Dear Sir,

After skinning a Jackass Penguin from the side & seeing the result, I tried one opened down the breast & then one opened down the back. As the last seemed to give by far the best result, I am sending in the 3 specimens before doing more, to see what you think about them. It is very hard to keep them clean of course & I am afraid these 3 would not be good enough for hats or muffs or whatever they are wanted for.

Yours sincerely
Arthur J. Cobb.

To
The Colonial Secretary
Stanley.
