

Extract from Agricultural Officer's Report on West
Hall Island Lewis.
Original filed on 2797/A - Agric. Dept. Reports.

At the old Whaling Station the roof has at last started to blow off and Mr. Davis is going to remove it to save the wood and iron. This will leave all the lathes etc. at present preserved in whale grease to become exposed and rapidly rust away, there are also stocks of bolts and iron plates there and a lot of coal and coke perhaps it would be worth E.E. paying a flying visit to see if there is anything there worth buying and shipping back here.
