The Hon Col: Secretary.

The drain in question is an earth ditch with a soft bottom, having a fall in any easterly direction.

Should a concrete culvert be constructed in place of the present ditch the house water would still hang, as the distance from the house in question to a pipe drain running in a northerly direction is too great.

In my opinion, seeing there are only two houses concerned, a 4" pipe drain should be laid in the opposite direction, to enter Philemon Street down drain. Then the ditch would only have to carry surface water and not house water.

Draft indent herewith. I would suggest that an indent for various size pipes be sent instead of a small order such as this. A saving in freight and packing charges will be made.

I refer to this in M/P 723/20 my minute of 22/10/20.

A comprehensive indent for 1921 requirements in respect of work in sight should be made out. There is little use in sending home indents for each separate job.

Stanley Sept. 30th 1920

Sir

I wish there could be something done to the drain, in front of my wife's property, situated on Fitzroy Road as the present drain does not carry the water away and it is in a bad condition.

I have the honour to be Sir

Your Obedient Servant

W. Bowmer

For Mr. W. Bowmer

To The Honorable

The Colonial Secretary

Stanley

737/20.

26th October,

20.

Sir,

I am directed by the Administrator to acknowledge the receipt of your letter of the 30th September, 1930, with reference to the condition of a drain in Fitzroy Road, and to inform you that the necessary improvements in connection with this drainage will be undertaken in the 1931 programme of works.

I am,

Sir,

Your obedient servant,

for Colonial Secretary.
