 : 7 : 5.
Balance to the credit of the fund.....	£5,547 : 3 : 0.

A statement is appended hereto, shewing the "Face Value", the "Cost of", and the "Market Value", of the various Investments held in trust by the Crown Agents on behalf of "The Savings Bank Investment Fund" and "The Savings Bank Depreciation Fund". (Enclosure 3).

Assets and Liabilities.

12. The Savings Bank is liable for the payment in Cash of the whole amount standing to the credit of the various depositors, which amounted £123,891 : 4 : 0, on the 30th September, 1922, should it have been so desired. Of that amount, a sum of £115,766 : 4 : 2, has been expended in the purchase of approved securities under section 10 of the Ordinance. The Market Value of these securities on that date was £104,245., and had it been necessary to realize these Investments on that date, there would have been a deficit of £11,521 : 4 : 2, in cash, but in as much as the Market Value of the Investments held by the Crown Agents on behalf of the Depreciation Fund amounted to £6,068, there would then be a net deficit in cash of £5,453 : 4 : 2, as shewn by the statement of assets and Liabilities of the Savings Bank on the 30th September, 1922, appended hereto. (Enclosure 4).

I have the honour to be,

M.P. 534/22.

STOCK DEPARTMENT,

Stanley,

5th January, 1923.

Sir,

I have the honour to submit herewith my Annual Report for the year ended 31st December, 1922.

Sheep

The general health of the sheep is good, but in some cases the stamina is not all that could be desired, this can be counteracted by careful culling of young stock and by casting the old ewes. The clip this year was on the whole lighter than last. The lambing on most stations appears to be good, but the percentage counted at lamb marking shows a serious loss. The lambing percentage is decreasing slowly but fairly regularly and in the majority of cases the cause cannot be attributed to climatic conditions. Probably a change of new blood will improve matters greatly. A step has been taken in the right direction by importing a large number of rams and ewes for use next season.

2. One station on the West was unfortunately, found to be affected with lice, but very stringent methods were employed and it is to be hoped that there will be no reappearance of this trouble. There were also several cases of lice reported in the East but there is every reason to believe that these have been dealt with satisfactorily. I am of the opinion that if practicable all flocks would benefit by being dipped twice at dipping time, with an interval of 14 days, and that any loss incurred would be more than compensated by improvement in the sheep and freedom from keds. Investigations were made with a view to discovering if Epizootic Abortion in ewes which was suspected to exist on the West Falklands was prevalent or not, after careful bacteriological examinations had been made this disease was proved to be non existent.

3. On some stations the death rate among ewes appears to be very considerable, I am of the opinion that this can be traced to the impaired vitality to a great extent due to inbreeding, also in some cases the ewes make very bad mothers not looking after their lambs as they should, due probably to the same cause.

4. Unfortunately for some time there has been no outlet for surplus stock, as the canning works have been closed down for the last two years, and there have been no exportations of live sheep. It is hoped that in the coming year there will be an outlet to South America.

Horses

5. There is practically no disease among the horses in the Colony, 284 horses and mares of a useful type were imported this year from Punta Arenas but arrived unfortunately rather late in the season and therefore were not acclimatised before the winter set in, causing a certain amount of loss. A few stallions of the hackney type might advantageously be introduced.

Cattle

6. A shorthorn bull and two heifers have now been obtained by the Colonial Government from England, these come of a good milking strain and it is hoped that the stock of the Colony may be benefited by this new blood. There are 8126 cattle in the Colony, an increase of 452 over last year. The general health appears to be good.

Fowls

7. A number of pedigree fowls were obtained by Government and 120 settings have been supplied to the residents of Stanley and the Camp, 93 to Stanley and 27 to the Camp.

Imports

8. 19 Romney Marsh rams were imported from England, 6 Corriedale rams from New Zealand, also 200 Corriedale rams and 300 Corriedale ewes from the coast, and 497 Romney Marsh rams from Tierra Del Fuego, these have all been quarantined on Great and Ruggles Islands for three months.

I have the honour to be,

Sir,

Your obedient servant,

B. A. BROWN,

Chief Inspector of Stock.

The Honourable,
The Colonial Secretary.

(2) to transmit and receive messages by means of Wireless Telegraphy at the said stations.

Provided that the licensed apparatus shall be worked and the messages shall be transmitted and received solely for the purposes of conducting private business and for no other purpose.

II. The licensed apparatus shall not be used by the licensee or by any other person either on his behalf or by his permission for any purpose except for the purpose of conducting private business.

III. (1) The licensed apparatus shall be so worked as not to interfere with the working of any Wireless Telegraph Station established in the Colony of the Falkland Islands or the territorial waters abutting on the coasts of the Falkland Islands by or for the purpose of the Government of the Falkland Islands or any department of His Majesty's Government or for commercial purposes and in particular with the transmission or receipt of any messages between or at Wireless Telegraph Stations established as aforesaid on land and Wireless Telegraph Stations established on ships at sea.

Report on Education in the Colony for the year 1922.

General.

1. There is no secondary education in the Colony. The total number of children between the ages of 5 and 15 is 441. Of these 201 live in Stanley where there is compulsory education for all children between 5 and 14 years of age. In the Camp or country districts the children are taught by travelling teachers with the exception of 70 who receive instruction at stations from teachers supplied by the Falkland Islands Company.

2. There are two elementary schools in Stanley – the Government School supported from public funds and St. Mary's School managed by the Roman Catholic Sisters. The latter is not subject to Government control or supervision and receives no grant.

Government School.

3. The authorised establishment of the Government School is three teachers with Board of Education certificates, viz; a Headmaster, an Assistant Master and an Assistant Mistress, two Assistant Teachers and two Pupil Teachers. The school was understaffed during the first half of the year. It was necessary to employ a Travelling Teacher as acting Headmaster, as the Government Schoolmaster was absent on leave, and there was no certificated Master in the Colony until July, or Mistress until April. Only one pupil teacher was employed during the year.

4. The average attendance is shewn in the following table :—

	Boys.	Girls.	Total.
Number on roll, 31st Dec., 1922	79	60	139
Average attendance	72.9	47.5	120.4
Number examined	76	58	134

5. There is much variation in the ages of the children in the different classes, due in part to the fact that backward children come in from the camp and have to be taught alongside those who are much younger.

The following table for 1922 shews the age distribution :—

Teacher,	Classes.	Age of Children.
Headmaster	Standards VI and VII	12 to 16
Assistant Master	“ IV “ V	10 “ 13
“ Teacher	“ II “ III	8 “ 14
“ Mistress	“ I	8 “ 12
“ Teacher	Infants	} 3 “ 12
Pupil Teacher	“	

The normal distribution of the classes is :— Headmaster, Standards VI and VII, Assistant Master, Standards IV and V, Assistant Teacher, Standards II and III, Assistant Mistress, Standard I, and an Assistant Teacher and one Pupil Teacher for the Infants.

6. The division of time devoted to the various subjects in 1922 was as follows :— English 36.3 per cent, Arithmetic 20.4 per cent, Drawing 14.7 per cent, Singing 7.3 per cent, Geography 6.9 per cent, History and Physical Training each 4.9 per cent, and Hygiene 4.5 per cent. The time allotted for Drawing and Singing was disproportionate.

7. The sum of £90 : 17 : 6 was received in fees and £25 : 2 : 8 by the sale of stationery. The Expenditure is shewn in the following table :—

	Boys.	Girls.	Total.

There is no Government inspection or control of this school, and no information can be given concerning the course of study.

Government Travelling Teachers.

10. As has been mentioned in previous reports, the system of Travelling Teachers has not been a success recently, and the Government Schoolmaster submitted a scheme, towards the end of the year, to provide a more adequate means of education for children in the country districts.

11. At the beginning of the year the following Travelling Teachers were under engagement with the Government:—

MR. W. U. CURRIE, on duty in the East Falkland.
MR. C. F. DAER, seconded for duty in Stanley.
MR. G. L. DAILLIE, seconded for duty in Stanley.
MR. J. S. STURROCK, on duty in the West Falkland.
MR. J. J. WILSON, on duty in the East Falkland.

Mr. Currie's services with the Government terminated on the 31st of March. Mr. Daer continued to be employed in Stanley to the end of the year, and Mr. Daillie to October, when he resumed his duties in the Camp.

The total number of children taught was as follows :—

Falkland Islands Company's School and Camp Teachers.

12. The number of children receiving instruction in the Falkland Islands Company's School at Darwin and from the Travelling Teachers maintained by the Company was 70, as compared with 59 in the previous year. A report by the Schoolmaster is printed as an appendix.

Colonial Treasurer's Financial Report.

COLONIAL TREASURY,
Stanley, Falkland Islands.
15th May, 1923.

To The Honourable
The Colonial Secretary.

I have the honour to submit herewith the Financial Returns and Statements called for under Colonial Regulation 396, in respect of the year of account ended 31st December, 1922.

2. The 1922 Estimates were the first in which the Dependencies revenue and expenditure were shown as being separate and distinct from the Falkland Islands, the accounts of the Colony are being kept in conformity therewith.

The Falkland Islands.

3. The Ordinary Revenue for the Falkland Islands, exclusive of the Dependencies' share of the cost of Central Administration, amounted to £29,535 : 14 : 6. The Ordinary Expenditure for the Falkland Islands (excluding "Extraordinary") amounted to £37,160 : 1 : 1.

4. During the year a sum of £8,000, was credited to Falklands Revenue Head VIII. "Miscellaneous," when transferred from Dependencies Funds, towards the cost of Central Administration of the Colony, being £3,000 in respect of the year 1921 and £5,000 for the year 1922.

5. With the above mentioned sum of £8,000 included therein, the Ordinary Revenue for the Falklands for the year amounted to £37,535 : 14 : 6 as against an Ordinary Expenditure of £37,160 : 1 : 1, leaving a surplus of revenue over expenditure of £375 : 13 : 5.

6. The total Revenue for the Falklands for the year, including Land Sales (£7,101 : 7 : 3) and Marine Insurance Fund (£106), amounted to £44,743 : 1 : 9. The total Expenditure for the Falklands for the year, including "Extraordinary" payments (£14,573 : 0 : 8) amounted to £51,733 : 1 : 9.

7. Included in Falkland Islands "Extraordinary Expenditure," there was a sum of £8,945 : 15 : 4 in liquidation of the contribution of the Colony towards the expenses of the late War (Ordinance No. 3 of 1920.), and a sum of £4,335 : 2 : 10, in connection with the initial cost of the Government Patrol Ship "Afterglow," making a total of £13,280 : 18 : 2 to be charged against the Assets of the Colony, standing to the credit of the Falkland Islands.

8. The total Expenditure for the Falkland Islands, excluding the above mentioned sum of £13,280 : 18 : 2, amounted to £38,452 : 3 : 7 as against a total Ordinary Revenue of £37,535 : 14 : 6, leaving an excess of expenditure over revenue of £916 : 9 : 1.

Falkland Islands Revenue.

9. The total Ordinary Revenue for the Falkland Islands, for the year, excluding Dependencies contribution (£8,000), amounted to £29,535 : 14 : 6. It was £5,048 : 1 : 9 less than that collected in 1921, and was under the original estimate for 1922 by a sum of £4,417 : 5 : 6.

10. The following Heads of Revenue failed to realize the amount originally estimated for 1922 by a sum of £4,917 : 14 : 7 viz:—

Head	1. Customs Duties	£1,615	:	1	:	2					
	2. Port Dues	15	:	4	:	6					
	5. Interest	900	:	3	:	9					
	6. Post Office	943	:	12	:	2					
	8. Miscellaneous	1,443	:	13	:	0					
				<hr/>					£4,917	:	14	:	7

	Brought Forward	£4,917 : 14 : 7
11. On the other hand, the undermentioned three heads exceeded the original estimate by a sum of £500 : 9 : 1., viz:—		
Head	3. Internal Revenue	£ 1 : 11 : 1
	4. Fees Fines &c.	385 : 3 : 5
	7. Rents	113 : 14 : 7
		£ 500 : 9 : 1
	Net Decrease	£4,417 : 5 : 6

12. The decrease under "Customs Import Duties", was mainly due to the disorganisation in the mail communication with England. The decrease under the other heads was due to over-estimating.

Falkland Islands Expenditure.

13. The total Ordinary Expenditure for the Falklands for the year amounted to £37,160 : 1 : 1. It exceeded that expended in 1921 by £3,360 : 7 : 1, but was under the original estimate for 1922 by £422 : 18 : 11.

14. The total Expenditure for the Falklands for the year amounted to £51,733 : 1 : 9. It exceeded the expenditure for 1921 by a sum of £9,961 : 6 : 1; it also exceeded the amount originally estimated for 1922 by a sum of £11,300 : 1 : 9.

15. Excess Expenditure over the original estimate for 1922 was incurred under the following heads, viz:

Head	6. Port & Marine

Port and Marine (Harbour Department), in connection with the depreciation in the value of the Launch "Penguin", when transferred as the first amount to be credited to this fund in the accounts of the Colony.

The Falkland Islands Land Sales Fund.

18. On the 1st January, the Land Sales Fund amounted to £167,277 : 15 : 7. During the year a sum of £7,101 : 7 : 3 was received as instalments of land purchases and credited to the fund. No disbursements, other the purchase of approved securities, were made, and at the close of the year the fund amounted to £174,379 : 2 : 10. The Nominal Value of the Securities held by the Crown Agents on behalf of the Land Sales Fund on the 31st December, 1922 amounted to £182,819 : 14 : 7.

Falkland Islands Surplus & Deficit Account.

19. On the 1st January, the Surplus Ordinary revenue that had accumulated to the credit of the Falkland Islands in the general account of the Colony amounted to £59,719 : 10 : 5, which added to the total Ordinary Revenue for the year, (£37,535 : 14 : 6.), makes a total of £97,255 : 4 : 11. This amount less the total expenditure for the same period (£51,733 : 1 : 9) leaves a Surplus balance of ordinary Revenue to the credit of the Falkland Islands at the close of the year of £45,522 : 3 : 2.

20. On the 1st of January, the total surplus assets standing to the credit of the Falkland Islands, in the accounts of the Colony, as calculated in accordance with the provisions of Colonial Regulation 344, amounted to £226,997 : 6 : 0 which added to the total Falkland revenue for the year (£44,743 : 1 : 9,) makes a sum of £271,740 : 7 : 9. This amount less the total Falkland expenditure for the same period, (£51,733 : 1 : 9) leaves Surplus assets to the credit of the Falkland Islands on the 31st December 1922, amounting to £220,007 : 6 : 0, and made up as follows:—

Land Sales Fund	£174,379	:	2	:	10
Marine Insurance Fund	106	:	0	:	0
General Account (Falklands)	45,522	:	3	:	2
Total Surplus Assets				£220,007	:	6	:	0

Dependencies.

21. The Ordinary Revenue for the Dependencies for the year exclusive of "Research Fund," amounted to £142,101 : 19 : 8, as against a total Expenditure for the same period amounting to £12,938 : 19 : 11, leaving a surplus revenue over expenditure of £129,162 : 19 : 9.

22. During the year a total sum of £49,434 : 2 : 7 was transferred to the credit of the Research Fund and entered in the accounts as a Charge on Dependencies Revenue.

Dependencies Revenue.

23. The Ordinary Revenue for the Dependencies for the year, amounted to £142,101 : 19 : 8. It was £42,269 : 11 : 7 more than that collected in 1921, and it exceeded the original estimate for 1922, by a sum of £76,626 : 19 : 8.

24. The undermentioned revenue heads exceeded the amounts originally estimated for 1922 by a sum of £78,165 : 13 : 3, viz:—

Head 1. Customs Exports Duties	£73,368	:	0	:	6
2. Port Dues	79	:	10	:	0
3. Licences	2,301	:	5	:	0
4. Fees Fines	13	:	13	:	6
6. Post Office	178	:	19	:	1
7. Rents	1,600	:	0	:	0
8. Miscellaneous	624	:	5	:	2
<hr/>					
	£78,165	:	13	:	3

25. On the other hand, the following heads failed to realize the amount originally estimated by a sum of £1,538 : 13 : 7, viz:—

Head 1. Customs Import Duties	£ 38	:	13	:	7
5. Interest	1,500	:	0	:	0
<hr/>					
	£ 1,538	:	13	:	7
<hr/>					
Net Increase	£76,626	:	19	:	8

26. The increase under "Licences" and "Rents" was due to the collection of arrears of revenue in 1922. The increase under "Customs Exports Duties" and "Miscellaneous" was due to some misunderstanding, allowance having been made in the original estimate for refunds of whale oil duties and remittance charges. As regards "Interest" this was due to the fact that dividends on investments collected by the Crown Agents having been credited direct to the Research Fund, and in consequence, not appearing as Ordinary Revenue.

Dependencies Expenditure.

27. The total Expenditure for the Dependencies for the year, excluding "Charges on Dependencies Revenue" and disbursements made from the Research Fund, £12,938 : 19 : 11. It was over that expended in 1921 by a sum of £10,442 : 18 : 9, and exceeded the original estimate for 1922 by a sum of £6,533 : 19 : 11.

28. Excess Expenditure over the estimate for 1922 amounting to £6,533 : 19 : 11 was incurred under the following heads, viz:—

Head 1. Personal, South Georgia ...	£	159 : 7 : 5	
2. Other charges ,, ...		92 : 12 : 10	
Ordinary expenditure		£252 : 0 : 3	
3. Extraordinary, South Georgia		796 : 3 : 5	
South Shetlands		214 : 16 : 1	
			£1,262 : 19 : 9
			Net Excess £6,533 : 19 : 11

The Dependencies Research Fund.

30. On the 1st January, the Research Fund amounted to a sum £72,952 : 4 : 5. During the year a total sum of £51,546 : 11 : 3 was credited to the fund. Disbursements from the fund during the year amounted to £8,727 : 8 : 9, leaving a balance to the credit of the fund at the close of the year amounting to £115,771 : 6 : 11.

Sir,

Your obedient Servant,

W. A. THOMPSON,

Annual Medical Report on the Falkland Islands and its Dependencies for the Year, 1922.

(A) FALKLAND ISLANDS.

GENERAL

There was no epidemic during the year. As has been mentioned in a previous report, the high standard of health which the Colony enjoys is due to the purifying agency of the constant winds. The prevalence and spread of minor ailments, such as cold, would be greatly reduced if the dwellings were better aired and more attention was paid to ventilation.

SANITATION.

The sanitary state of Stanley is practically the same as in past years, but an effort to effect improvements in the town is on foot, and is receiving the support of the people, who are anxious to have the primitive sanitary methods replaced by a modern system of sanitation.

HOSPITAL.

The number of attendances by out-patients at the hospital was 1765. The in-patients numbered 68 as shewn below:

	Males.	Females.
Number in the hospital on the 1st January.	5	3
Number admitted during the year.	31	29
Total	<u>36</u>	<u>32</u>

Of the 36 male patients 32 were cured, 2 were relieved and 2 died. Of the 32 female patients 28 were cured, 1 was relieved and 3 died.

The cases treated were:

Maternity 7. Medical 29. Surgical 32.

DISTRICT NURSING.

The total number of visits paid was 194. The cases treated were as follows:

Medical 3. Maternity 12.

GOVERNMENT SCHOOL.

The children were medically examined at intervals during the year. The general health of the school was good and the children were found to be clean and well cared for. The younger boys and girls are of an exceptionally intelligent type. There are signs, however, that the average child in the Falklands loses his alertness after a certain age. I am of opinion that this is due to the constant red meat diet and the lack of an adequate supply of fish food. It may also in some measure be due to the limited outlook which the child obtains from his surroundings.

PRISON.

The prison was visited and found to be clean and in good order. One prisoner was committed during the year but was subsequently removed as suffering from lunacy.

SHIPPING.

Fifty vessels were given pratique. Their total tonnage was 898,189 and crews 3,187. No quarantinable sickness was reported.

VITAL STATISTICS.

Total population on 31st December	2142.
			Males		Females	
Births	30		25	
Deaths	6		9	
Birth rate per 1000.....	25.67		Death rate per 1000.....	7.00		

The following changes in the staff of the Medical Department occurred during the year. The Assistant Colonial Surgeon, Dr. H. Chadwick, left the Colony on the 28th of September, and was succeeded by Dr. B. J. Hallows who arrived on the same date. Mr. T. A. Hall was appointed Colonial Dental Surgeon on the 31st March.

(B) DEPENDENCIES.

The total resident population of South Georgia was 1337, and it is estimated that 1000 persons were employed at the South Shetlands during the whaling season. There is one medical officer at South Georgia and two medical officers accompany the whaling fleet to South Shetlands. These officers are employed by the whaling companies.

No cases of infectious disease occurred at South Georgia until December when a vessel arriving from Cardiff had on board a member of the crew suffering from typhoid. Seven cases were subsequently admitted to the hospital where two succumbed. The Dependency is now regarded as free from infection.

The health of the crews at the South Shetlands was reported good.

F. G. W. DEANE, F.R.C.S. ED.,
Colonial Surgeon.

No. 53.

Colonial Secretary's Office,
Stanley, Falkland Islands,
18th August, 1923.

His Excellency the Acting Governor directs the publication, for general information, of the following notice, relating to a scheme for extending the educational facilities in the Colony.

By Command,

G. R. L. BROWN,
for Colonial Secretary.

M.P. 746/22.

EDUCATION.

A scheme for extending the educational facilities in the Colony has been approved by the Secretary of State for the Colonies. The following are the main points:

- (1) Parents living in the Camp who have children from 10 to 14 years old are invited to send them to the Government School in Stanley, and assistance will be given as shown in (2) and (3) below. Such assistance is limited to parents whose income is under £200 a year.
- (2) It is proposed to provide a Hostel in Stanley for Camp children. The charge for each child will be £1 a month or £10 a year. For this sum the child will receive board, lodging, washing, medical attendance and tuition at the Government School.
- (3) Parents living in the Camp who have relatives or friends living in Stanley may wish to arrange for their children to stay with them. In such cases Government will pay two-thirds of an approved charge for board and lodging, such grant not to exceed £2 a month.
- (4) The holidays during the year will be shortened, and the Christmas holiday extended to seven or eight weeks so that the children will be able to spend several weeks at home each year.
- (5) Parents receiving assistance will be expected to keep their children at least two years at the School.
- (6) From the 1st of January, 1924, all children attending the Government School and all Camp children will be supplied with books and stationery at half price. Lists of books and prices will be sent round the Camp periodically, and it is hoped that full advantage will be taken of this arrangement, so that the children may have a plentiful supply of books.
- (7) A station, not now containing a school, which provides an approved teacher to teach the children in the settlement will receive a grant not exceeding £75 a year or three-quarters of the salary paid to the teacher, whichever may be the lower. No grant will be made in respect of passages or board and lodging.
- (8) A "Continuation Class" providing a two years course of further education will be started at the Government School in January, 1924, if sufficient pupils are enrolled. The class will be held in the ordinary school hours and tuition will be given in English (Grammar, Composition and Literature), Latin, French, Geography, History, Drawing, Needlework, Singing, Arithmetic, Algebra, Geometry and Science. The fees will be £8 per pupil per annum, payable quarterly in advance.
- (9) The Head Boy and Head Girl of Standard VII each year will be awarded free Scholarships entitling them to two years' tuition in the Continuation Class.
- (10) Parents desiring to enter their children for the Continuation Class are requested to communicate with the Government Schoolmaster without delay.
- (11) The Government Schoolmaster will shortly be making a tour of the Colony to explain the scheme personally, and in the meantime will be glad to answer any inquiries in Stanley.

M.P. 120/23.

To The Secretary of State for the Colonies.

Enclosures not printed.

Government House,
Stanley,
26th March, 1923.

My Lord Duke,

I have the honour to refer to the correspondence concluding with Viscount Milner's despatch No. 121 of the 24th of November, 1919, on the subject of the graduated tax on land which was imposed by the Land Tax Ordinance, 1918.

2. In a memorial addressed to the Secretary of State for the Colonies on the 15th of May, 1919, the Sheep Farmers resident in the Colony while "approving of the principle of a tax on land as against a tax on exports" protested against the measure on other grounds.

3. In June, 1921, verbal representations were made to me by a number of the Station Managers regarding the inequality of the tax and in support of their argument they furnished a statement shewing the amount of taxation payable per sheep carried by each station in the year 1920. Subsequently, in a letter, of which a copy is attached, the Managers of the principal stations expressed the opinion that the production of wool was a more equitable basis of taxation than the land. The Managers of two other stations later requested that their names should be added to this letter and it is assumed that all those, whose names appear as signatories, had due authority to commit the owners of the stations, which they represent, to the views expressed in the letter.

4. The basis of taxation and the principle of graduation were carefully considered before the introduction of a Land Tax was sanctioned and I was not in a position to recommend any alteration in the system of taxation without careful enquiry into the sheep farming industry. The absence of statistics and other information relating to the industry has made investigation difficult and protracted but the results of my enquiry, although incomplete in some respects, have now been reported in my despatch No. 42 of the 26th of March.

5. The Land Tax Ordinance, 1918, imposed on land a tax according to acreage, irrespective of value, at the following rates :

	Rate per acre.
Under 5,000 acres	One farthing.
Over 5,000 but under 50,000 acres	One half-penny.
Over 50,000 but under 100,000 acres	Three farthings.
Over 100,000 acres	One penny.

6. The Ordinance further provides that the tax shall be assessed on ;

- (1) The acreage ascertained by a survey made by a qualified land surveyor.
- (2) Where no survey has been made
 - (a) The acreage stated in the Crown grant or lease.
 - or (b) When the acreage is not stated in the Crown grant or lease, then on what the Governor in Council declares to be the acreage.

7. No land-survey of the Colony has, in fact, been made or is contemplated. It was estimated in 1893, that the work of merely running lines to mark the principal boundaries on the ground, if carried out by qualified surveyors, would then cost, in the most favourable circumstances, over £10,000.

8. In practice the tax is assessed

- (1) In the case of five small holdings, of which the total area is about 50,000 acres, on the acreage as ascertained by survey.
- (2) In the case of all the principal stations with one exception, on the area as stated in the Crown grant or lease.
- (3) In the case of one large station, of which the acreage is not stated in the Crown grant, on the acreage as calculated at the Admiralty from the Admiralty chart.

9. It has been recognised that there was great carelessness in estimating the acreage when leases were originally granted, and that the quantity of land comprised within the boundaries defined in the leases exceeds the quantity which was stated in the leases. The acreages of the stations as stated in the instruments of title and as calculated by measurement from the Admiralty chart are given in Appendix XII to the Memorandum which accompanies my despatch No. 42 of the 26th instant. The excess in area is large and is not uniformly distributed.

10. The land has been shewn by long experience to be adapted only to sheep farming on a large scale and the industry is almost entirely dependent on the production of wool. Whatever be the form of direct taxation imposed on the industry it is reducible ultimately to a tax on the wool produced which is dependent on the number and quality of the sheep. The extremes of inequality in the land tax are shewn in the attached statement which gives, in respect of the particular stations, the acreage as stated in the instrument of title, on which acreage the tax is, in most cases, assessed, the acreage as calculated from the Admiralty chart and the average number of sheep carried for the twelve years from 1910 to 1921. The amount of taxation payable per sheep varies between 0.79 of a penny in the case of San Carlos North and 4.84 pence in the case of Fox Bay East. The stations of San Carlos North and South are adjacent to each other. They are assessed on the acreage stated in the instruments of title, the rate being one half-penny per acre in one case and three farthings in the other. There is little difference in the areas of the stations as calculated from the Admiralty chart and they carry exactly the same number of sheep but in one case the amount of direct taxation payable per sheep is 0.79 of a penny and in the other 1.69 pence.

11. I am of opinion that in the absence of a land survey and valuation it is impracticable to levy a land tax in this Colony on an equitable basis and after careful enquiry into the sheep farming industry I recommend for Your Grace's favourable consideration that

- (1) An export duty on wool should be substituted for a Land tax with effect from the 1st of January, 1924.
- (2) The rate of the export duty should be fixed at 1/- for 25 lbs.

12. A duty at this rate will yield, on an average annual export of 4,500,000 lbs of wool, a revenue of £9,000. This sum is slightly in excess of the amount of revenue (£8,700) which it was anticipated, in 1918, would be received from the Land Tax but the rate proposed will prove convenient in calculating the amount payable in duty when the wool is shipped.

13. The members of the Executive Council concur in the view that an export tax on wool should be substituted for Land Tax and an extract from the minutes of the meeting, at which the subject was discussed, is attached.

I have the honour to be,
My Lord Duke,
Your Grace's most obedient,
humble servant,
J. MIDDLETON.

HIS GRACE THE DUKE OF DEVONSHIRE,
P.C., K.G., G.C.M.C., G.C.V.O.,
SECRETARY OF STATE FOR THE COLONIES.

From The Secretary of State for the Colonies.

Downing Street,
27th June, 1923.

Sir.

I have the honour to acknowledge the receipt of Mr. Middleton's despatch No. 43 of the 26th of March, and to inform you that I approve his recommendations that (1) an export duty on wool should be substituted for a land tax, with effect from the 1st of January, 1924, (2) that the rate of the export duty should be fixed at 1/- for 25 lbs.

I have the honour to be,
Sir,
Your most obedient,
humble servant,

With reference to Item No. 12 of the schedule to the minute, the Hon. H. C. Harding asked that estimates of the comparative costs of stone and brick foundations, including the relative costs of mortar and labour necessary, might be obtained, as he considered that an economy could be effected by substituting local stone for brick.

The President stated that in compliance with the Honourable Member's request, the required figures would be furnished. His Excellency added that three thousand bricks were used in the foundation of the new double house, the landed cost of the bricks being £45.

On the motion of the Honourable the Treasurer seconded by the Honourable G. I. Turner, the minute was adopted.

4. The Honourable the Treasurer, by Command, laid on the table the following papers:-

- (1) Copies of all regulations and proclamations passed since the last meeting of the Legislative Council.

- (6) Comparative Statements of Revenue and Expenditure for the quarters ended the 30th June, 30th September and 31st December, 1922, and 31st March, 1923.
- (7) The Treasurer's Financial Report and Statements for the year 1922.

5. The Honourable the Treasurer moved and the Honourable G. I. Turner seconded the adoption of rules amending the Standing Rules and Orders of the Legislative Council passed on the 17th of December, 1921.

The amendments were adopted.

6. On the motion of the Honourable the Treasurer seconded by the Honourable G. I. Turner, the Bill "To legalise certain payments made in the year One Thousand Nine Hundred and Twenty-two in excess of the expenditure sanctioned by Ordinance No. 5 of 1921," was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 and 2, the schedule, the preamble and title were agreed to without amendment.

The Council resumed.

The Bill was then read a *third* time and passed.

7. On the motion of the Honourable the Treasurer seconded by the Honourable G. I. Turner, the Bill "To provide for the refund of a portion of the duties of Customs levied and collected in respect of Whale and Seal Oil, between the 1st of October, 1922 and the 30th of September, 1923, under Section 7 of the Tariff Ordinance 1900, as amended by the Tariff (Export Duty) Amendment Ordinance, 1920, if the market price of the Oil per ton, does not exceed £50," was read a *first* time.

The Bill was then read a *third* time and passed.

8. On the motion of the Honourable the Treasurer seconded by the Honourable G. I. Turner, the Bill "To validate the Liquidation of the Contribution of the Colony towards the expenses of the late war," was read a *first* time.

On further motion made and seconded the Standing Orders were suspended and the Bill was read a *second* time and committed.

Clauses 1 to 3 and the preamble and title were agreed to without amendment.

The Council resumed.

The Bill was then read a *third* time and passed.

9. The President intimated that a letter, dated the 10th of July, 1923, had been received from the Honourable H. C. Harding, tendering for the signification of His Majesty's pleasure, the resignation of his seat in the Legislative Council. The circumstances which had led Mr. Harding to this decision were due to the inaccessibility of Stanley from his residence at North Arm and his consequent difficulty in attending the meetings of Council and in keeping in touch with public affairs.

His Excellency said that while recognising that the reasons given were such that it was not possible to press Mr. Harding for a reconsideration of his decision, Honourable Members would view with much regret the severance of the Honourable Junior Unofficial member's connection with the Council. Mr. Harding had taken a keen interest in all questions affecting the welfare of the community and his advice had been of value to the Council.

Read and confirmed this 20th day of November, 1923.

H. HENNIKER-HEATON,

President.

G. R. L. BROWN,

Clerk of the Legislative Council.

Colonial Secretary's Office,

His Excellency the Acting Governor directs the publication, for general information, of the following report by the Imperial Institute on samples of Seal Oil obtained from Carcass Island, West Falkland :

By Command,
G. R. L. BROWN,
for Colonial Secretary.

M.P. 369/21.

IMPERIAL INSTITUTE
OF THE
UNITED KINGDOM, THE COLONIES AND INDIA.

Report on Seal Oil from the Falkland Islands.

The samples of Seal Oil which are the subject of this report were received at the Imperial Institute from the Crown Agents for the Colonies in March, 1923, and are referred to in a report by the Government Naturalist to the Colonial Secretary, dated the 19th January, 1922.

It was stated that the samples represented two grades of seal oil, one of which had been boiled once and the other twice.

Description :

The samples consisted of eight pint bottles of oil. On inspection it was found that the two grades could be readily distinguished by their colour.

The "single boiling" oil was slightly cloudy, pale yellow, and had a fairly strong fishy odour.

The "two boilings" oil was cloudy, golden yellow, and contained a considerable amount of stearin ; it had a stronger odour than the "single boiling" oil.

Results of Examination :

After hot filtration, the oils were examined with the following results, which are shown in comparison with corresponding figures recorded for commercial seal oil and whale oil :

PRESENT SAMPLES.	" SINGLE BOILILG."	" TWO BOILINGS."	COMMERCIAL SEAL OIL.	COMMERCIAL WHALE OIL.
Specific gravity at 15°/15° C. ...	0·9274	0·8717*	0·9244 to 0·9261	0·917 to 0·927
Refractive index at 40° C. ...	1·471	1·469	1·4685 to 1·4691	1·4633 to 1·4653

Acid value	1·2	1·4	0·4 to 40·0	1·0 to 200·0
Saponification value	189·7	190·3	189 to 193	187 to 189
Iodine value (Hubl, 17 hours), per cent	156·0	148·9	130 to 147	110 to 125
Unsaponifiable matter, per cent...	0·2	0·2	0·4 to 1·0	0·5 to 2·0

* At 100/15° C.

These results show that, with the exception of the iodine value and the solidification point of the fatty acids, the analytical constants of the present oils are very similar to those recorded for commercial seal and whale oils.

Commercial Valuation.

Both the oils were regarded in the trade as of good quality, and very similar in appearance. If filtered cold they would be particularly suitable for the manufacture of leather oils. One of the firms consulted by the Imperial Institute stated that they would be prepared to purchase a trial shipment of 100 to 200 barrels of the oils at about £30 per ton, barrels included, ex quay, Liverpool, provided that the consignment proved to be of equal quality to the present samples.

Remarks.

These seal oils are of suitable quality for the United Kingdom market, and consignments would be readily saleable.

If it is possible to forward a trial shipment of the oils of the quality of the present samples, the Imperial Institute will be glad to arrange for their sale. Information should be furnished as to the quantities which could be regularly supplied, and the price at which the oils could be delivered, ex quay, Liverpool.

THE COLONIAL AUXILIARY FORCES LONG SERVICE MEDAL.

His Excellency the Acting Governor directs the publication, for general information, of the Royal Warrant of the 25th January, 1923, promulgating new rules in substitution for those contained in previous Royal Warrants governing the issue of the Colonial Auxiliary Forces Long Service Medal, and of the Regulations issued by His Excellency in pursuance thereof :—

By Command,
G. R. L. BROWN,
for Colonial Secretary.

M.P. 999/21.

Royal Warrant of the 25th of January, 1923.

GEORGE, R.I.

GEORGE THE FIFTH by the Grace of God of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India : To all whom these Presents shall come Greeting :

WHEREAS Her late Majesty, Queen Victoria, did, by Royal Warrant dated the 18th day of May, 1899, institute and create a medal entitled "The Colonial Auxiliary Forces Long Service Medal" (hereinafter referred to as "the Medal") to be awarded to members of Our Colonial Auxiliary Forces in recognition of long and meritorious service, and did lay down rules and ordinances for the governance of the same, which rules and ordinances were subsequently amended by Royal Warrant dated the 3rd day of August, 1902 :

AND WHEREAS We desire to recognise specially the meritorious service of members of Our Dominion and Colonial Auxiliary Forces during the late war :

AND WHEREAS We also deem it expedient to promulgate new rules and ordinances in substitution for those contained in the aforesaid Royal Warrants :

NOW THEREFORE We do declare that the rules and ordinances heretofore in force shall be abrogated, cancelled and annulled, and We are pleased to make, ordain and establish the following rules and ordinances in substitution for the same which shall from henceforth be inviolably observed and kept :—

Firstly.—It is ordained that the Medal shall be awarded to duly qualified members of all authorised Auxiliary Military Forces (*i.e.*, other than Permanent Forces) of Our Dominions, Colonies and Dependencies (except India) and of countries under Our protection (hereinafter referred to as Protectorates), whether designated as Militia or Volunteers or otherwise.

Secondly.—It is ordained that the period of service requisite to qualify for the Medal shall be 20 years ; and that service on the West Coast of Africa shall reckon two-fold as qualifying service.

Thirdly.—It is ordained that service rendered wholly in the Auxiliary Forces of one or more of Our Dominions, Colonies or Protectorates ; or partly in the Auxiliary Forces of one or more of Our Dominions, Colonies or Protectorates ; partly in the Territorial Army of Great Britain, or partly in any Naval or Military Volunteer Force of any part of Our Empire (except service since 4th August, 1914, in the Volunteer Force of Great Britain raised under the Volunteer Acts, 1863—1916), shall be reckoned as qualifying service for the Medal.

Fourthly.—It is ordained that service on the Permanent Staff of the Auxiliary Forces of Our Dominions, Colonies, Dependencies or Protectorates by members of the Permanent Forces shall not reckon as qualifying service for the Medal.

Fifthly.—It is ordained that a member of the Auxiliary Forces of one of Our Dominions, Colonies, Dependencies or Protectorates who during the late war actually served, or accepted the obligation of serving, beyond the boundaries of the Dominion, Colony, Dependency or Protectorate, shall reckon all such embodied service on the active list two-fold as qualifying service towards the requisite 20 years, whether such service was in Our Naval Forces, Our Military Forces, or Our Air Forces.

PROVIDED that nothing in this Royal Warrant shall permit service to count more than two-fold towards the award of the Medal.

Sixthly.—It is ordained that service qualifying for the Medal shall also count towards the qualifying service necessary for "The Territorial Efficiency Medal," and *vice versa*.

Seventhly.—It is ordained that an officer who has served in the ranks of the Territorial Army of Great Britain, or of the Auxiliary Forces of a Dominion, Colony or Protectorate, but who is not qualified for the Colonial Auxiliary Forces Officers' Decoration, shall, on completing twenty years' service in all, be eligible to receive the Medal, but, should the aforesaid Decoration subsequently be conferred upon him, he shall not be called upon to surrender the medal, but shall not be permitted to wear it until such time as he has completed the full periods required for both Decoration and Medal.

Eighthly.—It is ordained that the Medal shall be conferred under such regulations as to grant, forfeiture, restoration, and other matters, in amplification of these Our rules and ordinances, as may with Our approval signified through one of Our Principal Secretaries of State, be issued from time to time by the Governors-General, Governors or officers administering the government of Our Dominions, Colonies or Protectorates, as the case may be.

Lastly.—We reserve to Ourselves, Our Heirs and Successors full power of annulling, altering, abrogating, augmenting, interpreting, or dispensing with these rules and ordinances, or any part thereof, by a notification under Our Royal Sign Manual.

Given at our Court at St. James's, this 25th day of January, 1923, in the thirteenth year of Our Reign.

By His Majesty's Command.

DERBY.

RULES GOVERNING THE APPORTIONMENT AND WORKING OF THE PEAT BANKS SITUATED ON CROWN LAND IN THE VICINITY OF STANLEY.

H. HENNIKER-HEATON,

Acting Governor.

Short title.

1. These Rules may be cited as "The Peat Banks Rules, 1924."

Officer responsible for observance of Rules.

2. There shall be an Officer-in-Charge of the Peat Banks, hereinafter referred to as the Officer-in-Charge, who shall be directly responsible to the Colonial Engineer for the satisfactory observance of these rules.

Apportionment of Peat Banks.

3. The use of the Peat Banks in the vicinity of Stanley is apportioned as follows:—

(a) A Peat Bank is allotted to each dwelling house in Stanley. The present recognized allotment of Banks is recorded on a list which may be inspected at the office of the Colonial Engineer.

(b) A limited number of Peat Banks is available for allotment to persons who are desirous of cutting peat for sale.

Quantity of Peat which can be cut in a Season.

4. The quantity of fuel which may be taken from any Peat Bank during a season shall be determined by the Colonial Engineer and shall be published in a list which may be inspected at the Colonial Engineer's Office,

Provided that, during the season following the allotment of a Bank, double the quantity stated in the list may be cut and stacked, in order to allow of one season's peat being in hand.

5. Except as hereinafter provided, the peat cut from any Bank allotted under Rule 3 (a) shall only be consumed within the premises to which the Bank has been allotted,

Peat to be consumed in premises to which Bank has been allotted.

Provided that the Officer-in-Charge may grant permission to a householder, on application, to cut from his Bank a quantity of peat for sale, not exceeding 75 cubic yards. This permission will only be granted in exceptional cases where neither the privileges of the owner of the house, nor the value of the neighbouring banks will be prejudicially affected.

6. The allotment of Peat Banks as provided for in Rule 3 (b) shall be made on application to the Officer-in-Charge, and, if approved, the applicant's name shall be registered. All such applications must be renewed annually, the Banks reverting to the Crown at the end of each season. The peat stacked on these Banks must be removed early in the season following that on which it is cut, if not previously disposed of.

Applications for Banks from which to cut peat for sale.

7. All peat must be cut out to bottom and the ends of Banks where the peat runs out must also be cut until a sound bottom is obtained. No bank shall be regarded as exhausted until all broken parts have been cleared and the ground left clear of peat. No new Bank will be finally allotted unless this Rule has been observed.

Banks must be exhausted before being abandoned.

8. The Peat Bank faces shall not be deeper than four feet. Where the Bank is over four feet, the face shall be worked back in step formation, the first cut being three feet deep and being carried back for a distance of fifteen feet before the second cut is commenced.

Depth of Bank faces.

9. Persons cutting in a bank, or opening a Bank, must rickle all the peat cut and, if unable to remove the peat during the season, must cause it to be stacked, clear of Banks and cart tracks. The peat so stacked must be removed during the next season. Failure to observe this Rule will render the Bank holder liable to the forfeiture of the peat cut and remaining on the ground.

Banks must be cleared of loose peat.

10. All top sods, after being removed from the top of the Bank, must be properly laid under foot, so as to form the top sod of the next cut or the top soil of a hard bottom.

Disposal of top sods.

11. Banks must be drained, as far as possible, and water in any quantity, which would become a source of danger, must not be allowed to lodge in the trenches. Neither must the trenches be left in such a condition as to render them liable to flood.

Water must not be allowed to accumulate in trenches.

12. If any person disobeys or fails to comply with any of these Rules or to carry out any proper directions of the Colonial Engineer in relation to the Peat Banks, the Governor in Council may order the reversion to the Crown of the use of the Peat Bank in respect of which an offence is committed.

Penalty for non-observance of Rules.

13. Nothing in these Rules shall limit, in any degree, the right of the Crown to resume any Peat Bank or part of a Peat Bank at any time and without compensation, where the public interest so requires.

Saving Clause.

Approved by the Governor in Executive Council at a meeting held on the 25th of April, 1924.

No. 49.

Colonial Secretary's Office,
Stanley, Falkland Islands,
30th June, 1924.

His Excellency the Governor directs the publication, for general information, of the following notes which have been received on Road Construction in marshy or mossy areas in Scotland :—

By Command,
H. HENNIKER-HEATON,
Colonial Secretary.

M.P. 218/24.

Notes on Road Construction on Marshy or Mossy Areas in Scotland.

Roughly speaking, if at all possible, moss should be excavated and cleared to the hard. The original cost of this will be made good in the long run. If, however, the moss is of too great depth to permit of clearing it away (in this country we make about 4 to 6 feet the maximum for such clearance) then the method described below may be used, and, if carried out in a proper manner, should give satisfactory results. While the importance of drainage must not be underrated, it has frequently been found that roads which are laid over moss are stronger in wet weather than in dry. This is no doubt due to the superior resilience of the moss in a wet condition. It should, of course, be understood that this is no argument for allowing the road crust itself to retain water.

In forming a macadamised road, if the ground is firm and dry, the only preparation required is to bring its surface to a true level ; should it, however, be at all wet or of a marshy character, the portion upon which the road is to be formed should be first carefully and thoroughly drained, which may usually be most effectively done by cutting deep drains running parallel to the intended course of the road on either side of it, and, if it is found necessary, *forming cross-drains between them having a fall each way.* The ground having been thus drained, a covering of turf or of brushwood, the latter not less than 6 inches in thickness when compressed, should be laid over the surface of the soft ground and upon this should be spread a covering of not less than 3 or 4 inches of clean gravel, the upper surface of which should be level. The foundation of the road should now be formed by laying a kind of rough pavement consisting of rough stones of any kind that can be most readily procured, laid carefully by hand with their broadest faces on the ground. These stones should not be less than 7 inches in depths at the sides, and the interstices between them should be carefully filled in with chippings, so that the upper surface when finished shall form a regular curve with a convexity of about 4 inches. The material for forming the surface of the road should then be laid on, forming a uniform coat 6 inches in thickness. For the centre portion of the road care should be taken to select a stone which is hard and not friable ; granite whinstone, and the harder limestones are the best suited for the purpose, and they should be broken not larger than $2\frac{1}{2}$ inches, that is to say, they should pass through a $2\frac{1}{2}$ inch ring. For the sides of the road, well cleaned, strong gravel may be used. A good binding of clean gravel perfectly free from earth and clay about 2 inches in depth should then be laid over the entire surface of the road. It is better to put only 4 inches of the broken stone at first, and after this has become consolidated by the traffic, then to lay on the remaining 2 inches, care being taken, however, to fill up any ruts which may have been formed.

The Annual Medical and Sanitary Report on the Falkland Islands for the year 1923.

(A) FALKLAND ISLANDS.

I. Administrative.

STAFF.

- A. Qualified Medical Staff.—The Colonial Surgeon, the Assistant Colonial Surgeon and the Colonial Dental Surgeon.
- B. Nursing Staff, English Trained.—One Nurse Matron and Two Nursing Sisters.
- C. Undergoing Training.—Two Nurse Probationers and One Dental Mechanic Apprentice.
- D. Subordinate Medical and Sanitary Staff.—One Inspector of Nuisances.
- E. Clerical Staff.—None.

The qualified staff consists of:—

(1) The Colonial Surgeon, who is also Port Health Officer, Medical Officer of Health, Prison Surgeon and Surgeon in charge of the King Edward VII Memorial Hospital, Stanley.

(2) The Assistant Colonial Surgeon who is a temporary officer under a three years contract. He attends at the out-patient department of the King Edward VII Memorial Hospital and certain Sheep Stations on the East Falkland Island, and,

(3) The Colonial Dental Surgeon, who is also a temporary officer under agreement.

Both the Colonial Surgeon and the Assistant Colonial Surgeon attend, free of charge, all Government Officials, their wives, families and servants: also all persons, irrespective of their position, financial or otherwise, who present themselves at the Hospital. They are only allowed to charge for attendance upon any patient who is admitted into the private wards of the Hospital. The Dental Surgeon attends Officials and their families free of charge as well as all school children under the age of fourteen.

All patients, admitted into the General Wards, are under the sole charge of the Colonial Surgeon, and receive free treatment; they must, however, pay for their maintenance while in the hospital. Officials their wives, families and servants pay half rates.

There is a well equipped maternity ward and a private labour ward, the existence of which, under an English trained Staff does not appear to be known on the South American Coast, as, many British residents there, would, without a doubt, prefer to come to the Falkland Islands, instead of having to go to England, in order to retain British nationality for their children.

There is no Lunatic Asylum and no provision for paupers other than three rooms in the hospital annexe.

FINANCIAL.

The following tables give the revenue and expenditure for the year ending 31st December, 1923:—

MEDICAL REVENUE.	£	s.	d.
Hospital Receipts	206	9	6
Sale of Medicines	44	17	0
Contribution from Farmers	250	0	0

	£501	6	6
	<hr/>		

MEDICAL EXPENDITURE.	£	s.	d.
Personal Emoluments	2374	5	8
Other Charges	777	2	11
	£3151	8	7

II. Public Health.

The general health of officials was good; none were invalidated, none died.

GENERAL DISEASES. Rare as usual.

COMMUNICABLE DISEASES. Insect borne. None.

INFECTIOUS AND EPIDEMIC DISEASES. There were seven cases of mild Chicken-Pox.

HELMINTHIC DISEASES. Oxyuris Vermicularis or threadworm is very prevalent here. Quite a large percentage of the native born inhabitants of Stanley suffer from this disease.

III. Sanitation.

The Colonial Surgeon and the Inspector of Nuisances inspect the condition of the town regularly.

The Sanitary condition of Stanley is deplorable, in fact one could justly say that there is no sanitary system other than that of dry earth and pails, which, while it fills the bill in other places; in a place so well adapted as this, for a water system, is much to be regretted.

RECOMMENDATIONS FOR FUTURE WORK.

Construction of proper roads, drains and a water supply, with a proper water sewage system.

The abolition of the present ash pits and the substitution of a proper scavenging system, with the use of covered garbage pails.

The erection of a refuse destructor by means of which the blue bottle pest will be got rid of.

IV. Meteorological.

The climate of the Falkland Islands has been compared to that of the North of Scotland. The average level of the Barometer in the Falkland Islands is rather low, being 29.6 inches at sea level (corrected for gravity) On the whole, the readings are highest in late winter and spring (July to October) and lowest in Summer (November to April). The comparatively low readings are due to the position of the Islands in the Southern Temperate Storm belt.

TEMPERATURE. The mean annual temperature is about 43 F. January is the warmest month (49 F.) and July the coldest (37 F.) giving an annual range of 12 F.

HUMIDITY AND CLOUDINESS. The number of overcast days is considerable and the average cloudiness is seven tenths of the sky covered. March and September have the clearest skies.

SUNSHINE. January and February are the Sunniest months, averaging 5½ hours per day, June is the dullest with an average of a little over 1½ hours per day. On a calm day the burning effect of the sun's rays upon the skin is worse than it is in tropical countries, but no cases of sunstroke have ever been recorded.

RAINFALL. The average fall is 26.43 inches per year. There are more rainy days in the Falkland Islands than in London.

WINDS. The prevailing wind direction is from the North-West, winds from the South-West and North are also frequent. During ten years there were 20 storms, with the barometer below 28.5. In 1923 conditions were far different from those of previous years; the winter being an exceptionally severe and long one; the summer not coming up to expectations.

V. Hospital.

OUT-PATIENT DEPARTMENT. There were 2319 attendances in the out-patient department of the King Edward Memorial Hospital during the year. As already mentioned above, these people were attended free of charge.

DENTAL DEPARTMENT.

The number of patients treated shows an increase over the previous year, in spite of the fact that the Colonial Dental Surgeon was absent for several weeks in the West Falkland Island. The figures also show a gratifying increase of approximately 10% in the proportion of teeth filled to that of the teeth extracted, compared with those of the previous year.

The number of children under 14 years of age, receiving free treatment was 37.

GOVERNMENT SCHOOL.

The children were frequently examined, and found to be healthy, clean and well cared for.

SHIPPING.

56 vessels were given pratique; their total tonnage was 91,618 and crews 2,801. No quarantinable disease was reported.

VITAL STATISTICS.

Births	Males	15	Females 20
Deaths	"	5	" 13
Birth rate per 1,000		16.06	
Death rate "	"	8.22	

VI. Prisons.

One prisoner was admitted during the year, he enjoyed good health. The prison was inspected regularly and was found to be in good order.

VII. Scientific.

The X-Ray installation at the King Edward Memorial Hospital was brought into use for the first time in 1923, and was remarkably successful, when it is taken into consideration that no proper arrangements exist for its use; it is much to be regretted that there is no dark room installed at the hospital where skiagrams could be developed, as thereby this apparatus would be rendered very much more efficient, and records could be kept for future reference or for the more satisfactory observation of changes and improvement in cases undergoing treatment.

The provision of a microscope and the allocation of a portion of the hospital for the use of such scientific apparatus as is available are urgently needed reforms, and are recommended for future work. The exceptional distance of this colony from any centre of production of chemicals renders the replacement of reagents difficult.

(B) DEPENDENCIES.

The total population of South Georgia was 1,477 in 1923 and it is estimated that about 1500 persons were employed at the South Shetlands and 90 men on the floating factory "Orwell" at South Orkney, during the whaling season. There is no British Medical Officer at South Georgia; the whaling companies operating there provide a medical man for their own crews. Two medical men, not British, accompany the whaling fleet to the South Shetlands; these medical men are employed by the whaling companies.

As no medical reports are received from the Dependencies of the Falkland Islands, no definite information as to the health of the population, floating or permanent, is available.

So far as can be ascertained, serious accidents are rare in all the Dependencies. No cases of infectious disease were notified from any of the Dependencies during the year 1923.

CONCLUDING REMARKS.

Of the cases undergoing major operation, the majority gave most gratifying results.

One of the cases upon which a laparotomy was performed had come under treatment several years too late. The patient had a history of chronic dyspepsia covering a period of seven years, and was of a very highly neurotic temperament; this patient had not sought medical advice but had been in the habit of taking patent medicines, although entitled to free medical treatment.

Immediately the abdomen was opened an extensive carcinoma of the transverse colon was discovered this was adherent to all the neighbouring structures, and moreover the mesenteric glands were involved; as no amelioration of the patient's condition was possible, the abdomen was closed and the patient returned to the ward where death ensued about 10 days later.

One of the breast cases, was a slow-growing sarcoma attached to the 7th costo-chondral junction. This had been treated as a corn, for a period of over two years. The patient recovered from the operation and was enabled to return home, but came under treatment eight months later suffering from the effects of metastasis. The disease terminated fatally.

G. R. L. BROWN,
Clerk of the Legislative Council.

Speech of His Excellency the Governor at the meeting of the Legislative Council held on 23rd July, 1924.

HONOURABLE GENTLEMEN,

My absence from the Colony has been more prolonged than I anticipated when I left you in June of last year, but I have thus been enabled to devote a considerable time in England to matters of importance to the Colony and its Dependencies. This has only been rendered possible by the loyal co-operation of Mr. H. Henniker-Heaton, who during my absence acted as Governor with so marked acceptability and success, and I desire to make a very warm and sincere acknowledgment of the invaluable assistance which he has given me at all times.

It is my pleasant duty to inform you that, when, shortly after my arrival in England I had the honour of being received in audience by the King, His Majesty was graciously pleased to recall the manner in which all the resources of these islands had been exerted to furnish a worthy welcome to the Detached Squadron which visited Stanley over 40 years ago and in which He was serving at the time, and to express a deep interest in the welfare of His people in the Falkland Islands and in the industry in which they are engaged.

That industry, I trust, is emerging from a period of depression which began in 1920, and the time seems opportune for considering the possibilities of strengthening it by development along economic lines and of securing its future stability and prosperity. The geological survey which was carried out in 1921 & 1922 has finally dispelled the vague hopes, which had been for so long entertained, of the occurrence of coal, oil and other valuable minerals. It has shown conclusively that the Colony possesses no minerals of economic value, and I cannot too strongly emphasise the view that we must remain dependent, as we have always been, on sheep farming. The dangers of dependence on a single industry, which is subject to serious market fluctuations, are well known and, in this case, have been amply demonstrated by our experience of the last four years. For these reasons and, with the object of initiating discussion of the problems affecting the industry, I made it my duty to collect such information as I could with regard to it, and I take this opportunity of acknowledging my indebtedness to those who are engaged in farming in the Colony for the very valuable assistance which they so readily gave me in my task. The information, which was collected, has been embodied in a memorandum which has been laid before you, and an examination of it will shew that

- (1) The area of this group of islands, as calculated from the Admiralty Chart, is approximately 4,600 square miles and not 6,500 square miles as has been previously stated in official reports.
- (2) The climate and the character of the soil are not favourable to securing the most successful results from sheep farming, especially in the breeding and rearing of lambs.
- (3) The number of lambs reared bears a low ratio to the number of ewes carried.
- (4) The aggregate number of sheep carried has decreased by 150,000 in the last 25 years.
- (5) Practically no land which is not too exposed for winter use is freed from stock for any part of the year.
- (6) The profitable disposal of the surplus stock has been a serious difficulty.

In submitting this report to the Secretary of State, I asked that advice should be sought from the Ministry of Agriculture and the Government of New Zealand as to

- (1) What research or experimental work should be undertaken by the Colonial Government with a view to securing the fullest possible use of the land and developing the sheep farming industry, and
- (2) what measures could be taken to increase the prosperity of the industry.

Both the Ministry of Agriculture and the Government of New Zealand pointed out the difficulties of advising in these matters with only a written report to go on and without first hand information. As a result of further representations made by me to the Secretary of State, the Government of New Zealand has delegated Mr. Hugh Munro, who is one of the most experienced officials of the Dominion Agricultural Department and a leading authority

on breeding, to carry out an investigation of the industry, and has agreed to allow Mr. R. W. Carter to take up the post of Chief Inspector of Stock for a period of five years. We are greatly indebted to the Secretary of State for the steps which have been taken to bring about an arrangement of so great importance to the farming industry and also to the Government of New Zealand for the valuable assistance which it has rendered in so readily consenting to the loan of officials of its Agricultural Department.

Through the good offices of the Secretary for Scotland and the Chairman of the Board of Agriculture for Scotland, arrangements have been made whereby the research work, which is most urgently required in connection with the low lambing-percentages, will be undertaken by the Institute with which the name of Dr. I. Quiller Rowett is associated. This institution forms part of the scheme of the Development Commission for promoting scientific research in agriculture and for securing the foundation of Research Institutes, each of which makes a special study of one branch of agricultural science. These permanent institutions insure (1) continuity of work which is necessarily of considerable duration and into which men have to educate themselves, and (2) the concentration of several men, differently trained, on the same group of problems. The ROWETT Institute at Aberdeen, has been established for the special work of Research in animal nutrition and for some time has been engaged, in connection with sheep farming in Scotland, on problems somewhat similar to those which call for solution in this Colony. The Falkland Islands investigations will be carried through as a part of the regular work of the Institute, and, to enable this to be done, it has been necessary to add to its subordinate staff. To meet the expenditure in this connection, you will be invited to approve of a grant of £250 being made to the Institute for the year 1924.

Samples of grasses from a number of farms have already been forwarded for examination and additional samples will be sent at a later date. Samples of soils from all parts of the Colony are being collected and will be forwarded without delay in order that a general soil reconnaissance may be carried out. The pathological and chemical examination of the bones of sheep and lambs will form an important part of the investigation, and the collection of the specimens, which are required, will be undertaken next spring.

Some of the problems which affect the sheep farming industry are of considerable complexity, and their investigation may be protracted. An interim report will be furnished at the earliest possible date by Dr. J. B. Orr, the Director of the Institute, whose able work in this branch of Scientific Research is well known, and he will later advise whether the investigations, in which he is keenly interested, should be continued. In the event of it being found to be of practical advantage to continue the work, it is proposed that a further grant of £250 should be made to the Institute in 1925.

You will be invited to approve of the grant or grants to the Institute and the expenditure in connection with Mr. Munro's visit to the Colony being defrayed from the Land Sales Fund, which at present amounts to over £180,000 and which, in addition to being a Reserve Fund in case of emergency, is at the disposal of the Colony for its development.

I hope that the recent substantial and somewhat unexpected increase in the market value of wool may permit of measures being taken for carrying out farm improvements which have been deferred. It is within my knowledge that, in the case of some farms, considered schemes of improvement, involving relatively large expenditure, will be proceeded with at once. In other cases and in present circumstances, this may not be possible and, in the absence of a Bank in the Colony, a measure will be submitted for your consideration authorizing loans for farm improvements from the Land Sales Fund to an aggregate amount not exceeding £30,000. The rate of interest will be 4 per centum, and the period of repayment 10 years.

Whatever be the improvements which may be carried out in the future, I consider that they will fail in attaining their full effect unless accompanied by co-operation among the Farmers, and perhaps in no branch of the industry is this more important than in the marketing of its products. It is possible for the individual Farmer to market his wool, which must always be his principal source of profit, but evidence is not lacking that one of the chief obstacles to the disposal of surplus stock to the best advantage has been the absence of co-operation. The export of live sheep has made irregular and uncertain contributions to the aggregate receipts. For a brief period in abnormal conditions a canning factory absorbed a large proportion of the surplus sheep, but it was compelled for financial reasons, to discontinue its operations, when a favourable market for its products ceased to exist. The records of the industry show that, from the earliest period of its history, the custom of disposing of the surplus sheep of each farm independently and separately has enforced the adoption of the wasteful process of reducing valuable food to tallow. Although this has at times proved

profitable, it has long been abandoned, I believe, in other sheep farming countries. I venture to suggest that a more certain and advantageous outlet for surplus stock is required and that it may possibly be found in the establishment of a refrigerating factory. In the interests of the industry and with the object of encouraging co-operation, which I regard as essential to the prosperity of the industry, I am prepared to recommend to the Secretary of State that the Government should contribute in a substantial measure towards the initial cost of a refrigerating factory.

You will be glad to know that endeavours are being made to induce the Companies, whose ships pass close to these islands on the voyage from New Zealand to England, to allow their vessels to call here periodically, in order that opportunities may be afforded for importing stock and merchandise from that Dominion.

The Reserve Fund to which I have alluded, has been built up from the payments which have been made since 1891 for the purchase of land and which have been invested in approved securities. The interest from these investments has been applied to the reduction of taxation and the total amount which has been credited to revenue in the years from 1920 to 1923, is £27,700 or an average of approximately £7,000 a year. I am of opinion that, without reducing appreciably the amount by which the general revenue has benefited annually from this source, part of the fund might be used with greater and more direct advantage to the Colony than is derived from investment outside the Colony. I seek your concurrence in this view and I trust that, when the proposals which I have outlined for using a part of this Fund for the assistance and development of the farming industry are submitted for your consideration, they may meet with your approval.

Lest the existence of this substantial reserve may give a more favourable impression of the financial position of the Colony than the facts warrant, it is necessary that the actual situation should be made clear. The Secretary of State's directions that the surplus of revenue over expenditure in the Dependencies should cease to accrue, as previously, to the surplus balances of the Colony, became effective from the 1st of January, 1920. In that and the three succeeding years the revenue from normal sources, excluding the Dependencies' share in the cost of the Central Administration, has been £31,002, £34,585, £29,536 and £30,115, or an average of £31,300, while for the same years the recurrent expenditure, excluding that on the measures, which you approved in 1921, for the protection of the Fur Seals, has been £28,251, £30,783, £33,452 and £29,669 or an average of £30,000. The revenue from normal sources has exceeded the recurrent expenditure by only a small amount, but, as the Departmental Staff of the Colony is responsible for and controls the general administration of the Dependencies, a proportion of the expenditure on Administrative Services is properly a charge on the revenues raised in the Dependencies. The computation of the amount has presented considerable difficulty and the share in the cost of the Central Administration which should be borne by the Dependencies, has formed the subject of a lengthy correspondence with the Secretary of State. The Colony received credits, in respect of the years 1920 and 1921, of £1,470 and £3,000 which I regarded as an inadequate remuneration for services rendered. For a period of five years from the 1st of January, 1922, the amount to be paid annually from Dependencies funds was fixed at £5000, and as the result of further discussion, it has been increased to £9000 for a period of five years from the beginning of the current financial period, on the express condition that a Patrol Boat is maintained by the Colony. In addition, all the charges on remittances, for which facilities are afforded by means of the currency note issue, will be retained by the Colony, and it is estimated that a sum of £1000 will be derived from this source in 1924.

At the time when you approved of the purchase of a Patrol Boat, the reported increase in the number of Fur Seals indicated that, if effective measures for their protection could be devised, the Expenditure would not be un-remunerative, and it had been laid down by the Secretary of State that it would be incumbent on this Government to undertake their protection even although considerable expense should be involved. It was recognized, however, that the revenue which might be realised during the early stages of experimental farming would be insufficient to meet the whole of the expenditure, and approval was given to the net deficit being met from the surplus cash balances, to which the revenues of the Dependencies had contributed, prior to 1920, in a very substantial measure. The investigations which have been carried out during the past three years have shown that, although a considerable nucleus remains of the great herds of Fur Seals which formerly frequented the Southern Seas, the actual number of these animals is very much less than earlier reports had indicated, and cannot be expected, at present, to make any appreciable contribution towards the cost of the protective measures. Apart from its economic aspects, the protection of the Fur Seal in these waters is a matter of great scientific interest and importance, and it is satisfactory

that means have been found whereby the maintenance of the Patrol Boat for the purpose for which it was acquired is assured, and that the Colony will continue to have the benefit of a vessel which has already proved of great service.

It will, I am sure be a matter of gratification to you to learn that His Royal Highness the Prince of Wales has been graciously pleased to signify his willingness to accept from the people of the Falkland Islands a rug made from the first consignment of fur seal skins which has been sent to England by the Government.

The small amount by which the annual revenue exceeded recurrent expenditure compelled me, when submitting proposals to the Secretary of State for improving elementary education and providing instruction beyond the elementary stage, to seek approval for expenditure on Education, in excess of the amount voted by you for the year 1923, being met from surplus cash balances. I am glad that there is now no need to have recourse to so unusual a financial arrangement: its only justification, even as a temporary measure, was the importance and urgency of the matter. The necessity for employing travelling teachers to give instruction to the children in country districts arose from two distinct geographical causes—land remoteness and water isolation. In recent years difficulty was experienced in obtaining teachers with even modest attainments and no experience. The arrangements had proved inadequate and unsatisfactory. The scheme which was inaugurated at the beginning of this year is in harmony with the policy which Education Authorities in thinly populated areas in Scotland are encouraged to adopt by the Scottish Education Department, and the words of a recent report of that Department are so appropriate to our own conditions that I have taken the liberty of making use of them. The scheme gives to the severely handicapped children, who live in remote districts, advantages which have previously not been considered possible. It certainly calls for no little self-sacrifice on the part of the parents on account of the separation from their children which it entails. I can understand and sympathise with their feelings, but they have shown themselves eager in the past to help with the education of their children, and I hope that, recognizing the handicaps consequent on the feeble equipment which the previous system could give, they will make the self-sacrifice and consent to their children being boarded in Stanley. Our thanks are due to the Very Reverend Dean Stanley Smith and the Trustees of Christ Church Cathedral for the valuable assistance which they have given to the scheme in making the Church House available as a Hostel and to the Directors of the Falkland Islands Company for the generous manner in which they have agreed to pupils, who are boarded in Stanley in order to attend the Government school, being allowed to travel at half rates by the steamship "Falkland."

It is to be expected that after these and other recurrent charges for essential services have been met, the increase in the annual receipts, which I have explained, will leave a balance which will permit of the execution of necessary works. In addition, the Colony possesses surplus cash balances to which, as has been stated, the revenues of the Dependencies contributed in a substantial measure and which at the 31st of March last amounted to over £50,000. The Secretary of State, on being informed of the pressing need for a determined and sustained endeavour to improve local conditions, agreed, in 1922, to the principle that the Colony should benefit from the Dependencies' surpluses prior to 1920, either by way of Capital Expenditure on a programme of improvements or by retaining, in the accounts of the Colony, the whole of the interest revenue on such surplus balances as it accrued. Capital from this source has already been expended, in an endeavour to relieve the very serious difficulty of housing in Stanley, on the erection, as an experiment, of four houses of different types. The Government is desirous of affording to residents in Stanley an opportunity of becoming the owners of the houses in which they live and of purchasing them by instalments spread over a period of years. If a demand is shown for the acquisition of houses on these terms, their construction will be proceeded with on a site which has been acquired for that purpose.

Having regard to what has already be written and the many defects which are known to exist, it is unnecessary I feel certain, that I should discuss at length the need for the improvement of the sanitary condition of Stanley. It is more important that, with your advice, it should be determined what works are financially practicable and that means should be devised for carrying them out as expeditiously as possible. I am of opinion that the very low ratable value of the Town does not permit of the strict application of the general rule that the cost of local improvements should be paid for by those who benefit directly from them, and I therefore submit for your consideration that a part of the surplus cash balances, to which I have alluded, should be allocated, to the improvement of the Capital of the Colony. It is necessary to set a limit to the amount, but it is not yet possible to give you full information

on that point. Towards the end of 1922, Mr. A. A. P. Neave was good enough to consent, with the sanction of the Lords Commissioners of the Admiralty, to report on the possibilities of improving the condition of the Town. He has given valuable assistance and advice and has put forward proposals for reconstructing the roads and drains, but the provision of a water supply has presented especial difficulties owing to the Town being situated on a narrow peninsula with a peculiar geological formation. Further investigations, however, are being carried out, and reports on the works proposed will be laid before you in due course.

Hitherto no expenditure has been incurred on public works outside the limits of the Town of Stanley. I am of opinion that the time has come when we should consider seriously the possibilities of improving the most frequented tracks and of building bridges where they are required. On representations made by the residents in West Falkland, materials have been ordered, at a cost of £500, for a bridge which is to be built over the Chartres River, and there are other localities in which bridges are no less needed. Apart from the convenience and advantages which a considered policy in this direction would prove to those engaged in the sheep farming industry, recent developments in motor vehicles, which are specially designed for use in roadless countries, indicate that it is possible that this type of vehicle may be found suitable as a means of transport in these islands.

You have already approved of expenditure being incurred on improving the approaches to the cemetery and the work will be proceeded with. The Imperial War Graves Commission has recently agreed to supply, in addition to headstones for those war graves which have no permanent mark, an Imperial War Cross of STANCLIFFE stone which is to be erected on the slope in front of the cemetery in memory of those who, having made the supreme sacrifice during the war, lie buried here. A number of these lost their lives in the naval engagement which took place near this island in 1914 and which is inseparable historically and geographically from the earlier engagement off Coronel. It will interest you to know that, in accordance with a scheme of the Imperial War Graves Commission under which the names of all those, who lost their lives in the war and have no known grave, are recorded on permanent memorials, the names of the crews of His Majesty's Ships "Good Hope" and "Monmouth" will be recorded on a memorial which will be erected at the port of commission of the ship in which they were serving. Their names will also appear in a special register, a copy of which will be obtained for record in the Colony.

Throughout the late war, and especially during a critical and anxious period in the latter part of the year 1914, very valuable services were rendered by the Falkland Islands Volunteer Force. It has recently been reorganised with a view to maintaining and increasing its efficiency, but it has always been very seriously handicapped by not having any accommodation for drilling. Two separate buildings, the original object of which was to provide such accommodation, have been constructed in Stanley at different times, but both have been appropriated to other uses. I feel sure that you will agree that, apart from other reasons, the climatic and weather conditions, make it imperative in the interests of the efficiency of the Defence Force, that a Drill Hall should be provided for its use. Plans are accordingly being prepared by the Crown Agents for the Colonies, in consultation with the Department of Fortifications and Works at the War Office, for a modest building which will be suitable as a Drill Hall, and in which provision will be included for a miniature rifle range. I trust that the cost will prove to be within our means and that you will approve of this work being proceeded with.

I pass to a brief review of the finances of the Dependencies. Towards the end of 1919 the export duty on whale and seal oil was increased from $3\frac{1}{4}$ d to $1\frac{1}{6}$ a barrel in order to provide funds for Research and Development in the Dependencies, and in consequence the revenue rose to £28,668 in 1920. In that year the duty was further increased for the same object to 5/- a barrel. The revenue, collected in the years 1921, 1922 and 1923 respectively, amounted to £88,832, £142,102 and £160,222, but the full amount of the duty collected on oil at the rate of 5/- a barrel has not been retained. Owing to the collapse of the market for whale oil, one half of the duties, collected between October 1920 and September 1921, was refunded and from the latter date a system of rebates, based on the average market price of oil, has been in operation. A refund of $1\frac{1}{6}$ a barrel has been made in respect of each season subsequent to that of 1920-1921, making the effective duty $3\frac{1}{6}$ per barrel. The amounts refunded in the years 1921, 1922 and 1923 respectively were £35,418, £7,471 and £33,933 and during the current financial period a sum of £44,839 has been refunded in respect of the duties collected for the season 1922-1923. You will be invited to approve of a refund of duty being made at the same rate for the season 1923-1924.

The local expenditure in the Dependencies and their share in the cost of the Central Administration amounted in the four years from 1920 to 1923 to £1,901, £3,249, £12,939 and £7,219 respectively. In addition there was paid from Dependencies' funds in 1923 a sum of £4,584 being the balance of the purchase price of the "Discovery," and approximately £11,000 in connection with the reconditioning of this vessel. The completed accounts, for the year ending the 31st of December last, show that at that date there stood to the credit of the Research Fund and the general account of the Dependencies an aggregate sum of £315,795, but against this there was a liability of £44,800 in respect of the refund of customs duties. Since these accounts were made up a further sum of £11,770 has been paid for the reconditioning of the "Discovery," and some adjustments have been made of outstanding accounts between the Colony and the Dependencies. The bulk of the revenue of the Dependencies is collected in the first half of the financial year and it is estimated that, after allowing for the refund of customs duties in respect of the season 1923-24, the funds available, at the present time, for Research and Development in the Dependencies amount to approximately £300,000.

The accumulation of this considerable fund has enabled preparations to be proceeded with for carrying out the investigations which are recommended in the report of the Interdepartmental Committee on the Dependencies. That these investigations are about to be undertaken is due, in the first instance, to the initiative of Mr. E. R. Darnley of the Colonial Office who, in a series of memoranda prepared in 1917, drew the attention of the Secretary of State to the questions of the development of the Dependencies and the preservation of the whaling industry. It was pointed out that excessive hunting had resulted in the collapse of whaling in other waters and that the amount of the scientific knowledge available was insufficient to enable the industry to be controlled in such a way as to afford security against the depletion of the stock. In view of the interest which the proposed investigations have aroused in the scientific aspect of whaling, it is important to place on record that from an early stage in the development of the whaling industry in the Dependencies, as effective control as circumstances permitted has been exercised; the number of vessels licensed to hunt whales has been restricted; measures have been taken for protecting female whales accompanied by calves and species shewing a diminution in number; and regulations have been enforced to prevent the waste of raw material. While it has always been recognized that these measures "although framed in the light of the best technical opinion lack a firm basis of definite scientific knowledge" it is satisfactory to note that in a recent report the laws and regulations in force in the Dependencies are recommended as a model for consideration in relation to the whaling industry in South Africa.

An Executive Committee, of which Mr. E. R. Darnley is Chairman and on which the Admiralty, the British Museum, the Ministry of Fisheries and the Royal Geographical Society are represented, has been appointed to control the proposed investigations subject to the instructions of the Secretary of State for the Colonies. Full advantage has been taken of the power, which has been given to the Committee, to co-opt either for special purposes or for a limited period such experts as are best qualified to advise on the matters under deliberation. The Committee has not been empowered to incur any expenditure on its own authority, and every payment has been made on the express authority of the Secretary of State. This procedure will be continued until capital expenditure has been completed, and subsequently the Committee will be required to work to estimates, to be approved by the Secretary of State. It has accordingly become necessary to take steps to place the Fund for Research and Development in the Dependencies on a permanent footing, and it is proposed that the procedure of the Imperial Government in the case of the Development and Road Improvement Fund should be followed and adapted to local circumstances. A bill has therefore been drafted for this purpose and will be submitted for your consideration.

The scope of the investigations has been described at length in the Report of the Interdepartmental Committee, and in the correspondence which preceded the appointment of that body special stress was laid on the economic objects of the proposed research expedition as constituting its primary mission. At the outset the work will be directed mainly to the collection of information as to the distribution and movement of whales, their life history and their food, and the knowledge so acquired will indicate the lines on which subsequent investigations should be pursued. Hydrographic Survey, on the scale originally contemplated, is not immediately practicable as the Admiralty is unable to second for this service officers who have been trained in Marine Surveying and as only one vessel is at present being employed. The "Discovery" will, however, be provided with the equipment necessary for surveying, and such opportunities as the programme of work permits will be taken advantage of in surveying coasts and harbours. The possibility of the vessel carrying a full sized commercial trawl is being considered, and it is hoped that a beginning may be made with the important work of examining the possibilities of establishing a fishing industry in these waters where workable accumulations of marketable fish are reputed to exist.

An important part of the investigations will be carried out on shore and for this purpose a Marine Station will be established in South Georgia at Cumberland Bay with a staff composed of three Zoologists and a Hydrologist. The design for the building for the Marine Station is the outcome of the deliberations of a special committee, of which two members have had experience of antarctic weather conditions, and the plans, which are now submitted to you, show that the method of construction is a great improvement on any work which has previously been undertaken in the Dependencies.

After prolonged and careful consideration, Dr. Stanley W. Kemp, D.Sc., Superintendent of the Zoological Survey of India, has been appointed Director of Research and five Zoologists and two Hydrologists have been appointed to the Scientific Staff. Lieutenant J. R. Stenhouse, D.S.O., O.B.E., D.S.C., who has had practical experience of Antarctic navigation in peculiar difficulties, has been appointed Master of the "Discovery."

The reconditioning of the "Discovery," which was acquired in the early part of last year for the purposes of the investigations, is being pressed on. Owing to the quantity of wood-work affected by dry rot, the necessary repairs have proved far more extensive than could be ascertained until the ship had been opened up, and difficulty has been experienced in obtaining suitable timber of the high quality which alone can be used. A contract was made with Messrs. Vosper & Co. of Portsmouth for reconditioning the vessel at a cost of £33,758 and for the supply of spare gear to an amount of £4,529. In drawing up the specifications the Naval Architects provided a schedule of rates for work which it was anticipated would be executed but which could not be included in the contract. As the vessel has been opened out in the course of the work of reconditioning it has become apparent that further additional work is necessary and some of this does not come within the rates of the schedule to the contract, the work being of a more expensive character and in addition to that upon which the tender was based. It was estimated, in March last, that an expenditure of £7,243 would be incurred under the schedule to the contract and that a further sum of £7,316 would be required for work which does not come within either the contract or the schedule to it, bringing the total estimated expenditure on the reconditioning of the vessel to £52,846. Under the contract the work of reconditioning the "Discovery" should have been completed in January last but owing to the extent of the work which has had to be undertaken the vessel will not be ready to put to sea until towards the end of this year.

The question of the construction at Stanley of a slipway and workshops for the repair of whaleboats has been under consideration for a number of years and similar facilities for the "Discovery" and vessels employed in these islands are no less necessary. The Government is not prepared to undertake the management of such works but is anxious to assist in their establishment. With this object in view negotiations are proceeding with the Falkland Islands Company for the construction of a slipway, capable of taking the "Discovery," and suitable workshops, on the understanding that a site will be given free of rent and that a grant, upon which no interest will be payable, of one third of the capital cost, will be made from Dependencies' funds. It will be necessary to provide the slipway with hauling gear capable of dealing with approximately 1,400 tons and a fairly powerful generating plant will be required. As this will only be used in the day time I hope it may be found possible, if the project proceeds to completion, to supply power for lighting the streets and houses in Stanley.

Recent developments in Wireless Telegraphy have brought about a very great reduction in the initial cost of establishing communication by this means. After tests carried out over four years ago, it was estimated that the wireless equipment of a station in South Georgia which would give regular communication with Stanley would cost about £16,000 in England. The present cost of a six kilowatt valve transmitting plant, together with receiving gear and self supporting towers but exclusive of the station building, is approximately £5,500. This equipment is considered sufficiently powerful to give reliable communication both with Stanley and with Cerrito, which is distant 1,400 nautical miles, and the Secretary of State has approved of a contract being entered into with the Marconi Company for the installation of a station of this type at Cumberland Bay. The large increase in wireless traffic during the whaling season and especially with the South Shetlands calls for improvement in the station at Stanley, and proposals have been submitted to the Secretary of State for providing the station with the equipment necessary to enable the traffic to be dealt with more efficiently and expeditiously than has been possible hitherto. With a view to facilitating communication with England arrangements have been made with the Western Telegraph Company for a deferred telegram service at an inclusive charge of 2/6½ a word and with the Marconi International Marine Communication Company for a postal radiotelegraphic service at specially low rates.

The establishment of direct communication between Stanley and the Dependencies is of primary importance and you will be invited to approve of a contract being entered into with the Tonsberg Whaling Company for a steamship service between Stanley and South Georgia and the South Shetlands. The terms of the proposed agreement are fully explained in a minute which I have addressed to you on the subject. In the first instance the whole of the proposed subsidy will be a charge on the revenue of the Dependencies but the incidence of the charge will be reconsidered at a later date if the service should prove an appreciable economic advantage to the Colony.

You will realize that the representation of the Colony and its Dependencies is only a small item in the "vast rallying of the Empire's life and product" at Wembley but we may justly feel some pride in the share which we have taken, so far as our resources have permitted, in the making of the "greatest exhibition which the world has ever known" and in being associated with all which that "picture of our Commonwealth of Nations" symbolizes. The photographs, which have been received, give a general idea of the Court of the Falkland Islands and their Dependencies at the British Empire Exhibition, and show how successful Mr. W. A. Thompson, the Commissioner, has been in displaying the exhibits to the best advantage and in making the Court attractive. The excellent collection of exhibits, which was sent from the Colony, has proved of great interest. The horse gear has been particularly admired and I trust that those who are skilled in this work will not allow this very useful craft to become forgotten. Models of whaleboats and samples of the gear used in, and of the products of whaling have been kindly lent by Companies which are engaged in that industry. The Council of the Royal Geographical Society has been good enough to allow its model of the "Discovery," as originally built, to be shewn, and there is also a model of the vessel as she will be when her reconstruction is completed.

A remarkable feature of the Exhibition will be observed in the vivid models of the art, industry, and history of the Empire. Those, which find a place in the British Government Pavilion, were constructed in a special branch of the Department of Overseas Trade, and the spacious accommodation required for its work was provided at the War Office. This Department very generously undertook to construct for the Court of the Colony a model of Stanley Harbour shewing the positions of the British and German Squadrons on the morning of the 8th of December, 1914. Our thanks are due to Captain STANLEY WILTON, R.N., the Controller of the Department, not only for the arrangements which have permitted of the model being made under the supervision of his highly skilled staff, but also for the personal interest which he has taken in it. It is intended that, at the close of the Exhibition, this model should be sent to the Colony, and when it was being constructed special measures were taken to strengthen it in order to lessen the risk of damage in transit. There has also been built up in the Court, by a firm which specializes in such work, a model representing a scene in the South Shetlands which has proved a great attraction.

We are greatly indebted to Mr. Vere Packe and Mr. W. A. Harding for the valuable work which they have done as representatives of the Colony on the West Indian and Atlantic Group Committee of the Exhibition. Mr. Packe has been a member of this Committee since it was constituted in 1922, and on behalf of the Colony I have asked him to accept a seal skin rug, which forms part of the exhibit, as a memento of the Colony's participation, for the first time, in an exhibition in England.

A book entitled "A Naturalist at the Falkland Islands," by Mr. H. Vallentin and Miss V. F. Boyson, is about to be published by the Clarendon Press. Mr. Vallentin's notes on Natural History have been edited and expanded by Miss Boyson who has added to the volume a section on the history of the Colony. The Delegates of the Oxford University Press regard the book as a "valuable contribution to Colonial History," but owing to the smallness of the Colony they cannot anticipate sufficient sale to cover the cost of production. In these circumstances, and in anticipation of your approval, I have agreed to a grant in aid of £100, being made towards the publication of the work.

I conclude with a reference to a matter which, although the Government is not directly concerned, is of great interest to all of us. The Committee of the Falkland Islands Battle Memorial Fund has asked for permission to erect a monument, in grey granite and bronze, on Victory Green, and with the concurrence of the residents in Stanley, I propose to accede to the request of the Committee.

J. MIDDLETON.

Financial Report for the Year 1923.

COLONIAL TREASURY,
Stanley, Falkland Islands,
15th July, 1924.

The Honourable
The Colonial Secretary.

I have the honour to submit herewith the Financial Returns and Statements called for under Colonial Regulation 396, in respect of the year of account ended 31st December, 1923.

The Falkland Islands.

2. The ordinary Revenue for the Falkland Islands, exclusive of the Dependencies share of the cost of Central Administration, amounted to £30,115 : 12 : 2. The ordinary Expenditure for the Falkland Islands (excluding "Extraordinary") amounted to £32,553 : 16 : 6.

3. During the year a sum of £5,000 was transferred from Dependencies Funds to Falklands Revenue under Head IX., "Contribution from Dependencies to cost of Administration."

4. The ordinary Revenue for the Falkland Islands, inclusive of the above-mentioned sum of £5,000, amounted to £35,115 : 12 : 2, as against the Ordinary Expenditure of £32,553 : 16 : 6, leaving a surplus of Revenue over Expenditure of £2,558 : 15 : 8.

5. The total Revenue for the Falklands for the year, including Land Sales (£12,573 : 14 : 4) and Marine Insurance Fund (£106) amounted to £47,795 : 6 : 6. The total Expenditure for the Falklands for the year, including "Extraordinary" payments (£10,313 : 18 : 2) and Land Sales (£4,500) amounted to £47,367 : 14 : 8.

6. The following amounts were included in Falkland Islands "Expenditure Extraordinary," viz. :—

1. Housing Scheme	£5,876 : 15 : 10
2. Balance of purchase of Patrol Boat "Afterglow"...					281 : 13 : 2
3. Amount transferred to Savings Bank Depreciation Fund...					1,518 : 7 : 3
				Total	£7,676 : 16 : 3

7. The total Expenditure for the Falkland Islands, excluding the above-mentioned sum of £7,676 : 16 : 3, amounted to £35,190 : 18 : 5, as against a total ordinary Revenue of £35,115 : 12 : 2, leaving an excess of Expenditure over Revenue of £75 : 6 : 3.

8. Land Sales Fund. During the year a sum of £4,500 was authorized to be expended from this Fund on the purchase of House and Land property.

Falkland Islands Revenue.

9. The total ordinary Revenue for the Falkland Islands for the year excluding Dependencies contribution (£5000) amounted to £30,115 : 12 : 2. It was £579 : 17 : 8 more than that collected in 1922, and was under the original Estimate for 1923 by a sum of £2,462 : 7 : 10.

10. The following Heads of Revenue failed to realize the amounts originally estimated for 1923 by a sum of £2,509 : 16 : 4, viz. :—

Head I.	Customs Duties	£ 31 : 2 : 6
III.	Internal Revenue	8 : 12 : 2
IV.	Fees, Fines	295 : 12 : 7
V.	Interest	1,087 : 17 : 0
VI.	Post Office	92 : 5 : 4
VII.	Rents	1 : 7 : 11
VIII.	Miscellaneous	992 : 18 : 10
		<hr/>
		£2,509 : 16 : 4

The original Estimate for the year was exceeded under one Head only, *viz.* :—

Head II.	Port Dues	£ 47 : 8 : 6
		<hr/>
Net decrease ...		£2,462 : 7 : 10

11. Head I.—Custom Duties. Import Duties on Wine, Malt and Spirits failed to realize the original Estimate by a total sum of £349 : 8 : 11. On the other hand Import Duty on Tobacco exceeded the original Estimate by a sum of £318 : 6 : 5, leaving a net total decrease under Head I. of £31 : 2 : 6.

12. Head IV.—Fees, Fines, &c. Decrease under this Head is partly accounted for by the falling off of receipts under Item 1, Supreme Court (Probate Duties). Item 12, "Hospital Fees" and Item 15, "Sale of Medicines" would appear to have been over-estimated. Decrease under Item 9, "Launch Fees" is accounted for by the fact that certain fees payable in 1923 were not collected and paid in until 1924.

13. Head V.—Interest. During the year there was less surplus cash available for short Investment. Decrease under Item 3, "Bank Deposit, &c." is thus accounted for.

14. Head VI.—Post Office. Item 1, "Sale of Stamps" was under the original Estimate by a sum of £441 : 0 : 6. Decrease under this Item was mainly due to the new issue of Postage Stamps failing to realize anticipated sales. On the other hand other Items under this head, notably Item 6, "Wireless Messages," exceeded the original Estimate.

15. Head VIII.—Miscellaneous. The decrease of £992 : 18 : 10 under this Head is partly due to the fact that there were no receipts during the year under Item 7, "Sale of Sealskins" which was originally estimated at £1,600.

Falkland Islands Expenditure.

16. The total ordinary Expenditure for the Falkland Islands for the year amounted to £32,553 : 16 : 6. It was under that expended in 1922 by £4,606 : 4 : 7, and was under the original Estimate for 1923, by a sum of £5,036 : 3 : 6.

17. The total Expenditure for the Falkland Islands for the year amounted to £47,367 : 14 : 8. It was under the Expenditure for 1922 by a sum of £4,365 : 7 : 1, but exceeded the amount originally estimated for 1923, by a sum of £5,977 : 14 : 8.

18. Excess Expenditure over the original Estimate for 1923 was incurred under the following Heads, *viz.* :—

Head I.	Pensions	£ 7 : 7 : 7
IX.	Medical	373 : 10 : 6
XII.	Scientific	4 : 17 : 10
XIII.	Military	10 : 19 : 1
		<hr/>
		£ 396 : 15 : 0
XVIII.	Public Works Extraordinary...	4,713 : 17 : 9
	(b) Miscellaneous	1,800 : 0 : 5
	Land Sales	4,500 : 0 : 0
		<hr/>
		£ 11,410 : 13 : 2

19. On the other hand Savings amounting to £5,432 : 18 : 6, were effected under the following Heads, *viz.* :—

Head II.	The Governor	£ 202	:	4	:	7
III.	Colonial Secretary	104	:	0	:	4
IV.	Treasury and Customs	13	:	16	:	1
V.	Post Office	945	:	3	:	0

XIV.	Stock Department	195	:	17	:	7
XV.	Miscellaneous	1,492	:	13	:	4
XVI.	Public Works Department	312	:	13	:	2
XVII.	Public Works Recurrent	857	:	14	:	9
							£5,432 : 18 : 6	
				Net Decrease ...			£5,977 : 14 : 8	

20. Head 1.—Pensions. Increase due to Pensions payable in 1922 not having been paid until 1923.

21. Head IX.—Medical. Increase under "Assistant Colonial Surgeon" caused by leave salary of late Assistant Colonial Surgeon overlapping that of present holder. Increase under "Nurses" is similarly explained. Item 4, amount originally estimated insufficient to cover cost of maintenance of criminal lunatic in the United Kingdom. Item 8, original Estimate insufficient to cover cost of furniture needed for the Hospital. Item 9, original Estimate insufficient to cover cost of dental drugs and appliances. Item 10, Increase caused by purchase of necessary spares for X-Ray apparatus.

22. Head XII.—Scientific Department. Salary of Forest Officer for December, 1922, not paid until 1923. Payments amounting to £53 : 5 : 0 under "Geologist" not provided for in original Estimate. Savings effected under other Items reduce the net total increase under this Head to £4 : 7 : 10.

23. Head XIII.—Military. Allowance to Adjutant (£48 : 13 : 1) not provided for. Savings effected under other Items reduce the net total increase under this Head to £10 : 19 : 1.

24. Increase under Head XVIII., Public Works Extraordinary, is explained by the special Expenditure set out in para. 6.

The Falkland Islands Marine Insurance Fund.

25. During the year a sum of £106 was charged against Head VI., Port and Marine and credited to the Marine Insurance Fund. At the close of the year the Fund amounted to £212.

The Falkland Islands Land Sales Fund.

26. On the 1st of January, 1923, the Land Sales Fund amounted to £174,379 : 2 : 10. During the year a sum of £4,945 : 15 : 2 was received for Land purchased and a further sum of £7,627 : 19 : 2 as instalments of Land purchases, the total of £12,573 : 14 : 4 being credited to the Fund. During the year a sum of £4,500 was paid from the Fund (*vide* para. 8) leaving a balance standing to the credit of the Fund at the close of the year amounting to £182,452 : 17 : 2. The Securities held by the Crown Agents on behalf of the Land Sales Fund on the 31st December, 1923, amounted to £186,548 : 7 : 9. The Fund was therefore over-invested on that date by a sum of £4,095 : 10 : 7. Action has been taken to effect adjustment.

Falkland Islands Surplus and Deficit Account.

27. On the 1st January, the Surplus ordinary Revenue that had accumulated to the credit of the Falkland Islands in the general account of the Colony amounted to £45,522 : 3 : 2, which added to the total ordinary Revenue for the year (£35,115 : 12 : 2) makes a total of £80,637 : 15 : 4. This amount less the total Expenditure for the same period (£42,867 : 14 : 8) leaves a surplus balance of ordinary Revenue to the credit of the Falkland Islands at the close of the year of £37,770 : 0 : 8.

28. On the 1st January, the total surplus Assets standing to the credit of the Falkland Islands, as calculated in accordance with the provisions of Colonial Regulation 344, amounted to £220,007 : 6 : 0, which added to the total Falklands Revenue for the year (£47,795 : 6 : 6), makes a total of £267,802 : 12 : 6. This amount less the total Falklands Expenditure for the same period (£47,367 : 14 : 8) leaves surplus Assets to the credit of Falkland Islands on the 31st December, 1923, amounting to £220,434 : 17 : 10, and made up as follows :—

Land Sales Fund	£182,452	: 17	: 2
Marine Insurance Fund	212	: 0	: 0
General a/c (Falkland Islands)	37,770	: 0	: 8
				<hr/>		
Total	...	£220,434	: 17	: 10		

Dependencies.

29. The ordinary Revenue for the Dependencies for the year exclusive of "Research Fund" amounted to £160,220 : 17 : 0, as against a total Expenditure for the same period amounting to £7,435 : 19 : 1, leaving a surplus Revenue over Expenditure of £152,784 : 17 : 11.

30. During the year a total sum of £230,068 : 2 : 3 was transferred to the credit of the Research Fund and entered in the accounts as a charge on the Dependencies Revenue.

Dependencies Revenue.

31. The ordinary Revenue for the Dependencies for the year amounted to £160,220 : 17 : 0. It was £18,118 : 17 : 4 more than that collected in 1922, and it exceeded the original Estimate for 1923, by a sum of £60,750 : 17 : 0.

32. The undermentioned Revenue Heads exceeded the amounts originally Estimated for 1923 by a sum of £60,930 : 17 : 0, viz. :—

Head I.	Custom Duties :					
	(a) Imports	£ 197	: 17	: 8
	(b) Exports	58,662	: 10	: 6
II.	Port Dues	31	: 10	: 0
III.	Internal Revenue	450	: 0	: 0
IV.	Fees, Fines	89	: 12	: 9
VII.	Rents	500	: 0	: 0
VIII.	Miscellaneous	999	: 6	: 1
				<hr/>		
				£60,930 : 17 : 0		

33. The following Head failed to realize the amount originally estimated, viz. :—

VI.	Post Office	180	: 0	: 0
<hr/>									
Net Increase ... £60,750 : 17 : 0									

Head VI.—Post Office. Stamp Stock at South Georgia is kept under a standing Advance account. As sales take place fresh supplies are periodically requisitioned from Headquarters and payment for same is credited to this Head under Dependencies Revenue. The decrease under this Head is explained by the fact that at the beginning of the year the stock of stamps in hand at South Georgia was sufficient to last for some months and in consequence the value of stamps requisitioned during the year was comparatively small.

34. Head I.—Custom Duties (b) Exports was under-estimated, allowance having been made in the original Estimate for refund of whale oil duties. Increase under VIII., Miscellaneous (Remittance Charges) is similarly explained.

Dependencies Expenditure.

35. The total Expenditure for the Dependencies for the year, excluding "Charges on Dependencies Revenue" and Disbursements made from the Research Fund amounted to £7,435 : 19 : 1. Cost of Telegrams transferred ...	4	:	15	:	5
Sundry Charges and Expenses ...	423	:	14	:	3
	Total Disbursements ...	£49,931	:	17	0

41. The ordinary Revenue for the Dependencies for the year amounted to £160,220 : 17 : 0, as against a total Expenditure for the same period of £7,435 : 19 : 1, leaving a surplus of Revenue over Expenditure in respect of the year ended 31st December, 1923, amounting to £152,784 : 17 : 11.

42. During the year a total sum of £230,068 : 2 : 3, "Charges on Dependencies' Revenue" was transferred to the credit of the Research Fund. In addition a sum of £4,394 : 3 : 1, representing Dividends on Investments, &c., was collected by the Crown Agents and credited direct to the Fund, making a total sum transferred amounting to £234,462 : 5 : 4, *vide* para. 39.

This amount less the total General Expenditure for the same period (£287,435 : 18 : 4) leaves at the close of the year Surplus Assets amounting to £315,794 : 15 : 7, made up as follows:—

Research Fund	£300,301	:	15	:	3

48. It is regretted that there has been some delay in furnishing this Report and the attached Financial Returns. The Accounts for the year 1923 could not be closed until the South Georgia Accounts for the month of December were received. Owing to irregular and infrequent communication with that Dependency there was unavoidable delay in transmission of the accounts in question.

I have the honour to be,

Sir,

Your obedient servant,

M. CRAIGIE-HALKETT,

Acting Colonial Treasurer.

Downing Street,
16th August, 1924.

Sir,

In his Circular despatch of the 17th of June, 1911, the late Viscount Harcourt discountenanced attempts on the part of Colonial officials to seek the influence of Members of Parliament and others in this country as a means of bringing their services to the notice of the Secretary of State with a view to consideration for promotion.

2. *Lord Harcourt pointed out that arrangements were in existence in the Colonial Office which ensured due consideration of the claims of all suitable officers on the occurrence of vacancies ; and observed that the attempts which had been made to obtain promotion by irregular means had not been of advantage to the officers concerned.*

3. *From recent correspondence which has reached me I have formed the opinion either that the warning issued by Lord Harcourt's directions is not now generally known, or that the grave view of the practice taken by the Secretary of State is insufficiently realized. I have to request, therefore, that steps may be taken, by the publication of this despatch in the Gazette and by any other means available, to warn public officers that a proceeding such as that which has been deprecated will serve no useful purpose and, on the other hand, may actually be detrimental to the interests of those concerned.*

I have the honour to be,

Sir,

Your most obedient, humble servant,
(for the Secretary of State)

ARNOLD.

No. 85.

Colonial Secretary's Office,
Stanley, Falkland Islands.

21st November, 1924.

His Excellency the Governor directs the publication, for general information, of the following report by H. Munro, Esquire, Stock Commissioner, on the condition of Stanley Common. The Government is prepared to consider any representations that may be made by parties likely to be affected, as it is proposed to give effect to the recommendations generally.

By Command,

H. HENNIKER-HEATON,
Colonial Secretary.

M.P. 709/24.

Stanley, Falkland Islands,
4th November, 1924.

The Honourable
the Colonial Secretary.

Sir,

As suggested by you I rode over the Common yesterday in company with the Chief Constable, in order to determine whether I could submit any suggestions that might be of assistance in connection with the Stanley milk supply.

At present the area is divided into two paddocks by a fence running from behind Government House to the easterly corner of Mullet Creek Farm, but this does not prevent the dry stock from crowding on to and eating out the camp immediately behind Stanley, which should, in my opinion, be completely reserved for cows that are actually being milked and those within say fourteen days from calving.

I am of opinion that substantial benefit would be derived by sub-dividing the area into four paddocks in a manner that would enable sufficient of the Stanley frontage to be reserved for the class of cattle referred to in the preceding paragraph.

This would also enable the best use to be made of the outlying portions of the area for grazing dry stock.

I suggest that no dry cattle, other than those close to calving, should be allowed on the front sub-divisions, and that persons desiring to graze horses on them should pay double the ordinary fee. The extra feed that should be available for horses under the altered conditions would justify this.

I suggest that the public should not be permitted to graze steers on any portion of the reserve, and that they should be strongly discouraged from grazing more or less useless animals of any kind.

In event of the grass getting ahead of requirements on the front sub-divisions at any time dry cattle could be turned in to clean it up, and it should be good policy therefore to make these sub-divisions sufficiently large to provide for all possible requirements.

I recommend that a certain percentage of the revenue, say Twenty-five Pounds, should be expended annually on improving the pastures of the front sub-divisions by surface sowing with suitable grasses, and that all areas so treated should be indicated on a plan of the block for future reference.

It would be very beneficial to have an area of good pasture where milking cows could be turned out to put on condition during the period of resting, and for this purpose I suggest that a sufficient area of the best pasture on the peninsular which is at present occupied by Mr. J. McGill should be set aside for this purpose. Providing the pasture on this area was not overstocked the Government would be justified in charging nine pence (9d.) per head per week for cattle grazing on it, notwithstanding that they might be licensed for grazing on the Common.

I would have liked to have gone into this matter more carefully and to have prepared a plan showing the proposed sub-divisions and submitted more definite recommendations, but unfortunately the time at my disposal will not permit this.

I have, however, discussed the matter at length with the Chief Constable who, I understand, is in charge of the reserve.

I am,
Sir,
Your obedient servant,
H. MUNRO.

LIVE STOCK REPORT, 1923-1924.

STOCK DEPARTMENT,
Stanley,

8th October, 1924.

The Honourable
the Colonial Secretary.

Sir,

I have the honour to submit herewith the Annual Report for the year 1923-1924 :—

A number of Stock Returns having been late in coming to hand, my own report has in consequence been considerably delayed.

Having only arrived in the Colony on 5th April, 1924, I regret that I am not in a position to report more fully upon the stock industry for the past season. My report is, therefore, considerably curtailed.

Mr. Munro, whose valuable services have been kindly lent by the New Zealand Government, is making close investigations into the stock industry of the Colony, and his report as the result of his investigations is being looked forward to with great interest by all connected with the industry.

Sheep.

There has been a considerable decrease in the number of sheep carried for the past season as compared with the number of sheep carried in the three previous seasons. This fact is naturally causing a good deal of anxiety to the farmers and those interested in the sheep industry of the Colony. The Hogget returns, especially, show 114,920 as against 134,461 for the previous season, making a drop of 19,541. It is to be hoped, however, that this unfortunate decrease will be a temporary one only.

The winter has been rather a severe one, and on some stations sheep have suffered considerably. Bad weather interfered a good deal with the clipping operations on some places, and a good number of weakly hoggets died from the effects of the cold weather following the clipping.

Cattle.

As with sheep, there is a decrease in numbers as compared with the previous year's returns. The cattle generally are of poor quality and could, without doubt, be improved a great deal. On one or two stations only are efforts being made to introduce bulls of better quality and thereby produce a better class of cattle.

Horses.

According to the returns for the past season the numbers of horses have increased, but even so there is still a great demand in the Colony for horses of a good type. Quite a number of horses suffering from colic have been reported and dealt with. This complaint, although a fairly common and sometimes serious one, is not often attended by serious results if proper and immediate attention is given to the animal affected.

I have the honour to be,

Sir,

Your obedient servant,

R. W. CARTER,

Chief Inspector of Stock.
