.....feet.....inches. Maximum draught of water in summer..... (The maximum draught of water in summer is the draught of water which would be shown on the scale of feet on the stem and stern post of the ship if she were so loaded that the upper edge of the summer load line were on the surface of the water and the ship were upright on an even keel.

NOTES.

1.—The above particulars, and particulars of depth of loading as detailed on the following pages are to be recorded before the ship leaves any dock, wharf, harbour, or other place for the purpose of proceeding to sea. 2.—The actual freeboard amidships on each side of the ship is to be measured from the upper edge of the deck line to the surface of the water, when the ship is loaded and ready to leave. The actual "mean" freeboard is the mean of the actual freeboards, port and starboard, measured as indicated above.

3.—Unless the ship is a home trade ship, a Notice. Form L.L.14A, is to be posted up in some conspicuous place on board the ship before she leaves any dock, wharf, harbour, or other place, for the purpose of proceeding to sea, and the Notice is to be kept so posted up and legible until the ship arrives at some other dock, wharf, harbour or place. The date and time of posting the Notice is to be entered in column 15.

4.-In case of a home trade ship, columns 9-15 need not be filled in.

5.-No entries are required in columns 8-14 when the actual mean freeboard (Column 7) is not less than the appropriate salt water freeboard.

Incessoard. 6.—If, in determining density of water, use is made of a hydrometer on which the reading at the top of the scale is 1000 or 00, meaning "full fresh water," the hydrometer reading gives the density to be entered, e.g., a reading of 15 on such hydrometers means a density of 1015. If the hydrometer used has the scale reversed, i.e., if the reading 00 is at the bottom of the scale and means "full salt water." the density must be obtained by subtracting the hydrometer reading from 1025, e.g., if the reading is at 15, the density to be entered will be 1010.

7.—The Winter North Atlantic load line, if assigned, applies for voyages across the North Atlantic, North of latitude 36<sup>4</sup> N. during the winter months as defined in the Load Line Rules, 1911, and shown on the chart which forms part of these Rules. The periods during which the other seasonal load lines apply in different parts of the world are as indicated in the said Rules and chart.

8.-Penalty.-Failure to enter the required particulars of load line, depth of loading, etc., in the Official Log Book at the proper time renders the Master or Owner liable to a fine not exceeding #20 for each offence.

board, which have occurred during the voyage.

Spaces are provided below for the entry of all particulars required by the Eighth Schedule before montioned. The facts should be carefully entered under the appropriate headings: and upon the next arrival of the ship in port (except when the log-book itself is surrendered at the end of the voyage or termination of the Agreement), a true copy of the entries must be delivered on a Form B, & D.1 to a Superintendent or Consular Officer for transmission to the Registrar-General of Shipping and Scamen.
